English Language Proficiency: English is the primary language of instruction in all faculties except Faculté Saint-Jean, where French is the primary language. Therefore, all applicants to faculties other than Faculté Saint-Jean must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to demonstrate proficiency in the English language. This demonstration may take any one of several forms:

1. successful completion of the equivalent of three years of full-time instruction in an English language secondary institution in Canada;

2. presentation of a successfully completed full-year or more of course work, including an introductory course in English, in an accredited post-secondary institution where English is the language of instruction and from which advance credit is normally allowed by The University of Alberta.

3. successful completion of the equivalent of three years of full-time instruction in a school/institution outside Canada where academic subjects are taught by "English Language" instructors, as accredited by the International Institute of Education (I.I.E.) or as recognized by The University of Alberta;

4. successful completion of the equivalent of three years of full-time instruction in a school in Canada in which the major language of instruction is other than English but where the level of English proficiency required for graduation is equivalent to that in English language schools, as recognized by a provincial Department of Education; or

5. presentation of results of the Test of English as a Foreign Language (TOEFL) or its equivalent in other approved standard tests. Applicants presenting a TOEFL score of 600 (or its equivalent in other approved standard tests) will be considered as having demonstrated English language proficiency.

Having been designated as an official test centre, The University of Alberta is able to offer a series of TOEFL test administrations throughout the year. Six Special and six International examinations are held each year. Further information and application forms may be obtained from the Examinations and Timetabling Division, Office of the Registrar, Room 123, Administration Building, University of Alberta.

133.3 The Degree of Master of Nursing

133.3.1 GENERAL INFORMATION

The Faculty of Nursing offers a two- (academic) year program, leading to the degree of Master of Nursing. While at this point in time the primary focus is upon preparing nurses to function as advanced level practitioners in the care of acutely ill patients, two factors should be underlined: (1) that students are encouraged to pursue a second focus of interest, such as teaching, research, or administration and/or a second discipline such as physiology, or social psychology, and (2) that in the future, as Faculty resources permit, applications will be accepted from students who wish to focus on areas other than nursing in acute illness.

All students are required to complete a thesis. Students' programs are substantially tailored to their nursing backgrounds and their career objectives. The intent in program planning is to assist students to pursue special interests through utilizing resources not only within the Faculty of Nursing but within the University as a whole.

The time required to complete the Master's program varies according to the candidate's undergraduate preparation and career experience, and the nature of the research undertaken. Generally, a minimum of two academic years is required.

Information regarding assistantships and other forms of financial assistance will be supplied on request.

General inquiries should be addressed to Graduate Program Co-ordinator, Faculty of Nursing, Clinical Sciences Building, The University of Alberta, Edmonton. Canada.

133.3.2 SAMPLE PROGRAM OF STUDIES

It is underlined that individual student programs vary. For example, most students take a minimum of two electives in their first year, and these are determined on an individual basis. However, most students take the following "core" courses:

(1) *First Year*
Nursing 500-501 (Theory and Research in Nursing)
Nursing 505-506 (Advanced Nursing Trends)
H.S.A. 430-431 (Research)

(2) *Second Year*
H.S.A. 530-531 (or equivalent Advanced Research)
Nursing 550 (Advanced Nursing Trends)
Nursing 560 (Advanced Topics in Acute Illness)
Thesis

133.3.3 ADMISSION REQUIREMENTS

(2) A baccalaureate degree in Nursing with an average of at least 65% in the work of the final two years;

(3) Submission of the results of a Miller Analogies Test;

(4) A statement from the Coordinator of Graduate Programs in the Faculty of Nursing that the applicant is, in all respects, acceptable to the Faculty.

(5) A specified schedule of immunization must be completed prior to commencement of clinical practice in the program.

133.4 The Certificate in Advanced Practical Obstetrics

Courses

NURS 450. Advanced preparation in the care of the maternity patient.
NURS 451. Nursing care of the high risk mother.
NURS 453. Nursing care of the normal and high risk newborn.

(a) Eight weeks' clinical experience in selected obstetrical experience throughout the Province;

(b) Four weeks' clinical experience in either a high risk maternal or neonatal unit.

Each student must deliver, under medical supervision, a minimum of twenty cases.

To obtain the *Certificate in Advanced Practical Obstetrics* the students will have to complete a *total* of 12 weeks terminal fieldwork. Of this, *a minimum* of 6 weeks will be related to Nursing 450 and *a minimum* of 4 weeks will be in either Care of the High Risk Mother OR Care of the Normal and High Risk Newborn. The additional two weeks may be taken in either Normal or High Risk, depending on the student's future work plans.

134 DETAILS OF COURSES

134.1 General Information

Courses open to students in the Faculty of Nursing are listed here in alphabetical order, whether they are offered by the Faculty of Nursing or by another faculty. Prospective students are referred to other Faculty Calendars for descriptions of a variety of courses they may wish to consider for options in their programs.

Each course is designated by its computer abbreviation and a number. Students should use this abbreviation and number when filling in their registration forms.

Following the title of the course is the symbol "★" standing for "course weight", and a number indicating the weight of the course as used in computing grade-point averages. An ordinary full-session course is weighted 6. A single-term course is normally weighted 3. Some honors and graduate courses involving research may vary in weight according to the length and difficulty of the research project. Some courses are offered for credit only, and carry no weight.

The next three figures, enclosed in parentheses, indicate the hours of instruction required by the course in a week. The format is as follows: the first position indicates lecture hours; the second position indicates seminar hours (s), demonstration (d), clinic (c), or lecture-lab (L); and the third position indicates labora-

tory hours. The expression "3/2" means three hours of instruction every second week. The hours of instruction for a full-session course are the same in both terms unless otherwise indicated. If the course is a single-term course, the term in which it may be offered is mentioned before the hours of instruction.

THE APPEARANCE OF A COURSE DESCRIPTION IN THE FOLLOWING LIST DOES NOT CONSTITUTE ANY GUARANTEE THAT THE COURSE WILL ACTUALLY BE OFFERED IN THE FORTHCOMING SESSION. INFORMATION AS TO WHICH COURSES WILL BE OFFERED, THE NAMES OF THE INSTRUCTORS, AND ALL FURTHER DETAILS MUST BE SOUGHT FROM THE DEPARTMENT CONCERNED.

141.2 Opportunities in Pharmacy

Pharmacy is one of the oldest of the professions. It has progressed from the compounding and dispensing of drugs to essentially a "knowledge system" about drugs and drug products. Pharmacy practice has increasingly become oriented to the patient and accordingly requires the aspiring pharmacist to possess good communication skills and to be aware of and sensitive to the frequent need for compassion and understanding.

A variety of career options are open to the pharmacist upon graduation and licensure.

Community Practice. Community practice provides the "place of practice" for the majority of pharmacists. It can take one of many forms, namely, independently owned, a chain, a unit within a department store or a part of a clinic. It can be large, providing a broad range of products and services; or small, dealing exclusively in medicines and related supplies. In whatever form, the practice environment of community pharmacy is one where the professional activities of the pharmacist, be he owner, manager or employee, involve direct contact with the client seeking either prescription medication or self-medication products or services. In balancing the commercial and professional aspects of community practice pharmacy, the pharmacist remains accountable in ensuring that the patient properly takes only those medicines which are essential for the maintenance of health, the prevention of disease or the rational relief of pain.

Hospital Practice. Hospital pharmacists provide services in complex health care organizations. Traditionally, the pharmacist is responsible for the institutional procurement, preparation, distribution and control of pharmaceuticals. As a member of a health care team, the pharmacist is also responsible for patient-oriented services such as therapeutic consultations, drug information, and patient counselling and education. Some hospital pharmacists find careers by concentrating their practice in specific areas such as management, clinical services, and drug information. Others find rewarding careers as generalists in the country's many smaller to medium-sized institutions.

Pharmaceutical Industry. The pharmaceutical industry has essentially taken over the traditional compounding responsibilities on behalf of the practising pharmacist. By freeing the pharmacist from the time constraints of the compounding of medication, a redirection toward a patient-oriented pharmacy practice has been made possible.

The pharmacist who chooses the pharmaceutical industry as his practice environment identifies with one or more of the distinct parts of the compounding function: discovery or invention, formulation, ensuring safety, ensuring efficacy or the actual manufacture of the drug. However, he may alternatively become involved with the marketing of the product. The most facile point of entry into many companies is via the sales department which is, as well, the area of greatest opportunity for advancement. Opportunities in the other areas are often enhanced for graduates who proceed for post-graduate training in one of the pharmaceutical sciences.

Government Regulatory and Association Pharmacy Services. Career opportunities for pharmacists exist in government ministries, both federal and provincial. These opportunities often relate to inspection and analyst functions in the regulatory sense. Each provincial licensing body is likewise staffed by pharmacists who involve themselves in regulatory activities, being that Pharmacy is a self-policing profession.

Education and Research. Graduates may choose the university as their practice environment. However training to the doctoral level is normally essential, although practising pharmacists in community, hospital association and the pharmaceutical industry contribute to specific educational programs for pharmacy students.

Opportunities in research can be found in universities, government institutions and in private industry. Once again, training to the doctoral level is often essential.

Finally, many pharmacists have found greatly expanded career opportunities by adding to their basic degree in pharmacy, parallel degrees in law, business and engineering.

141.3 Qualifications for Practice in Alberta

The Bachelor of Science degree in Pharmacy of The University of Alberta is the minimum academic requirement accepted by the Alberta Pharmaceutical Association for the licence to practise pharmacy in the Province of Alberta.

In order to register as a pharmacist with the Alberta Pharmaceutical Association a graduate must also have successfully completed an internship program. This internship program, sponsored and operated by the Alberta Pharmaceutical Association, is available to students in their graduating year at The University of Alberta. Information concerning the regulations applying to practical experience in Alberta may be obtained from the registrar-treasurer, Alberta Pharmaceutical Association, 10615-124 Street, Edmonton, Alberta, T5N 1S5.

The regulations governing the practice of Pharmacy in the Province of Alberta are set forth in the Alberta Pharmaceutical Association Act.

142 FACULTY REGULATIONS

142.1 Admission

Admission is based on academic achievement and every effort will be made to accept all applicants who are academically qualified. However, since the number of persons applying is currently in excess of the number that can be accommodated due to limitations of space and other facilities, priority is given to students who are Canadian citizens or Permanent Residents (Landed Immigrants) who are residents of Alberta. A limited number of highly qualified students who reside in other parts of Canada are also accepted annually, as are a smaller number of highly qualified foreign (student visa) applicants.

The admission requirements of the Faculty of Pharmacy and Pharmaceutical Sciences are set out in § § 13.1 and 13.14 of the University Regulations and Information for Students Calendar. The prospective student must submit PCAT (Pharmacy College Admission Test) scores with the application for admission. PCAT application forms may be obtained from the Examinations and Timetabling Division, Office of the Registrar, Room 123, Administration Building (Tel. 432-5221), or from The Psychological Corporation, 304 East 45th Street, New York, New York, 10017, U.S.A. In addition, the prospective student must submit a statement with his/her application for admission, in which the student's reasons for seeking admission to the Faculty of Pharmacy and special career goals in pharmacy are set forth.

Upon notification of acceptance successful applicants will be required to confirm their intention to register by submitting a non-refundable $50.00 deposit within a specified time. The deposit will be credited toward payment of tuition upon completion of registration.

English Language Proficiency: English is the primary language of instruction in all faculties except Faculté Saint-Jean, where French is the primary language. Therefore, all applicants to undergraduate faculties other than Faculté Saint-Jean must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to demonstrate proficiency in the English language. This demonstration may take any one of several forms:

1. successful completion of the equivalent of three years of full-time instruction in an English language secondary institution in Canada;

2. presentation of a successfully completed full-year or more of course work, including an introductory course in English, in an accredited post-secondary institution where English is the language of instruction and from which advance credit is normally allowed by The University of Alberta;

3. successful completion of the equivalent of three years of full-time instruction in a school/institution outside Canada where academic subjects are taught by "English Language" instructors, as accredited by the International Institute of Education (I.I.E.), or as recognized by The University of Alberta;

4. successful completion of the equivalent of three years of full-time instruction in a school in Canada in which the major language of instruction is other than English but where the level of English proficiency required for graduation is equivalent to that in English language schools, as recognized by a provincial Department of Education; or

5. presentation of results of the Test of English as a Foreign Language (TOEFL) or its equivalent in other approved standard tests.

a. Applicants presenting a TOEFL score of 600 (or its equivalent in other approved standard tests) will be considered as having demonstrated English language proficiency.

b. Applicants presenting a TOEFL score of less than 600 but 550 or greater will usually be considered as having a minor deficiency. Subject to the requirements of the particular Faculties, such an applicant may be granted provisional admission into the University but will be required to successfully complete one or more remedial Faculty of Extension non-credit English language courses and may be required to register in less than a normal course load in his or her regular program until the English language deficiency has been corrected. The student will not be permitted to register in a further academic year until satisfactory command of the language of instruction has been demonstrated (as in (a) above).

c. An applicant presenting a TOEFL score of less than 550 will be considered as having a major deficiency in the language of instruction and will not be admitted into The University of Alberta until proficiency can be demonstrated.

Having been designated as an official test centre, The University of Alberta is able to offer a series of TOEFL test administrations throughout the year. Six Special and six International examinations are held each year. Further information and application forms

may be obtained from the Examinations and Timetabling Division, Office of the Registrar, Rm. 123, Administration Building, University of Alberta.

142.2 Academic Standing

Academic performance is normally measured by Grade Point Average* (G.P.A.) attained during the academic year. In this determination, grades of W are ignored throughout, grades of ABF or INF are considered to be grades of 1.

Determination of each student's academic performance will normally occur after the end of the regular academic year, on the basis of the work attempted during that year.

Promotion of the student from year to year is contingent upon satisfactory academic performance.

Satisfactory performance is defined as that which yields a Grade Point Average of 5.0 or more.

Probationary performance is that which yields a Grade Point Average of less than 5.0 but not less than 4.5. In order to be allowed to continue in the program, the probationary student must attain a G.P.A. in his subsequent year's work sufficient to bring his overall cumulative G.P.A. to at least 5.0.

Unsatisfactory performance is that which yields a Grade Point Average of less than 4.5.

Supplemental privileges. Students whose performance is satisfactory or probationary may normally write supplemental examinations (when available) provided their Quality Index** (Q.I.) is at least 70% of the Grade Point Average. If it is less than 70%, the student will normally be allowed to repeat failed courses.

Students whose performance is unsatisfactory may normally only be eligible for supplementals if their Grade Point Average is at least 4.3 and the Quality Index is at least 70% of the G.P.A. Students whose G.P.A. is at least 4.3 but whose Q.I. is less than 70% of the Grade Point Average will normally be allowed to repeat failed courses.

Required to withdraw. Students with Grade Point Averages below 4.3 will not be allowed to continue in the faculty.

Graduation. In order to qualify for graduation the student must satisfy all degree requirements as specified in 143.1 below and present an overall cumulative Grade Point Average of at least 5.0. This cumulative G.P.A. is to be calculated using only those grades obtained in courses taken as a part of the degree program (see §143.1.3). It does not include grades obtained in courses taken as extra to the program nor does it include those in courses accepted for transfer credit.

The additional requirement of a satisfactory performance in a comprehensive examination, to be taken upon completion of the course requirements, is presently under consideration.

First Class Standing is awarded to each student who achieves a Grade Point Average of at least 7.5 during a winter session, provided he has taken at least four full or eight half courses in that session.

The notation *with distinction* is inscribed on the permanent record and graduate parchment if the candidate has obtained a Grade Point Average of 7.5 or higher, averaged over the last two years of his program.

$$*\text{G.P.A.} = \frac{\text{Sum of (Grade X Course Weight)}}{\text{Sum of Course Weights}}$$

$$**\text{Q.I.} = \frac{\text{Sum of Course Weights Passed}}{\text{Sum of Course Weights Attempted}} \times \text{G.P.A.}$$

Appeals and Grievances Decisions on academic standing are made by the Council of the Faculty. Appeals may be made to the G.F.C. Academic Appeals Committee. Enquiries concerning standing in individual courses should be made to the professor in charge of the course. If the issue is still not resolved the student may report the matter to the Dean for enquiry. See § 16.7 (Appeals and Grievances) of the University Regulations and Information for Students Calendar for further information.

143 PROGRAMS OF STUDY

143.1 The Degree of Bachelor of Science in Pharmacy

143.1.1 GENERAL INFORMATION

The first degree program in Pharmacy is four years in length.

The courses to be taken in the first three years of the program are essentially fixed and are considered basic to the training of an undifferentiated pharmacist. The fourth year has three required half courses to round out the core program. The remainder of the fourth year course load allows for some degree of specialization to better prepare the student for his contemplated career in Pharmacy. Accordingly, the student must select courses from one of three areas of specialization, namely, *community practice, hospital practice* or *industrial, government or university practice.* Normally, no more than one half course outside of the specialty area will be approved in the student's program.

Pre-registration. All students will be required to pre-register into the subsequent year's program prior to completion of the current year's work. Election of a specialty area must be made at this time by the student who is pre-registering for his final year in the program.

143.1.2 TRANSFER FROM OTHER FACULTIES OR INSTITUTIONS

Students wishing to study at another institution in Alberta with the intent of transferring to Pharmacy are advised to consult the calendar of that institution regarding an appropriate pre-Pharmacy program.

144.1 General Information

Courses open to students in the Faculty of Pharmacy and Pharmaceutical Sciences are listed here in alphabetical order, whether they are offered by that faculty or by another faculty.

Each course is designated by its computer abbreviation and a number. Students should use this abbreviation and number when filling in their registration forms.

Following the title of the course is the symbol "★" standing for "course weight" (not to be confused with course credit unit (see §143.1,3. — Fourth Year)), and a number indicating the weight of the course as used in computing grade-point averages. An ordinary full-session course is weighted 6. A single-term course is normally weighted 3. Some honors and graduate courses involving research may vary in weight according to the length and difficulty of the research project. Some courses are offered for credit only, and carry no weight.

The next three figures, enclosed in parentheses, indicate the hours of instruction required by the course in a week. The format is as follows: the first position indicates lecture hours; the second position indicates seminar hours (s), demonstration (d), clinic (c), or lecture-lab (L); and the third position indicates laboratory hours. The expression "3/2" means three hours of instruction every second week. The hours of instruction for a full-session course are the same in both terms unless otherwise indicated. If the course is a single-term course, the term in which it may be offered is mentioned before the hours of instruction.

THE APPEARANCE OF A COURSE DESCRIPTION IN THE FOLLOWING LIST DOES NOT CONSTITUTE ANY GUARANTEE THAT THE COURSE WILL ACTUALLY BE OFFERED IN THE FORTHCOMING SESSION. INFORMATION AS TO WHICH COURSES WILL BE OFFERED, THE NAMES OF THE INSTRUCTORS, AND ALL FURTHER DETAILS MUST BE SOUGHT FROM THE DEPARTMENT CONCERNED.

151.2 General Information

A School of Physical Education was organized under General Faculties Council in 1954. The degree program in Physical Education has been offered since 1950. The program originally led to the degree of Bachelor of Education in Physical Education, which has been superseded by the degree of Bachelor of Physical Education. Effective April 1, 1964 the School became the Faculty of Physical Education. In 1976 the name was changed to the Faculty of Physical Education and Recreation.

Since 1963 the Faculty has also offered a four-year program leading to the degree of Bachelor of Arts in Recreation Administration.

In addition to these two programs, the Faculty provides instruction in teaching methods in both health and physical education for students in the Faculty of Education, organizes and supervises intramural programs, and acts in an advisory capacity for the intercollegiate athletic programs.

Students holding the degree of B.P.E. or its equivalent may undertake graduate study in physical education leading to the degrees of Master of Arts, Master of Science and Doctor of Philosophy. Students holding the degree of B.A. in Recreation Administration may undertake graduate study leading to the degree of Master of Arts in Recreation Administration. The calendar of the Faculty of Graduate Studies and Research should be consulted for further details.

Teacher Education. Students wishing to qualify for teaching positions have the option of completing the Bachelor of Physical Education Degree and then taking teacher certification or they may complete the Bachelor of Education Degree with a major in physical education. The major in physical education is offered to students in both the elementary and secondary routes. The Bachelor of Physical Education Degree offers approximately forty percent more professional physical education courses but requires one additional year for certification.

Intramural and Recreational Athletics. The Faculty of Physical Education and Recreation, with the cooperation of the Department of Athletic Services, organizes and administers a comprehensive program of intramural and recreational sports. Primary purposes of the program are to develop recreational skills and to encourage sportsmanship and friendly relations among the students of the University through athletic competition. Individual and group competitive sports for men and women include tennis, golf, track and field, cross-country running, curling, squash, handball, water polo, basketball, hockey, volleyball, touch football, swimming, raquetball, bowling, skiing, field hockey, team handball, table tennis, fencing, billiards, yoga, and fitness. Facilities include gymnasia, two swimming pools, outdoor playing fields, and the University ice arena.

Intercollegiate Athletics. As a member of the Canada West University Athletic Association, the University provides opportunities for men and women to compete in intercollegiate sports. Included in the activities for men are cross-country running, gymnastics, volleyball, basketball, hockey, wrestling, soccer, rugger, swimming and diving, track and field, football, curling, and judo. Women compete in cross-country running, track and field, basketball, volleyball, curling, gymnastics, swimming, field hockey and diving.

151.3 Clothing

Students are advised that the purchase of physical education wearing apparel must be completed prior to the start of activity classes.

Activity course dress requirement for first class: Students are expected to attend the first class of an activity course appropriately dressed for active participation. Information concerning dress for each activity course will be posted at Part III of In-Person Registration and will be available through the Department of Physical Education.

152 FACULTY REGULATIONS

152.1 Admission

Admission requirements of the Faculty of Physical Education and Recreation will be found in § § 13.1 and 13.15 of the University Regulations and Information for Students Calendar.

Upon notification of acceptance successful applicants will be required to confirm their intention to register by submitting a non-refundable $50.00 deposit within a specified time. The deposit will be credited toward payment of tuition upon completion of registration.

In addition all applicants for the Bachelor of Physical Education Degree must have a personal interview with a representative of the Faculty of Physical Education and Recreation. Also, the candidates will be evaluated by means of a questionnaire as well as having to be able to successfully complete the Faculty Fitness and Ability Test. A physical examination is required of all applicants prior to admission to the B.P.E. program.

Candidates for the B.A. degree in Recreation Administration must satisfactorily complete a questionnaire and supply two letters of reference.

English Language Proficiency: English is the primary language of instruction in all faculties except Faculté Saint-Jean, where French is the primary language. Therefore, all applicants to undergraduate faculties other than Faculté Saint-Jean must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to demonstrate proficiency in the English language. This demonstration may take any one of several forms:

1. successful completion of the equivalent of three years of full-time instruction in an English language secondary institution in Canada;

2. presentation of a successfully completed full-year or more of course work, including an introductory course in English, in an accredited post-secondary institution where English is the language of instruction and from which advance credit is normally allowed by The University of Alberta;

3. successful completion of the equivalent of three years of full-time instruction in a school/institution outside Canada where academic subjects are taught by "English Language" instructors, as accredited by the International Institute of Education (I.I.E.), or as recognized by The University of Alberta;

4. successful completion of the equivalent of three years of full-time instruction in a school in Canada in which the major language of instruction is other than English but where the level of English proficiency required for graduation is equivalent to that in English language schools, as recognized by a provincial Department of Education; or

5. presentation of results of the Test of English as a Foreign Language (TOEFL) or its equivalent in other approved standard tests. Applicants presenting a TOEFL score of 600 (or its equivalent in other approved standard tests) will be considered as having demonstrated English language proficiency.

Having been designated as an official test center, The University of Alberta is able to offer a series of TOEFL test administrations throughout the year. Six Special and six International examinations are held each year. Further information and application forms may be obtained from the Examinations and Timetabling Division, Office of Registrar, Rm. 123, Administration Building, University of Alberta.

152.2 *Academic Standings and Graduation*

(1) To be granted the B.P.E. degree or the B.A. degree in Recreation Administration, a student must obtain a passing mark or better in all courses in the final two years of the respective degree program, obtaining a grade-point average of at least 5.0.

NOTE: A grade of 3C (credit conceded) is not normally permitted in any course leading to a degree in Physical Education or Recreation Administration. For admission to a course with a prerequisite requirement a grade of 4 must be obtained in the prerequisite course.

(2) A student will not be allowed to write more than five supplemental examinations in full-session courses or the equivalent, for the purpose of obtaining passing marks, or of raising his/her average to the required level.

(3) A student will not be allowed to write more than two supplemental examinations in full-session courses or equivalent in any year. (This regulation may, in exceptional circumstances, be relaxed for first-year students).

(4) A student who repeats a year will be granted no supplemental privileges in the courses taken that year and must pass all courses in the repeated year with a grade-point average of at least 5.0 to be allowed to continue.

(5) The privilege of repeating a year will be granted to a student not more than once during his/her candidacy for a degree in this Faculty unless by special permission of the Dean.

152.3 *Changes in Registration*

(1) *Withdrawal from courses.* The deadlines for withdrawing from courses are as follows: from a full-session course, February 12; from a single-term course offered in First Term, November 12; from a single-term course offered in the Second Term, March 1st.

(2) *Changes in Registration.* The deadlines for changes in registration, daytime courses are:

First Term and full-session courses: September 17th.

Second Term courses: January 11th.

152.4 *Appeals and Grievances*

Student grievances of an academic nature sometimes arise. If this occurs, students in the Faculty of Physical Education and Recreation are advised to first contact the instructor concerned where, in most cases, satisfactory explanations will be obtained. If not, students are advised to see the Department Chairman and the Dean in that order.

For further information regarding Appeals Procedures at the Faculty level the student should seek the advice of the Dean.

For other information related to Appeals and Grievances students are directed to § 16.7 of the University Regulations and Information for Students Calendar.

152.5 *Attendance in Dance, Health Education, and Physical Education Courses*

(1) *Attendance at the first class:* Due to the demand for spaces in many dance, health education, and physical education courses, it is necessary to obtain accurate enrolment figures as early as possible in the term to allow students on waiting lists to be considered for available spaces. Therefore, students who are not in attendance at the first two class meetings (without giving PRIOR written notice to the Department of Physical Education) will be subject to having their names struck from the official class list and will not be permitted to attend further meetings of the class.

(2) *Attendance in courses:* Since attendance at lectures, participation in classroom discussions and projects, and the completion of assignments are important components of most courses, students will serve their interests best by regular attendance. Those who choose not to attend must assume whatever risks are involved. Thus, a student may be refused permission to write the final examination in a course on the recommendation of the department concerned and with the concurrence of the Dean of the Faculty in the following circumstances:

1. The student has neglected to do a substantial portion of the written assignments in a course of which these are an essential feature, or has attended insufficiently in a course in which class participation is a necessity.
2. The student has neglected to do a sufficient amount of the practical or laboratory work in a course in which these are considered a basic re-

quirement (See University Regulations and Information for Students Calendar, sections 16.5 and 16.3.2(5)).

The Department of Physical Education's policy concerning attendance at laboratory, practicum, seminars, and physical activity classes is that unexcused absence from more than 10% of class sessions is considered to be insufficient attendance. Therefore, in such a situation, permission to take the final examination may be refused.

153.2 The Degree of B.A. in Recreation Administration

The student's program over four years is composed, essentially, of 2 sets of courses: those offered by the Department of Recreation Administration as core to the entire program (core professional courses), as core to a student's chosen pattern or area of interest (pattern

professional courses), or as recreation options (option professional courses); and those offered by other departments at the University and recognized as core to the entire program (core foundation courses), as core to a student's chosen pattern or area of interest (pattern foundation courses), or as pattern related or approved options. The latter set of courses is drawn from such fields as Sociology, Political Science, Fine Arts, Psychology, Biology, Forest Science, Physical Education etc. The intent of the two sets of courses is to provide all students with a strong common core program, together with an opportunity to obtain a beginning competency in one of a range of areas of professional interest. The student's program is composed of the equivalent of 44 single-term courses of which a minimum of 14 must be Recreation courses, and a minimum of 18 taken in the Faculties of Arts and Science.

The four year program leading to the B.A. in Recreation Administration offers the student insights into the broad field of recreation together with an opportunity for some concentration in one of the following patterns or areas of interest:

1. Community Development and Leisure Services
2. Management and Supervision
3. Planning and Management of Recreation Environments
4. Recreation through the Cultural Arts
5. Recreation through Physical Activity
6. Heritage Interpretation
7. Outdoor Recreation
8. Recreation for Special Populations
9. Individual Program

Those persons already holding a Bachelor's degree who seek to obtain a B.A. degree in Recreation Administration are normally required to undertake a minimum 22 single-term courses. Students lacking essential social science courses may be asked to take additional courses.

153.3 Teacher Education

Students interested in specializing in elementary school physical education, or who desire to include a secondary school physical education major within the Bachelor of Education program, should consult the Faculty of Education Calendar, particularly § § 73.2.4 and 73.3.3.

153.4 Graduate study

The Faculty of Physical Education and Recreation offers programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy. Students holding the degree of B.A. in Recreation Administration may undertake graduate study leading to the degree of Master of Arts in Recreation Administration. Well-equipped facilities are available for a limited number of graduate students.

For further information write to: Chairman, Graduate Committee, Department of Physical Education, Faculty of Physical Education and Recreation, University of Alberta, Edmonton, Alberta T6G 2H9.

154 DETAILS OF COURSES

154.1 General Information

Courses open to students in the Faculty of Physical Education and Recreation are listed here in groups, as follows: courses in the B.P.E. program; courses in the B.A. (Recreation Administration) program; courses in the Department of Movement Education; and graduate courses in Physical Education, Recreation Administration and Movement Education.

Each course is designated by its computer abbreviation and a number. Students should use this abbreviation and number when filling in their registration forms.

Following the title of the course is the symbol "★" standing for "course weight", and a number indicating the weight of the course as used in computing grade-point averages. An ordinary full-session course is weighted 6. A single-term course is normally weighted 3. Some honors and graduate courses involving research may vary in weight according to the length and difficulty of the research project. Some courses are offered for credit only, and carry no weight.

The next three figures, enclosed in parentheses, indicate the hours of instruction required by the course in a week. The format is as follows: the first position indicates lecture hours; the second position indicates seminar hours (s), demonstration (d), clinic (c), or lecture-lab (L); and the third position indicates laboratory hours. The hours of instruction for a full-session course are the same in both terms unless otherwise indicated. If the course is a single-term course, the term in which it may be offered is mentioned before the hours of instruction.

THE APPEARANCE OF A COURSE DESCRIPTION IN THE FOLLOWING LIST DOES NOT CONSTITUTE ANY GUARANTEE THAT THE COURSE WILL ACTUALLY BE OFFERED IN THE FORTHCOMING SESSION. INFORMATION AS TO WHICH COURSES WILL BE OFFERED, THE NAMES OF THE INSTRUCTORS, AND ALL FURTHER DETAILS MUST BE SOUGHT FROM THE DEPARTMENT CONCERNED.

161.2 General Information

The importance of Medical Rehabilitation was recognized by the University establishing a program in Physical Therapy in 1954, and a program in Occupational Therapy in 1960. The Division of Speech Pathology and Audiology first offered courses in 1969.

Undergraduate Programs — Four-year degree programs are offered in all three Departments of the Faculty. Applicants to the Department of Speech Pathology and Audiology and the Department of Occupational Therapy are required to complete a pre-professional year prior to enrolling in those programs. All students are required to undertake clinical practice during their course of study in approved institutions under the supervision of qualified professional staff. An honorarium may be paid by the institutes concerned while the student is serving the internship during the summer months.

Programs for Master's Degrees — Master's of Science in Physical Therapy: The Department of Physical Therapy offers an advanced program in research techniques, orthopaedics, sports therapy, therapeutic exercise and other Physical Therapy specialty areas. The program normally requires two years but the time may vary according to the academic background of each student. Applicants must normally have had at least one year of clinical experience prior to being accepted into the program. It is possible to enter the program in January, May or September.

162 FACULTY REGULATIONS

162.1 Admission

162.1.1 GENERAL INFORMATION

Owing to severe limitations of space and to the present shortage of clinical placement centres, admission into all programs is on a quota system: thirty-six students in the Occupational Therapy program; forty in Physical Therapy; and twenty-five in Speech Pathology and Audiology.

Although selection procedures will vary with the program offered, in general the emphasis will be upon academic standing with preference being given to those applicants with the highest standing.

As admission requirements vary with the program selected, it is imperative that those wishing to apply consult the matriculation requirements as set out in § 13.17 of the University Regulations and Information for Students Calendar.

Applications for admission to the faculty must be received by *May 1*. Applicants can expect to be informed of their status following receipt of high school results, generally in the latter part of August.

Upon notification of acceptance successful applicants will be required to confirm their intention to register by submitting a non-refundable $50.00 deposit within a specified time. The deposit will be credited toward payment of tuition upon completion of registration.

Academic Standings: It is the responsibility of applicants to ensure that official transcripts of their academic marks from high school or university are submitted to the Registrar's Office. In the case of university transfer, these transcripts must be received no later than July 3, 1981.

English Language Proficiency: English is the primary language of instruction in all faculties except Faculté Saint-Jean, where French is the primary language. Therefore, all applicants to undergraduate faculties other than Faculté Saint-Jean must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to demonstrate proficiency in the English language. This demonstration may take any one of several forms:

1. Successful completion of the equivalent of three years of full-time instruction in an English language secondary institution in Canada;

2. Presentation of a successfully completed full year or more of course work, including an introductory course in English, in an accredited post-secondary institution where English is the language of instruction and from which advance credit is normally allowed by The University of Alberta;

3. Successful completion of the equivalent of three years of full-time instruction in a school/institution outside Canada where academic subjects are taught by "English Language" instructors, as accredited by the International Institute of Education (I.I.E.), or as recognized by The University of Alberta;

4. Students entering The University of Alberta from high school shall enroll in the faculty of their choice and shall then apply for admission after successful completion of first year University.

Admission to the second year of the O.T. program will be based on academic performance in the first year of university study, including OCCTH 207/208, as well as completion of a satisfactory interview with a representative of the department. Preference will normally be given to those students with the highest overall standing and who have completed a full course load during one academic session. Required courses in the pre-professional year are PSYCO 260/261 or their equivalent, one full laboratory science, and OCCTH 207/208.

Students must contact the O.T. office no later than May 1st to arrange for their interview in order to be considered for the next academic year.

The above regulations shall also apply to those students with university experience in addition to that required. Advanced standing may be granted, but students will be required to carry a full course load for the last three years of the B.Sc. O.T. program (minimum of 5 full courses). Each application will be examined on its own merits, taking into consideration academic standing in courses previously taken and the personal interview. The Department of Speech Pathology and Audiology will appraise the speech and hearing of newly admitted students each September.

*SPA 280/81 will be accepted as credit courses in the Faculty of Science. The Faculty of Education formerly accepted these courses for credit, but recent changes in first year curricula will alter this. Please consult a Faculty of Education advisor for up-to-date information regarding these SPA courses.

163.5 The Degree of Master of Science in Physical Therapy

(1) *Purpose of the Program:* To prepare physical therapists for leadership roles in academic, clinical, and laboratory settings by preparing them to undertake research to establish the effectiveness of various approaches to treatments used by physical therapists and by so doing, develop a strong scientific framework for the discipline of physical therapy.

The program has been designed in response to increased demands by academic and clinical institutions for therapists educated above the present baccalaureate level. It provides persons holding a baccalaureate degree in physical therapy with an opportunity for advanced study in their own field. The program at The University of Alberta offers advanced training in orthopaedics, sports therapy, therapeutic exercise and other Physical Therapy specialty areas.

(2) *Format of the Program.* The proposed program normally takes two years, but the time may vary according to the academic background of each student. The Faculty of Graduate Studies and Research requires that a minimum of one academic year (8 months) must be spent in residence for a Master of Science Degree. Thus, it may be possible to complete the program in less than two years, depending on the student's academic background.

During the first year of the program students are expected to select a pattern of courses in a particular area of interest which will enable them to bring their previous educational background in physical therapy and associated fields to an advanced level, to enable them later to engage in meaningful research within that area.

In order that students may design a program which fits their particular needs, the Department of Physical Therapy requires only one compulsory course — PTHER 500: Research Seminar.

At least six months prior to the oral defense of their thesis, students are required to pass a general competency examination in physical therapy. Normally, the examination takes place between the first and second year of the program. The examination, which may be oral or written, is under the direction of the Chairman of the Department of Physical Therapy or his designee, and the examination committee consists of members of the physical therapy teaching staff.

During the second year of the program, the student focuses on the development of research skills through appropriate course work in research methodology, directed study and activity with an in-depth exploration of his/her particular area of interest under faculty guidance.

Normally, the course requirements for the degree of Master of Science in Physical Therapy is four to six full courses, or their equivalent, at graduate level, in addition to the thesis. Students, in consultation with their advisor, will design a program of studies suitable to their particular needs and interests with course requirements being based on students' previous training and anticipated needs in their area of interest. Courses from other departments may be accepted as part of a student's total program. Some undergraduate course work may be contained in a student's program, providing that a minimum of four full graduate courses, or their equivalent, are also included. Credit for courses taken elsewhere may be granted Advanced Credit by the Dean of Graduate Studies and Research upon recommendation of the Department of Physical Therapy provided that the courses have not been counted towards a previous degree or program.

Each student will be required to complete a thesis based on independent investigation. The thesis will carry a weighting equivalent to at least 2 full graduate courses.

164.1 General Information

In the Faculty of Rehabilitation Medicine, all courses are restricted to students within the Department concerned, with the exception of those designated as follows:

(a) * open to all students

(b) ** open to other students with permission of the instructor.

Courses required of students in the Faculty of Rehabilitation Medicine are listed here.

Each course is designated by its computer abbreviation and by a number. Students should use this abbreviation and number when filling in their registration forms.

The course title is followed by the symbol "★" and a number indicating the course weighting used in computing the grade-point average. Usually a single-term course carries a weight of 3, a full-session course a weight of 6. The statement in parentheses refers to the number of hours required by the course each week. For single-term courses the term in which the course is offered is listed first. For full-session courses the time allotment is the same in both terms unless otherwise indicated. The next three figures, enclosed in parentheses, indicate the hours of instruction required by the course in a week. The format is as follows: the first position indicates lecture hours; the second position indicates seminar hours (s), demonstration (d), clinic (c), or lecture-lab (L); and the third position indicates laboratory hours. Courses not included in the computation of grade-point averages are marked "Credit".

THE APPEARANCE OF A COURSE DESCRIPTION IN THE FOLLOWING LIST DOES NOT CONSTITUTE ANY GUARANTEE THAT THE COURSE WILL ACTUALLY BE OFFERED IN THE FORTHCOMING SESSION. INFORMATION AS TO WHICH COURSES WILL BE OFFERED, THE NAMES OF THE INSTRUCTORS, AND ALL FURTHER DETAILS MUST BE SOUGHT FROM THE DEPARTMENT CONCERNED.

171.2 Renseignements Généraux

171.2.1 NOTE HISTORIQUE ET BUTS

Le Collège Saint-Jean a été fondé en 1908, l'année même où a été inaugurée la Faculté des Arts et des Sciences de l'Université de l'Alberta.

Les deux institutions ont le même âge mais ont évolué de façon très différente. Le Collège est devenu Collège Universitaire Saint-Jean, partie intégrante et secteur bilingue de l'Université de l'Alberta, 62 ans après sa fondation, le 27 novembre 1970. Le statut officiel de Faculté lui fut accordé en septembre 1977 et sa dénomination devient "Faculté Saint-Jean" en mai 1978.

La Faculté Saint-Jean, faculté bilingue de l'Université de l'Alberta, doit d'abord permettre aux étudiants francophones de poursuivre leurs études universitaires dans un milieu qui leur assure une culture et un progrès intellectuel d'inspiration française et ensuite permettre aux étudiants anglophones de bénéficier de ce milieu.

L'Université espère promouvoir ainsi la culture française en Alberta et permettre à un plus grand nombre d'étudiants de s'exprimer couramment dans les deux langues officielles du Canada.

La Faculté Saint-Jean se trouve à environ 6 kilomètres à l'est du campus ouest. Les étudiants peuvent cependant suivre des cours à la fois à la Faculté Saint-Jean et dans d'autres facultés de l'Université grâce à un service de minibus gratuit entre les deux campus (toutes les heures).

171.2.2 SERVICES

(1) *Bibliothèque*

La Faculté met à la disposition de ses professeurs et de ses étudiants une riche bibliothèque, contenant des oeuvres dans les deux langues. C'est une bibliothèque de consultation et de prêt. Tous les étudiants ont également accès aux bibliothèques de l'Université de l'Alberta.

(2) *Centre de Documentation Pédagogique*

Pour les étudiants et professeurs en pédagogie, la Faculté offre également un service de prêt et de consultation par l'entremise du Centre de Documentation Pédagogique (matériel en français uniquement).

(3) *Service d'Orientation*

La Faculté met à la disposition des étudiants un Service d'Orientation spécialisé. Le service offre à tous les étudiants une aide personnelle gratuite dans les domaines suivants:

(a) une orientation académique sur le choix de sujets appropriés en vue de l'obtention d'un titre universitaire;
(b) des tests, des entrevues, etc.;
(c) une consultation psychologique et personnelle.

(4) *Résidences*

Les résidences sont concues et organisées comme un service qui complète l'expérience éducative offerte par la Faculté Saint-Jean. Les étudiants qui demandent à être admis en résidence s'engagent à en accepter les règles, c.à.d. à vivre dans un milieu francophone, à étudier sérieusement, et à faire preuve d'esprit communautaire. 171.2 General Information

171.2.1 HISTORICAL NOTE AND AIMS

Collège Saint-Jean was founded in 1908, the same year as the inauguration of the Faculty of Arts and Sciences of The University of Alberta.

Though of the same age, the two institutions have evolved in very differing fashion. The Collège became Collège Universitaire Saint-Jean, an integral part and a bilingual sector of the University of Alberta, 62 years later on November 27, 1970. Official Faculty status was granted in September 1977, and the name changed to Faculté Saint-Jean in May 1978.

The goal of the Faculté must be, firstly, as the bilingual faculty, to allow students of French background to pursue their university studies in a French environment and, secondly, to allow students of English background to benefit by this environment.

The University thus hopes to foster French culture in Alberta and to allow more students to master the two official languages of Canada.

Faculté Saint-Jean is located at 8406 — 91 St. (about 3 kilometres east of the main University campus). This does not preclude the possibility of students following courses at Faculté Saint-Jean and in another faculty of the University, since a free mini-bus service is provided hourly between the two campuses.

171.2.2 SERVICES

(1) *Library Facilities*

The Faculté makes available to its professors and to its students a library which is well stocked with books in both languages intended for lending or consultation on the premises. All University students also have access to the libraries of The University of Alberta.

(2) *Centre de Documentation Pédagogique*

The Faculté also offers to education students and professors the services of the "Centre de Documentation Pédagogique" for consultation and loan of its French language materials.

(3) *Counselling*

The Faculté provides students with a specialized Counselling Service through which one can receive academic information or discuss more personal matters. Assistance is available in the following areas:

(a) academic guidance in choosing the appropriate subjects to obtain a university degree or certificate;
(b) tests, interviews, etc.;
(c) counselling.

(4) *Residences*

The residences are a service which complement the educational experience offered by the Faculté Students who ask for admission to residence comm themselves to the active pursuit of the goals of th residence, namely, to live in a French environment, t study seriously and to live in a community. 1. Règlements généraux de l'Université de l'Alberta:

L'anglais est la langue d'enseignement principale dans toutes les facultés sauf à la Faculté Saint-Jean, où la langue d'enseignement principale est le français. Par conséquent, tous les candidats qui demandent l'admission à des facultés autres que la Faculté Saint-Jean doivent posséder une connaissance adéquate de l'anglais oral et écrit pour être admis à l'Université de l'Alberta. Aucune considération ne sera donnée au pays d'origine ni au statut de citoyenneté. Cette compétence pourra être démontrée de différentes manières:

(1) soit par la réussite de trois années d'études à temps plein dans une institution secondaire canadienne de langue anglaise;
(2) soit par la réussite d'une année de cours ou plus, incluant un cours complet d'introduction à la littérature anglaise dans une institution post-secondaire accréditée où la langue d'enseignement est l'anglais, et pour lesquels l'Université de l'Alberta peut donner des crédits;
(3) soit par la réussite de l'équivalent de trois années d'études à temps plein dans une école/institution en dehors du Canada, où les cours sont enseignés par des professeurs de langue anglaise accrédités par "The International Institute of Education" et reconnus par l'Université de l'Alberta;
(4) soit par la réussite de l'équivalent de trois années d'études à temps plein dans une école canadienne où la langue principale d'enseignement est autre que l'anglais, mais où le niveau de compétence en anglais est l'équivalent de celui exigé pour l'obtention du diplôme dans les écoles de langue anglaise reconnues par le Département provincial d'Education, ou,

172.1.2 ENGLISH LANGUAGE PROFICIENCY FOR ADMISSION

1. General University requirements:

English is the primary language of instruction in all faculties except Faculté Saint-Jean, where French is the primary language. Therefore, all applicants to undergraduate faculties other than Faculté Saint-Jean must possess an adequate knowledge of written and spoken English as a prerequisite to admission. Regardless of country of origin or of citizenship status, applicants will be required to demonstrate proficiency in the English language. This demonstration may take any one of several forms:

(1) successful completion of the equivalent of three years of full-time instruction in an English language secondary institution in Canada;
(2) presentation of a successfully completed full-year or more of course work, including a full introductory course in English, in an accredited post-secondary institution where English is the language of instruction and from which advance credit is normally allowed by The University of Alberta;
(3) successful completion of the equivalent of three years of full-time instruction in a school-institution outside of Canada where academic subjects are taught by "English Language" instructors, and accredited by the International Institute of Education (I.I.E.) or as recognized by the University of Alberta.
(4) successful completion of the equivalent of three years of full-time instruction in a school in Canada in which the major language of instruction is other than English but where the level of English proficiency required for graduation is equivalent to that in English language schools, as recognized by a provincial Department of Education, or
(5) presentation of results of the English as a Foreign Language (TOEFL) or its equivalent in other approved standard tests.

Applicants presenting a TOEFL score of 600 (or its equivalent in other approved standard tests) will be considered as having demonstrated English language proficiency.

Having been designated as an official test centre the University of Alberta is able to offer a series of TOEFL test administrations throughout the year. Six Special and six International examinations are held each year. Further information and application forms may be obtained from the Examinations and Timetabling Division, Office of the Registrar, Rm. 123, Administration Building, University of Alberta.

2. Faculté Saint-Jean requirements:

Candidates for admission to Faculté Saint-Jean are not required to demonstrate proficiency in the English language as a prerequisite for admission. However, those candidates who are admitted to Faculté Saint-Jean and who have not demonstrated proficiency in English (as defined by the General University Requirements above) will be required to meet the following conditions:

(a) la réussite d'au moins un cours non-accrédité d' "Anglais langue seconde" durant la première année d'études; et

(b) la réussite de trois cours dont la langue d'enseignement est l'anglais, avant l'obtention de leur diplôme. Les nouveaux étudiants commencant leur troisième année de Baccalauréat en Education ne devront réussir qu'un et demi de ces trois cours. Il est également déconseillé aux étudiants faibles en anglais de s'inscrire à un cours de littérature anglaise avant d'avoir réussi le cours obligatoire d'Anglais langue seconde.

En dépit des conditions mentionnées ci-dessus, les étudiants qui obtiendront un total entre 500 et 599 au test du TOEFL ou à son équivalent seront exemptés du cours "d'Anglais langue seconde". De plus amples renseignements concernant ces conditions peuvent être obtenus du Responsable des Admissions à la Faculté Saint-Jean.

172.1.3 DÉFICIENCES LORS DE L'ADMISSION

Un candidat, faisant preuve d'insuffisance dans l'une des matières requises par la Faculté Saint-Jean, a la possibilité de pallier à cette insuffisance en suivant des cours normalement numérotés 100. La décision d'accepter ou non le cours en vue d'un crédit pour l'obtention du diplôme dépend du Doyen et de la nature de l'insuffisance. Un candidat présentant des insuffisances dans plusieurs matières ne pourra être admis.

172.1.4 ADULTES NE RÉPONDANT PAS AUX CONDITIONS D'ADMISSION

Les candidats adultes, âgés de 21 ans ou plus, qui ne répondent pas aux conditions d'admission officielles, peuvent solliciter une permission spéciale pour obtenir un diplôme à la Faculté Saint-Jean. Chaque demande sera prise en considération par le Doyen de la Faculté. Les candidats doivent être résidents de l'Alberta, du Yukon, ou des Territoires du Nord-Ouest et être citoyens canadiens ou immigrants reçus. Les candidats intéressés sont invités à soumettre un formulaire de demande au Bureau des inscriptions avant le 6 juin, et ils devront normalement prendre rendez-vous pour une entrevue avec le Service d'orientation des étudiants (Students Counselling Services). Tous les candidats adultes ne répondant pas aux conditions d'admission et souhaitant être admis doivent avoir suivi au moins un cours de Français 30, Français 31, ou Langue et Littérature 30, ou bien faire preuve d'un niveau de compétence équivalent dans la langue française. En outre, les candidats au programme de B.Sc. devront faire preuve d'une préparation adéquate en mathématiques et en sciences.

172.1.5 ADMISSION DES ETUDIANTS D'UNE AUTRE PROVINCE

Les étudiants d'une autre province canadienne dont le travail accompli correspond aux niveaux indiqués ci-dessous sont susceptibles d'être admis à la Faculté Saint-Jean, à condition qu'ils aient satisfait aux exigences des programmes choisis.

Ontario — Diplôme de treizième année.

Terre-Neuve — Réussite d'une année d'études de l'Université Memorial.

(a) the successful completion of at least one non-credit English as a second language course, during the first year of study; and

(b) the completion of three courses which have English as the language of instruction, prior to the completion of their degree. New students entering third year of the Bachelor of Education program will be required to complete only one and one-half such courses. It is also strongly recommended that students lacking proficiency in English should not enrol in an English Literature course until completion of the English as a second language requirement. Notwithstanding the above, the English as a second language requirement may be waived for students who have obtained a score between 500 and 599 on the TOEFL, or its equivalent. Further information on these language requirements is available from the Director of Admissions at Faculté Saint-Jean.

172.1.3 MATRICULATION DEFICIENCY

Courses (usually numbered 100) at the Grade XII level are offered at the University for students who are beginning their study of a particular subject. A matriculant, deficient in *one* of the subjects required by Faculté Saint-Jean excepting French 30 or equivalent may be admitted to make up the deficiency. The decision as to whether or not the course will be accepted for degree credit rests with the Dean and depends on the nature of deficiency. A matriculant with more than one such deficiency is not eligible for admission.

172.1.4 NON-MATRICULATED ADULTS

Adult applicants twenty-one years and over who lack formal matriculation may seek special permission for a degree at Faculté Saint-Jean. Each application will be considered on its own merits by the Dean of the Faculty. Applicants must be residents of Alberta, the Yukon or the North West Territories who are Canadian citizens or permanent residents. Interested applicants should submit an application form to the Registrar's Office before June 6 and will normally be required to arrange an interview with Students Counselling Services. As a minimum, all candidates for non-matriculated adult admissions should present either French 30, French 31, Langue et Littérature 30 or demonstrate an equivalent level of competence in the French language. In addition, applicants for the B.Sc. program should provide evidence of adequate preparation in Mathematics and Sciences.

172.1.5 ADMISSION FROM ANOTHER PROVINCE

A student from another Canadian province who has successfully completed work at the standards shown below will be considered for admission to Faculté Saint-Jean provided they present subjects equivalent to the requirements of the appropriate programs.

Ontario — Grade XIII graduation.

Newfoundland — Successful completion of one year at Memorial University.

Quebec — Successful completion of the first year of the C.E.G.E.P. academic program with satisfactory performance in appropriate subjects.

Other provinces — Grade XII graduation.

172.1.8 APPELS ET GRIEFS

On encourage les étudiants à présenter leur griefs à leurs professeurs ou au Doyen. Si l'étudiant (e) n'obtient pas satisfaction, il/elle pourra faire appel auprès du Président du Comité d'Appel du Conseil Académique de la Faculté pour que celui-ci entende sa requête. 172.2 Inscriptions

172.2.1 RENSEIGNEMENTS GÉNÉRAUX

Un étudiant inscrit à l'Université de l'Alberta dans une autre faculté peut suivre des cours à la Faculté Saint-Jean. Ces cours donnent des crédits équivalents à ceux obtenus dans des cours semblables suivis au campus ouest. Les candidats qui désirent suivre ces cours doivent en obtenir l'autorisation du Doyen de la Faculté Saint-Jean. Cette permission ne serait pas accordée à ceux qui ne désireraient suivre que Français 220.

Procédure d'Inscription. La procédure normale est indiquée au § 15 de l'Annuaire "University Regulations and Information for Students".

Changements d'Inscription. Les étudiants qui désirent changer leur inscription doivent en faire la demande au Bureau du Doyen de la Faculté. La date limite pour ces changements est indiquée au § 11.

Abandon de cours. Les dates limites pour se retirer d'un cours sont les suivantes: 12 février pour un cours complet; 12 novembre pour un demi-cours au 1er semestre; 1 mars pour un demi-cours au 2ième semestre.

Les étudiants qui désirent quitter la Faculté ou abandonner un cours doivent d'abord consulter un conseiller d'orientation pour remplir le formulaire approprié. Celui-ci sera ensuite présenté au Doyen pour approbation. Ceci doit se faire avant le 12 février pour un cours complet avant le 12 novembre pour un demi-cours au 1er semestre et avant le 1er mars pour un demi-cours au 2ième semestre.

172.1.7 APPLICATION FOR ADMISSION

Application procedure is explained in § 14 of the University Regulations and Information for Students Calendar.

No definite and final ruling concerning admission can be given until all certificates and transcription of standing have been reviewed. The Faculté consults with and advises students regarding programs of study, but all decisions are unofficial and tentative until documents have been received and evaluated.

172.1.8 APPEALS AND GRIEVANCES

Students are encouraged to bring grievances and problems to members of the Faculté or to the Dean of the Faculté. If students do not obtain satisfaction, they may direct an appeal to the Chairman of the Faculté academic Appeals Committee, who shall establish a hearing. If the Faculté Academic Appeals Committee should not satisfy the student or the respondent, the decision may be appealed to the General Faculties Council Academic Appeals Committee. (See 16.7 of the University Regulations and Information for Students Calendar.)

obtenir son diplôme de la Faculté. (Dans certaines circonstances et avec l'autorisation du Doyen, des équivalences pourraient être acceptées.)

(4) TOUT étudiant inscrit à la Faculté Saint-Jean devra suivre FRANC 322 pour obtenir son diplôme de la Faculté.

NOTE: Ces règlements (2) (3) seront en vigueur à compter de septembre 1979. Les étudiants déjà inscrits à la Faculté seront régis par les anciens règlements mais pourront s'ils le désirent, se soumettre aux conditions énoncées ci-dessus.

(5) *Examen de Compétence Linguistique*

Tout étudiant inscrit depuis juillet 1976 à un diplôme offert par cette faculté, *devra* répondre aux exigences du Conseil des Examinateurs en ce qui concerne la compétence orale et écrite en français et en anglais. L'étudiant a la responsabilité de s'inscrire aux examens COM A et COM F.

Le relevé de notes des étudiants indiquera soit les résultats obtenus dans ces examens soit la note "échec" s'ils ne s'y sont pas présentés. La Faculté Saint-Jean offre un Certificat de Bilinguisme à ses diplômés qui auront obtenu une note de 6 ou plus dans l'examen de COM A et COM F. Ce certificat portera la mention "avec distinction" si l'étudiant obtient une note de 8 ou plus dans les deux examens.

Pour plus de renseignements contacter l'administrateur de l'examen de compétence linguistique — Faculté Saint-Jean.

(6) *Test de Classement en francais à la Faculté Saint-Jean*

Depuis le mois de septembre 1975, un test de classement est donné à tout étudiant d'une des catégories suivantes:

Catégorie I. Tout étudiant inscrit à la Faculté pour la première fois.

Catégorie II. Tout étudiant inscrit au FRANC 220/221 à Saint-Jean en 1978-79 mais qui aurait ensuite suivi un cours ou un programme d'été en français.

Catégorie III. Tout étudiant ayant déjà été inscrit dans un cours de français mais qui n'était pas inscrit dans cette Faculté en 1978-79.

Ce test de classement fait partie de l'effort continu, de la part de cette Faculté, d'améliorer l'efficacité des cours de français en permettant aux professeurs de mieux placer l'étudiant dans le cours pour lequel il est le plus qualifié et/ou qui répond le mieux à ses besoins particuliers.

Le test se compose de trois parties: *Compréhension orale, Lecture et Composition.* Les directives se donnent en anglais mais toutes les questions sont en français. On ne vous demandera pas de traduire. Les tests de Compréhension orale et de Lecture sont du type "choix multiple" tandis que pour le test de Composition, on vous demandera de remplir des cases de récrire des phrases, de combiner deux phrases en une seule et d'écrire ou de récrire un bref paragraphe.

Il n'y a aucun moyen de se préparer pour ce genre de test et il ne sert à rien de "potasser".

Il vous faudra environ deux heures pour effectuer les trois tests. Ceux-ci seront offerts *UNE SEULE FOIS, LE MARDI, 1 SEPTEMBRE, à 8H30.* Le numéro de la salle de classe où les tests seront offerts sera affiché au tableau d'information des étudiants dans le couloir central.

(7) *Exclusion de l'examen final.* Un étudiant peut se voir refuser la permission de passer l'examen final dans un cours, avec le consentement du Doyen, dans les circonstances suivantes:

(4) To obtain a degree from Faculté Saint-Jean, each candidate must take FRANC 322.

NOTE: The above-mentioned requirements, (2) (3), will be effective September 1979. The previous requirements will be applied to students registered before July 1979. Nevertheless, these students may be allowed to meet the above requirements, if they so wish.

(5) *Examination in Linguistic Competence:*

Students registered after July 1976: To be granted a degree from this Faculty, each candidate must submit to examining professors Council's, requirements regarding linguistic competence, both oral and written, in French and English. It is the student's responsibility to register for the COM A and COM F examination. The student's official transcript will indicate either the results obtained in those examinations or a failure if they did not sit for the examination. Faculté Saint-Jean offers a bilingual certificate to its graduates who will have obtained a grade of 6 or more on both COM A and COM F examinations. The certificate will indicate an honourable mention for those who have attained a grade 8 or more in both of the examinations.

For further information, please contact the administrator of the Linguistic Competence exam, Faculté Saint-Jean.

(6) *Placement Tests For French Courses Offered by Faculté Saint-Jean.*

A placement test in French will be given to all students who classify as follows:

Category I. Any student registering in this Faculty for the first time.

Category II. Any student who took FRANC 220/221 in 1978-1979 but who subsequently attended a summer session in French.

Category III. Any student previously enrolled in a French course at the 200 level but who was NOT enrolled at Saint-Jean in 1978-1979.

The placement test is being given as part of this Faculty's continuing effort to improve the efficiency of the various courses in French by allowing the staff to more judiciously place students in the specific course for which he/she is most qualified and/or which best meets his/her specific (remedial) needs.

The test has three separate parts: *Listening, Reading* and *Writing.* Directions are given in English but all of the questions are in French. You will not be asked to do any translation. Both Listening and Reading Tests are of the "multiple choice" type, while for the Writing Test, you will be asked to fill in blanks, rewrite sentences, combine two sentences into one and write or rewrite a short paragraph.

You cannot study for this type of test and last-minute "cramming" in vocabulary, grammar, etc. probably will not help you.

The tests require approximately two hours to complete. They will be administered *ONLY ONCE TUESDAY, SEPTEMBER 1, 8:30 a.m.* The number of the room in which the test will be administered will be posted on the student bulletin-board in the main hall way.

(7) *Debarment from final examination.* A student may be refused permission to write the final examination in a course, with the concurrence of the Dean, in the following circumstances:

(i) l'étudiant n'a pas remis un grand nombre des travaux écrits qui constituaient une partie importante du cours,
(ii) l'étudiant a manqué un trop grand nombre de laboratoires dans un cours de sciences.

(8) La note finale de chaque cours tient compte non seulement de l'examen final, mais aussi de l'ensemble des examens, des devoirs et des travaux faits au cours de l'année.

(i) The student has neglected to do a substantial proportion of the written assignments in a course of which these are an essential feature;
(ii) The student has neglected to do a substantial portion of the laboratory work in a science course.

(8) The final grade assigned in each course shall be determined not only by the final examination, but also by all examinations and assignments completed throughout the year.

Le B.A. spécial comporte une série de 20 cours qui sont normalement suivis sur une période de 4 ans. Deux choix importants sont exigés: une matière principale au choix dans le domaine des Beaux-Arts, Humanités, Sciences sociales ou Mathématiques, et une matière secondaire dans les Arts ou les Sciences.

Si l'étudiant a satisfait aux conditions énoncées sous (a) avant le début de la dernière année, il peut solliciter auprès du Doyen l'autorisation de suivre un ou plusieurs de ses cinq derniers cours dans une autre université.

(4) Exigences académiques:

Pour obtenir un B.A. spécial, un étudiant doit recevoir une note de 4 ou davantage dans au moins 19 (dix-neuf) cours, un minimum de 3 dans le vingtième cours (à condition qui celui-ci ne soit pas un cours faisant partie de l'une des deux matières principales) et une moyenne générale d'au moins 5.0 dans les dix derniers cours du programme. S'il n'obtient pas cette moyenne, il doit quitter la Faculté Saint-Jean; il pourra y être réadmis plus tard s'il a atteint le niveau voulu dans une autre Faculté.

Il y a des variantes parmi les règlements des différents programmes. Les règlements de la Faculté Saint-Jean sont les mêmes que ceux des Facultés des partments to students selecting courses in their subjects of concentration.

173.5 Options

Le terme "option", désigne le cours qu'un étudiant peut choisir librement s'il a les prérequis voulus. "Approved option" est une option approuvée par le département qui dirige le programme de l'étudiant en question.

174 DETAIL DES COURS

174.1 Renseignements Généraux

La langue d'enseignement (le français ou l'anglais) est donnée par la description du cours. Ainsi, par exemple, GEOGE 230 (Géographie 230) est décrit en français parce que le français est la langue d'enseignement en Géographie 230, tandis que ANGL 200 (Anglais 200) est décrit en anglais parce que ce cours est enseigné en anglais.

Le numéro de chaque cours est précédé d'un sigle qui identifie la matière. Les étudiants doivent se servir de cette abréviation et de ce numéro lorsqu'ils complètent les formulaires d'inscription.

Tous les numéros de 100 à 199 indiquent les cours préparatoires et correspondent généralement à ceux de l'école secondaire. Les numéros 200 à 299 concernent les étudiants de première année. Ceux qui sont répertoriés de 300 à 499 représentent des cours "senior" et s'adressent aux étudiants qui ont terminé leur première année. Les cours répertoriés 500 et au-dessus sont réservés aux étudiants "senior" et à ceux qui poursuivent des études supérieures.

Après le titre du cours, le signe "★" indique la valeur de ce cours et le chiffre sert à l'ordinateur pour calculer le résultat final. Un cours donné pendant une année académique a une valeur de 6 points. Un demi-cours correspond à 3 points. Certains cours qui exigent un travail de recherche peuvent avoir une valeur différente qui dépend de la durée et des difficultés de la recherche.

Les trois sigles placés entre parenthèses, présentent le nombre d'heures de cours par semaine. Le premier sigle indique les heures de cours; le deuxième sigle représente les heures de séminaire (s), démonstration (d), clinique (c) ou cours de laboratoire (); le troisième sigle indique le nombre d'heures de laboratoire, combiné avec un cours. L'expression 3/2" signifie trois heures de classe une semaine sur deux. Le nombre d'heures d'un cours est le même pendant les deux semestres sauf indication contraire. Pour un demi-cours, le semestre pendant lequel il est donné est indiqué avant le nombre d'heures de cours.

Demi-cours. Certains cours ne se donnent que pendant un semestre; deux de ces cours sont considérés comme un cours complet. S'il s'agit d'une option, deux demi-cours différents pourront être associés pour remplir les conditions nécessaires.

Cours à inscriptions limitées: Dans certains cours, l'effectif des classes doit être réduit pour des raisons académiques. Ces cours figureront dans l'horaire sous le titre "cours à inscriptions limitées". Si le nombre d'inscriptions pour un tel cours est trop grand, les étudiants dont le programme n'exige pas le dit cours devront annuler leur inscription.

173.5 Options

The term "option", where it appears in the programs, means a course freely chosen by students provided they have the necessary prerequisite. An "approved option" is an option approved by the department directing the program of the student concerned.

174 DETAILS OF COURSES

174.1 General Information

The language (French or English) used in describing the course indicates the language of instruction. For example, GEOGE 230 (Géographie 230) is described in French because it is taught in French, whereas ANGL 200 (English 200) is described in English, because it is taught in English.

Each course is designated by its computer abbreviation and a number. Students could use this abbreviation and number when filling in their registration forms.

Courses numbered 100 to 199 are introductory, usually equivalent to high school courses. Those numbered 200 to 299 are junior courses, normally taken by first-year undergraduates. Those numbered 300 to 499 are senior courses, normally taken after the first year. Courses numbered 500 and up are normally restricted to senior and graduate students.

Following the title of the course is the symbol "★" standing for "course weight", and a number indicating the weight of the course as used in computing grade-point averages. An ordinary full-session course is weighted 6. A single-term course is normally weighted 3. Some courses involving research may vary in weight according to the length and difficulty of the research project.

The next three figures, enclosed in parentheses, indicate the hours of instruction required by the course in a week. The format is as follows: the first position indicates lecture hours; the second position indicates seminar hours (s), demonstration (d), clinic (c), or lecture-lab (L); and the third position indicates laboratory hours. The expression "3/2" means three hours of instruction every second week. The hours of instruction for a full-session course are the same in both terms unless otherwise indicated. If the course is a single-term course, the term in which it may be offered is mentioned before the hours of instruction.

Single-term courses. A number of courses are offered in one term only; two such courses are recognized as the equivalent of one full-session course. Where the curriculum requires a full-session course in a particular subject or classification, both single-term courses must be chosen from that subject or classification; where the requirement is for an option, any two single-term courses may be combined to meet the requirement.

Restricted Enrolment Courses: Classes in some courses must for academic reasons be restricted in size. Such courses will be labelled "restricted enrolment" courses in the timetable. If such a course is found to be oversubsribed, students whose programs do not require that course may be required to delete it from their registration.

LE FAIT QUE LA DESCRIPTION D'UN COURS FIGURE DANS CET ANNUAIRE N'IMPLIQUE PAS NECESSAIREMENT QUE CE COURS SERA EFFECTIVEMENT DONNE PENDANT LA SESSION ACADEMIQUE A VENIR. TOUTE INFORMATION RELATIVE AUX COURS QUI SERONT DONNES, AUX NOMS DES PROFESSEURS QUI LES ASSURERONT, OU A TOUT AUTRE DETAIL, SERA FOURNIE PAR LE BUREAU DU DOYEN DE LA FACULTÉ.

THE APPEARANCE OF A COURSE DESCRIPTION, IN THE FOLLOWING LIST DOES NOT CONSTITUTE ANY GUARANTEE THAT THE COURSE WILL ACTUALLY BE OFFERED IN THE FORTHCOMING SESSION. INFORMATION AS TO WHICH COURSES WILL BE OFFERED, THE NAMES OF THE INSTRUCTORS, AND ALL FURTHER DETAILS MUST BE SOUGHT FROM THE DEAN'S OFFICE.

182 FACULTY REGULATIONS

182.1 Admission

The admission requirements of the Faculty of Science will be found in § § 13.1 and 13.18 of the University Regulations and Information for Students Calendar.

To enter the Faculty of Science a student must complete five courses at the Grade XII level. These must include English 30, Mathematics 30, at least two of the following four sciences, Biology 30, Chemistry 30, Mathematics 31 and Physics 30, and a fifth 30-level course which should preferably be one of the aforementioned sciences or possibly a second language, e.g., French or German, or Social Studies or Social Sciences.

182.2 General Information

The Faculty of Science is, with the Faculty of Arts, the oldest established faculty at The University of Alberta, instruction in Arts and Science having begun in 1908. It offers instruction in the Biological Sciences (Botany, Genetics, Microbiology, Zoology), Chemistry, Computing Science, Geography, Geology, Linguistics, Mathematics, Physics and Psychology.

The Faculty offers three main types of programs leading to the degree of B.Sc.: four-year Honors programs; four-year Specialization programs and three-year General programs.

The four-year Honors programs are established primarily for students who seek careers in scientific research. They provide preparation for admission to graduate studies; to a Master of Science program or even in some cases to a Doctor of Philosophy program.

The three-year General program aims to provide general education with a scientific emphasis for students who seek careers in business, in teaching, in medicine and dentistry, etc.

The four-year Specialization programs aim to bridge the gap between the three-year program and the Honors program. They can provide the background necessary for admission to Graduate Studies in some cases, and in any event do permit the attainment of a professional status.

It should be noted that in many cases transfer from one program to another can be arranged easily to suit changing ambitions, needs, or academic qualifications of the student.

Regulations governing the Honors, Specialization, and General B.Sc. programs will be found in § 183.1, below, followed by descriptions of these programs arranged under subject headings in § § 183.2 to 183.21.

In addition, the Faculty of Science participates in an inter-disciplinary program in Food Science jointly with the Faculty of Agriculture and Forestry and the Faculty of Home Economics. This program is described in § 183.22. Two-year pre-Dental and pre-Medical programs may be taken in the Faculty, as described in § 183.27.

NOTE: Where approval or permission of the Dean of Science is required, this may be obtained from the Dean of the Faculty or one of the Associate Deans.

Specifically, the Honors and Specialization Programs require the following Science courses:

Biochemistry: Biology 30; Chemistry 30 and Physics 30.
Botany: Chemistry 30 and Biology 30; Physics 30 is recommended.
Chemistry: Chemistry 30 and Physics 30; Mathematics 31 is recommended.
Computing Science: Honors — Mathematics 31 and Physics 30.
Entomology: Biology 30, Chemistry 30 and Physics 30.
Genetics: Biology 30 and Chemistry 30.
Geography (Meteorology): Physics 30; Mathematics 31 is recommended.
Geography (Survey Science): Physics 30.
Geology: Chemistry 30 and Physics 30.

Linguistics: Biology 30; Physics 30 is recommended.
Mathematics: Physics 30; Mathematics 31 is recommended.
Microbiology: Biology 30 and Chemistry 30; Physics 30 is recommended.
Pharmacology: Biology 30, Chemistry 30 and Physics 30.
Physics: Physics 30 and Mathematics 31; Chemistry 30 is recommended.
Physiology: Biology 30, Chemistry 30 and Physics 30.
Zoology: Biology 30 and Chemistry 30; Physics 30 is recommended.

The minimal requirements to enter the Faculty of Science as outlined in Paragraph 2 above are sufficient to enter the Honors and Specialization programs in Geography (except Survey Science) and Psychology.

Students intending to enter the Pre-Medical and Pre-Dental programs must take Biology 30 and Chemistry 30. Physics 30 is highly recommended as the fifth subject.

English Language Proficiency:

(a) Applicants with TOEFL scores of 600 or more will be accepted unprovisionally into the Faculty of Science. Students will also be accepted unprovisionally if they have demonstrated proficiency in English in one of the other forms outlined in Section 14.3 of the University Regulations and Information for Students calendar. These students will not be required to take any E.L.P. courses offered by the Faculty of Extension.

(b) Students with TOEFL scores of 550 to 599 inclusive will be admitted as Probationary Students. These students will be required to complete successfully one or more remedial Faculty of Extension non-credit English language courses and may be required to register in less than a normal course load in their regular program until the English language deficiency has been corrected. The student will not be permitted to register in a further academic year until satisfactory command of the language of instruction has been demonstrated by attaining a TOEFL score of 600 (or its equivalent in other approved standard tests).

NOTE: This means that Probationary Students will not be permitted to register in a further academic year unless they have:

(i) completed successfully all the E.L.P. courses that they were required to take by the E.L.P. Office in the Faculty of Extension, and

(ii) achieved a TOEFL score of at least 600.

(c) Applicants with TOEFL scores lower than 550 will not be accepted into the Faculty of Science.

Having been designated as an official test centre, The University of Alberta is able to offer a series of TOEFL test administrations throughout the year. Six Special and six International examinations are held each year. Further information and application forms may be obtained from the Examinations and Timetabling Division, Office of the Registrar, Rm. 123, Administration Building, University of Alberta; or by writing direct to Educational Testing Service, Princeton, New Jersey, U.S.A., 08540.

Transfer from other Faculties in the University: Students from degree programs of other Faculties may transfer to the Faculty of Science by submitting a re-enrollment form to the Faculty of Science Office. Advanced credit will be given for completed course work which is applicable in the desired science program. If there are deficiencies in matriculation, these may have to be rectified. Credit will not normally be given for course work of a professional nature. Students contemplating a change in Faculty should consult the Office of the Dean of Science as soon as possible to obtain an analysis of their position.

182.2 Courses

(1) *Selection of courses.* Students registered in the Faculty of Science must select courses from those set out in the Arts and Science Calendar (§ § 44 and 184). In some instances, courses from other faculties may be permitted by the Dean.

(2) *Selection of first-year courses.* Students shall restrict their first-year registration to five full-session or equivalent junior courses (those numbered less than 300). Senior courses (those numbered 300 or higher) may be taken in the first year only with the consent of the department concerned and the approval of the Dean.

(3) *Single-term courses.* A number of courses are offered in one term only; two such courses are recognized as the equivalent of one full-session course. Where the curriculum requires a full-session course in a particular subject or classification, both single-term courses must be chosen from that subject or classification; where the requirement is for an option, any two single-term courses may be combined to meet the requirement, e.g., an Arts option in the same or different subjects.

(4) *Normal course load.* A full normal academic course load is 5 full-session courses or the equivalent during the winter session.

(5) *Withdrawal from courses.* The deadlines for withdrawing from courses or changing to "audit" status are as follows: from a full-session course, February 12; from a single-term course taken in the First Term, November 12; from a single-term course taken in the Second Term, March 1.

Courses from which the student withdraws up to and including the last day for registration in the first and second terms will not appear on the student's record. Courses from which the student withdraws after the last day of registration and up to and including the last day for dropping courses will appear with a grade of "W" (Withdrew with permission) on the transcript.

(6) Science courses are those included in the Science section of the Calendar and Arts courses are those included in the Arts section of the calendar.

(7) *Statistics Courses.* Students registered in the Faculty of Science wishing to study statistics would take courses listed in § 184.31. Courses in statistics offered by other Faculties may not normally be taken for degree credit in the Faculty of Science. Courses such as PSYCO 309 and CMPUT 321 and 322 are normally limited to students with programs in those areas.

182.3 Credit by Challenge

A student who may have carried on systematic studies which may be equatable to a junior course creditable in the Faculty of Science and who has been unable to obtain the equivalent advanced standing may obtain Credit by Challenge. Credit by Challenge may be obtained by application to the Office of the Dean of Science and the Department concerned which may require the student to write a regular final or supplemental examination covering the material of the course being challenged. The regular fee for a special supplemental examination will be levied in such case.

182.4 *Academic Standings and Graduation*

The following regulations apply throughout the Faculty of Science:

(1) Students who fail half or more of the courses in which they are registered, and those whose Quality Index (Q.I.) is 2.0 or less, are normally deemed to have an extremely unsatisfactory record (category C) and will be required to withdraw from the Faculty. The Quality Index is defined in § 42.5. (See § 16.4.5 of the University Regulations and Information for Students Calendar.) With respect to courses taken during the winter session just prior to compulsory withdrawal, credit will be granted only for those courses with grades of 5 and higher.

(2) No student will be considered for readmission to the Faculty of Science after a second extremely unsatisfactory year (category C).

(3) A student who is repeating a year after being required to withdraw will be required to take a full course load (five full-session courses or the equivalent) during the winter session and must pass all courses and obtain a grade-point average of at least 5.0 to be allowed to continue in the Faculty.

(4) A grade of 4 in a prerequisite course represents the minimum requirement for admission to a course with prerequisite requirement.

(5) First-class standing in a given year shall be awarded to any student who obtained a grade-point average of not less than 7.5 while enrolled in a full, normal academic load (five full-session courses or the equivalent) during the winter session.

(6) The notation "With Distinction" is inscribed on the permanent record and graduate parchment of a candidate for a General or Specialization degree if the candidate has obtained a grade-point average of at least 7.5 over the last ten full-session courses or the equivalent provided the student was enrolled in a full, normal academic load during the winter sessions of the last two years.

(7) Supplemental examinations may be granted by the Dean in cases where the weight assigned to the final examination is 40% or higher. A student may not write more than two supplemental examinations in any academic year, whether for the purpose of obtaining passing marks or of raising the grade-point average to the required level.

(8) The basis for scholarship consideration is passing grades in all courses in a five full-course load or equivalent during the winter session.

(9) All requirements for graduation at Spring convocation must be met by the end of winter session. Those completing degree requirements during Spring and Summer Sessions will graduate at the Fall convocation.

Further regulations regarding academic standing, promotion, and graduation vary from program to program within the Faculty of Science, and are therefore given in § 183 below. Regulations for Honors, Specialization and General programs will be found in § 183.1. Regulations for the inter-disciplinary program in Food Science will be found in § 183.22, and for Pre-Medical and Pre-Dental programs in § 183.27.

183 PROGRAMS OF STUDY

183.1 *The Degree of B.Sc. in the Honors, Specialization, and General Programs*

183.1.1 HONORS PROGRAMS

A minimum of twenty full-session courses or the equivalent, normally taken in four consecutive academic years, is required for the completion of the Honors program for the degree of B.Sc. with Honors. These programs are designed to provide specialization in the chosen subject or subjects together with a longer training than that in the general program, as well as the higher standard implied by the term "Honors".

Honors programs are available in the Departments of Biochemistry, Botany, Chemistry, Computing Science, Entomology, Genetics, Geography, Geology, Linguistics, Mathematics, Microbiology, Pharmacology, Physics, Physiology, Psychology and Zoology. Honors is the preferred program for students planning to pursue graduate study.

Admission. Permission to enter first-year Honors is granted to students with high matriculation standing and with the approval of the Dean of the Faculty and the department concerned. A request for this privilege should be made on the "Application for Admission" form.

Students need not commit themselves to Honors in the first year, and may register in an appropriate selection of courses as required by the regulations of a four-year program or of a General Program. If a sufficiently high standard is obtained in the first year, the student may enter Honors in the second year. A student desiring to do so must submit a re-enrolment form to the Office of the Dean of Science during the period between the end of the first year and the time of registration for a second year.

Consideration will also be given to applications for transfer to Honors submitted by students who have completed the second, or even third, year of another program.

Selection of courses. The following regulations govern Honors programs:

(1) In each year, an Honors student's program must be approved by an Honor's advisor in the student's Department and by the Dean.

(2) A minimum of 12 full-session courses or the equivalent in Science is required in all Honors programs. Certain Departments may require more than 12 full-session Science courses.

(3) A student must take at least three full-session Arts courses or the equivalent as part of the requirements for the Honors degree.

(4) Normally no more than seven full-session junior courses or the equivalent are permitted in Honors programs.

(5) Students in Honors programs must take at least five full-session courses or the equivalent during the winter session of each year of the program. Exceptions to this requirement must be approved by the Department and the Dean.

(6) Certain non-Arts and non-Science courses appropriate to the program may be permitted in Honors

programs with the approval of the Dean and the Department in which the student is taking the program.

Academic standings and graduation. The following regulations govern Honors programs:

(1) Promotion from first year to second year, as well as from second to third and from third to fourth, is by recommendation of the Department concerned, for which a grade-point average of at least 6.0 is required.

See description of Honors programs of individual Departments for additional requirements for remaining in and promotion in the Honors program.

(2) A student who fails to attain the standard necessary for continuance in Honors must withdraw from the Honors program. In so doing the student may transfer to a Specialization program with the appropriate Department's approval or the General program in the Faculty of Science or a program in another Faculty.

(3) A student who is not recommended to continue in Honors at the end of the third year, or who fails to complete the requirements for a degree with Honors in the fourth year, may transfer to a Specialization program with Departmental approval or may be granted the General degree or the Specialization degree forthwith, provided that the courses taken and the standing attained are satisfactory.

(4) A student who, for any reason, is unable to return to university for the fourth year may apply for a General degree under the same conditions as one who has failed to meet the required standards.

(5) An Honors program may be interrupted only by special permission of the Department and the Dean.

(6) Degrees with Honors are awarded in two classes, First Class Honors and Honors. For First Class Honors, a grade-point average of at least 7.5 on all courses over the last two years is required. For Honors, a grade-point average of at least 6.0 in all years of the program is required. See description of Departmental Honors program for additional requirements for First Class Honors and Honors degrees.

(7) A student transferring to the Faculty of Science with advanced standing will be required to complete at least ten (normally the last ten) full-session courses or the equivalent at The University of Alberta.

(8) Students transferring to Honors from Specialization or General programs or other Faculties or Universities with credit for fewer than five full-session courses or a multiple thereof are allowed to make up the deficiency or deficiencies, i.e., one-half to four and one-half courses, before, during, or after taking the full program of courses in each of the winter sessions after entering the Honors program.

(9) Grades of 3 will not be considered for credit except under special circumstances in the fourth (final) year.

183.1.2 SPECIALIZATION PROGRAMS

Four-year programs, comprising a minimum of twenty full-session courses or the equivalent, are available providing education to a professional level and leading to the degree of B.Sc. with specialization in: Biochemistry, Botany, Chemistry, Computing Science, Entomology, Genetics, Geography, Geology, Linguistics, Mathematics, Microbiology, Pharmacology, Physics, Psychology and Zoology.

Selection of courses. The following regulations govern Specialization programs:

(1) In each year, a Specialization student's program must be approved by a Specialization advisor in the appropriate Department and by the Dean.

(2) A minimum of twelve full-session courses, or the equivalent, in Science is required in all Specialization programs. Certain Departments may require more than twelve full-session Science courses or the equivalent.

(3) A student must take at least three full-session Arts courses or the equivalent as part of the requirements for the Specialization degree.

(4) Normally no more than seven full-session junior courses or the equivalent are permitted in Specialization programs.

(5) Certain non-Arts and non-Science courses appropriate to the program may be permitted in Specialization programs with the approval of the Dean and the Department in which the student is taking the program.

Academic standings and graduation. The following regulations govern Specialization programs:

(1) For graduation, a program of at least twenty full-session courses or the equivalent must be completed with a grade-point average of at least 5.5 in all courses credited to the degree after the first year. In certain Departments, a grade of at least 6 is required for specified courses. The normal course load during each winter session is five full-session courses or the equivalent. The Dean and the Department may permit a student to proceed to a degree over a longer period of time than four years.

(2) A student who fails to attain the standard necessary for continuation in the Specialization program may be required (by the Department) to withdraw from that program. Re-instatement in the Specialization program may be possible. Consult a student adviser in the Department regarding minimal requirements for readmission.

(3) Grades of 3 will not be considered for credit except under special circumstances in the fourth (final) year.

(4) A student who is not recommended to continue in Specialization at the end of the third year or who fails to complete the requirements for a Specialization degree in the fourth year may be granted the General B.Sc. degree forthwith provided that the courses taken and the standing attained are satisfactory.

(5) B.Sc. Specialization degrees with Distinction are awarded when students achieve a grade-point average of 7.5 or higher over the last ten full-session courses or the equivalent provided the student was enrolled in a normal course load during the winter sessions of the last two years.

(6) A student transferring to the Faculty of Science with advanced standing will be required to complete at least ten (normally the last ten) full-session courses or the equivalent at The University of Alberta.

183.1.3 GENERAL PROGRAMS

General programs in the Faculty of Science are designed to enable the student to obtain a diversified education in more than one branch of study within the limits of a three-year program. The basic outline of the program is as follows:

First Year: Arts option; three Science courses; one option.

Second Year: An Arts course; three Science courses; one Arts or Science option.

Third Year: An Arts course; two Science courses; two Arts or Science options.

Selection of Courses: The following regulations govern General programs:

(1) In each year, a student's program must be approved by the Dean or his/her designee. Students in Pre-Dental and Pre-Medical programs must consult the Dean with respect to selection of courses in each year

of the program. Other General program students must consult either the Dean or an advisor in the Department representing the principal subject of concentration regarding selection of courses in each year of the program.

(2) To obtain a General B.Sc. degree a student must pass 15 full-session courses or the equivalent. Of these at least 8, and no more than 12 full-session courses or the equivalent must be Science courses, and at least 3, and no more than 7 full-session courses or the equivalent, must be Arts courses.

(3) Each student must take at least 4 and no more than 6 full-session courses or the equivalent, in the principal subject of concentration which must be one of the Sciences, and a minimum of 3 and a maximum of 4 full-session courses or the equivalent, in a second subject of concentration which must also be one of the Sciences. In each subject of concentration, no more than two full-session courses or the equivalent can be at the junior level.

(4) Normally no more than 7 full-session junior courses or the equivalent are permitted in the General program.

(5) Up to the equivalent of one full-session course approved by the Dean may be taken from Faculties other than Arts and Science. Such courses are considered as "approved options" and are not to be included either as part of the minimum of three full-session courses or the equivalent in Arts or in the minimum of eight full-session courses or the equivalent in Science. Under certain circumstances a student may be permitted by the Dean to take up to the equivalent of one additional full-session non-Arts and non-Science course in subjects closely related to those offered by the Faculty of Science, e.g., Animal Science, Plant Science and Soil Science.

Academic Standings and Graduation: The following regulations govern General programs:

(1) To obtain a B.Sc. General degree, a grade-point average of at least 5.5 must be attained on the last 10 full-session courses or the equivalent credited to the degree. Moreover, a grade-point average of at least 5.5 must be attained for all courses in the principal subject of concentration.

(2) A grade of 3 may be accepted as a passing grade in no more than one full course or two half courses and then only from among the last five full-session courses or the equivalent credited to the degree. Moreover, such credit may not be obtained in courses comprising the principal or second subject of concentration.

(3) The Dean may permit a student to proceed to a degree over a longer period than three years, or to meet the requirements in a shorter time by attending Spring and/or Summer Sessions or by taking extra courses during the Winter Session.

(4) B.Sc. General degrees with Distinction are awarded when students achieve a grade-point average of 7.5 or higher over the last 10 full-session courses or the equivalent, provided the student was enrolled in a normal academic load (five full-session courses or the equivalent) during the Winter Sessions of the last two years.

(5) A student transferring to the Faculty of Science with advanced standing will be required to complete at least 5 (normally the last 5) full-session courses or the equivalent at The University of Alberta.

Sections 183.2 and following contain advice offered by the various Science Departments to students selecting courses in their subjects of concentration. Further information may be obtained by consulting members of the Department concerned.

183.1.4 SPECIAL CERTIFICATES

Students who have received a B.Sc. degree and who meet the requirements for one of the Specialization Programs or for one of the Honors Programs by the addition of a minimum of five full courses or the equivalent will be awarded a Special Certificate to recognize the additional qualification. The specific requirements for this Certificate are determined for each student by the appropriate Department and the Dean.

183.1.5 THE B.SC. AFTER A PREVIOUS DEGREE

Requirements for B.Sc. after B.Ed. Holders of the B.Ed. degree, whose programs include thirteen Arts and Science courses, may qualify for the B.Sc. degree in the General Program by completing at least six full-session courses or the equivalent and attaining a grade-point average of 5.5 in these courses. Those with fewer than thirteen Arts and Science courses will be required to take additional courses.

Students proposing to obtain the General B.Sc. in this manner will be expected to select their courses in conformity with the requirements of the General program outlined in § 183.1.3. To receive the B.Sc. General degree, the student must complete at least ten full-session courses or the equivalent in the subjects of the Faculty of Science in the two degree programs. At least six of these full session courses must be senior ones. If a student holding a B.Ed. degree wishes to obtain an Honors or Specialization degree in the Faculty of Science, the student must complete at least eleven full-session courses or the equivalent and meet the requirements of the four-year program as specified by the Department in which the student is majoring. The student must complete at least fourteen full-session courses or the equivalent in the subjects of the Faculty of Science in the two degree programs.

Requirements for B.Sc. after B.A. Holders of the B.A. General degree may qualify for the B.Sc. General degree by completing at least nine full-session courses or the equivalent and attaining a grade-point average of at least 5.5 in these courses. Students proposing to obtain the General B.Sc. in this manner will be expected to select courses in conformity with the requirements of the General program outlined in § 183.1.3. To receive the B.Sc. General degree, the student must complete at least twelve full-session courses or the equivalent in the subjects of the Faculty of Science in the two degree programs. Students holding a B.A. General degree wishing to obtain an Honors or Specialization in the Faculty of Science must complete at least fourteen full-session courses or the equivalent and meet the requirements of the four-year program as specified by the Department in which the student is majoring. The student must complete at least fifteen full-session courses or the equivalent in the subjects of the Faculty of Science in the two degree programs.

Students wishing to obtain a B.Sc. after a four-year B.A. must consult the Dean.

Requirements for B.Sc. after Engineering or Commerce Degrees. The requirements are basically identical to those for a B.Sc. after B.Ed.

183.1.6 TRANSFERS BETWEEN PROGRAMS

A student may transfer from an Honors Program to either the corresponding Specialization Program or to the General Program, or from a Specialization Program to the General Program at any time, by submitting a re-enrollment form to the Faculty Office. Transfers from

the General Program to a Specialization Program or an Honors Program or from one Specialization Program to another or an Honors Program may be made in the same way, subject to deficiencies resulting from requirements of the new program. In addition, transfers to Honors and Specialization Programs require approval of the Department responsible for the new program.

183.1.7 OPTIONS

The term "option", where it appears in the programs, means a course chosen by the student from offerings by the Faculties of Arts and Science, provided he has the necessary prerequisites. An "approved option" in an Honors or Specialization program is an option approved by the Department directing the student's program. An "approved option" in the General program is a course approved by the Dean taken from Faculties other than Arts and Science.

183.1.8 APPEALS AND GRIEVANCES

A student seeking review of a decision affecting academic standing should consult the Dean. Appeals may be heard by the Council of the Faculty. If such appeal is unsuccessful, the student has the right of appeal to the G.F.C. Academic Appeals Committee. (See also § 16.7 of the University Regulations and Information for Students Calendar.)

Students are urged to consult with the Department of Biochemistry regarding the selection of options throughout the course of the program.

183.3 Biology

Students who choose Biology as a subject of concentration are advised to consult with the office of one of the departments of Botany, Entomology, Genetics, Microbiology, Zoology or the Dean of Science.

For a principal subject of concentration in Biology, the minimum requirement is four full-session courses from offerings titled Biology (except Biology 210), Botany, Entomology (except Entomology 209), Genetics, Microbiology, Physiology and Zoology. If the principal area of concentration includes two or more half-session courses titled other than Biology, at least two of these courses must be from the same department, e.g. Botany. In addition, at least two of the four full-session courses must be at the senior level.

For a second subject of concentration in Biology, the minimum requirement is three full-session courses from offerings titled as for the principal subject. If the second subject of concentration includes two or more half-session courses titled other than Biology, at least two of these courses must be from the same department, e.g Zoology. In addition, at least one of the three full-session courses must be at the senior level.

Students who take a principal or second subject of concentration in Biology cannot include any courses to meet the requirements that are from a department which is used for either a second or principal subject of concentration, e.g. Genetics courses cannot be used in a principal or second subject of concentration in Biology if the second or principal subject of concentration is in Genetics.

There are three groups of biology courses:

(a) The first group (Biology 130 and Biology 210) are courses without prerequisites. Biology 130 provides an advanced equivalent of Biology 30, and serves the same purpose, as a prerequisite to biology courses listed in other groups. Biology 210 is a course designed to give an insight into biological problems as they affect man. It may be paired with Entomology 209, to provide a full course in biology for students in any faculty who are not specializing or concentrating in a biological field. Biology 210 does not provide a prerequisite to further biology courses.

(b) The second group (Biology 296, 297, 298, 299, 301, 302) comprises the Introductory Biology Program (IBP), for students entering university with high school Biology 30, or its equivalent. The Introductory Biology Program permits study to be made of some or all of six major areas of biology. These are the varieties of living things and their evolution (Biology 296), the mechanisms of heredity (Biology 297), the relationships of organisms to their environments (Biology 298), the physiology of plants and animals (Biology 299), the structure and function of the cell (Biology 301), and the processes of development and growth (Biology 302). These courses provide, in their various combinations, entry to more advanced courses in Biology, Botany, Genetics, Microbiology, Zoology and courses of other faculties. Unless faculties lay down specific requirements within the IBP, the choice of subjects lies with the student; who may decide what areas to explore and what single-term courses should be taken to do this.

Students who intend to take Biology 301, should take Chemistry 250 as a prerequisite. It is strongly

recommended that Biology 301 precede Biology 302 (Developmental Biology).

Honors students in Botany and Zoology are required to complete all six single-term courses of the IBP. This should be done in the first two years at university.

Advice about the Introductory Biology Program may be obtained from the Introductory Biology Program office, the office of the Dean of Science, or the departmental offices of Botany, Genetics, Microbiology and Zoology. Students in Faculties other than Science should consult their advisers.

(c) The third group of Biology courses are those numbered 415, 420, 445, 507, 584, 585, 620. These are advanced courses in subjects of wide biological interest. All have prerequisites.

183.5.5 DIPLOMA AFTER A PREVIOUS DEGREE

Students who, after a period of professional employment, wish to update their qualifications may enroll in a special one-year program designed for this purpose. Those who possess at least the three-year general degree or its equivalent, and who complete satisfactorily an approved selection of five full courses, may be awarded a diploma which attests to this improvement in their qualification. All courses must be selected in consultation with the Department.

183.6 Computing Science

183.6.1 HONORS IN COMPUTING SCIENCE

The Honors Program is designed to provide a comprehensive education for students intending to pursue advanced degrees and a research or academic career. Students transferring into the Honors program normally require an average of at least 6.5 in the year of admission. An average grade of at least 6.0 must be maintained every year thereafter.

Each student must obtain departmental guidance in developing a coherent and well balanced program suited to his or her particular interests. All course selections and changes require approval by a departmental advisor. A first year Honors student normally enrolls in Computing Science 214/215, Mathematics 207/208, Mathematics 281/282, Physics 242 and English 210. The course requirements for the Honors Program are as follows:

Computing Science: a minimum of eight full-session courses (or equivalent), which must include Computing Science 214, 215, 316, 321, 322, 364, 365, 414 or 416, 418, 462, 464, and 472, and at least two courses at the 500 level.

The result of a comprehensive examination will weigh heavily in determining the class of degree conferred.

Students in the Honors program are encouraged to make contact with faculty and graduate students as soon as possible.

A grade-point average of 6.0 is required to enter the Honors program and to continue in the program.

183.8.2 SPECIALIZATION IN GENETICS

This program is intended to provide more flexibility than is available in the Honors program. Students must consult the Honors Committee as soon as possible each year before registration to plan their program to ensure that it will provide the qualifications they are seeking.

First and Second years: Approximately as in the program for Honors in Genetics.

Third and Fourth Years: At least five single-term courses in Genetics and at least five single-term courses or the equivalent in biological sciences and Biochemistry; one and a half Arts options; three and a half options.

183.8.3 CONCENTRATION IN GENETICS

Students planning to take Genetics as a subject of concentration are advised to consult the Department as early as possible regarding the choice of their courses. Students are advised to include Mathematics 240 and Statistics 241 or Mathematics 202 and 204 or 203 and 204, or 221 and 328, Chemistry 250, Biology 296, 298 and 299 and Biology 297 or Genetics 351 in the first two years of their program. These provide full opportunity to enter most of the courses offered.

A general program student with a three- or four-course concentration in Genetics can undertake graduate work only by spending a year as a special student after taking a B.Sc. An undergraduate in the general program who decides to do graduate work in Genetics should consult the Department for advice on the best combination of courses in the final years of the general program.

183.9 Geography

183.9.1 HONORS IN GEOGRAPHY

The Department of Geography offers both the B.A. and the B.Sc. degrees with Honors in Geography. Students wishing to stress the humanities and social sciences should register in the B.A. program; those who wish to stress the physical and biological sciences should register in the B.Sc. program.

An undergraduate may elect to read for Honors in Geography either at the beginning of the first year or after satisfactory completion of one or two years of the General B.A. or B.Sc. degree course. In any case the Chairman of the Department or the Department's Honors Advisors must be consulted first. The required grade-point average to enter and to continue in the Honors program is 6.5. Information on the departmental requirements that must be satisfied to achieve First Class Honors can be obtained from the Department of Geography.

NOTE: In the following course program, the term, "option" means either one full-session course or two single-term courses.

First Year: Any two of Geography 230, 231, 250 or 251; Statistics 241 or 255; two approved Science options; one approved Arts option.

The program must include one senior regional course in Geography. A list is available from the Department of Geography.

183.9.2 SPECIALIZATION IN GEOGRAPHY

The four-year specialized degree is designed for those students who do not desire the full training of an Honors degree, but who wish to specialize in some branch of Geography. It is also intended to provide an opportunity for considerable course work in a field closely related to the specialization within Geography. It is not normally viewed as a fit preparation for graduate work in Geography, though students with a four-year specialized degree *may* be admitted as Category B graduate students at The University of Alberta.

NOTE: In the following course program, the term course means either a full-session course or two single-term courses.

The program must include the following:

(i) A minimum of twelve courses in Science.

(ii) At least five and not more than eight courses in Geography.

(iii) Not more than two 200-level courses in Geography (the majority of the remaining Geography courses must be in Science).

(iv) A second subject of concentration. It may be taken in any department in the Faculties of Arts and of Science, including the Cartography and Meteorology offerings of the Department of Geography. It must contain at least four and not more than five courses.

183.10 Geology

Geologists are employed by companies engaged in exploration for and production of minerals and fuels; by government agencies such as the Alberta Research Council, Alberta Department of Energy and Natural Resources, Alberta Department of the Environment, Alberta Energy Resources Conservation Board and the Geological Survey of Canada; by companies engaged in the construction of major engineering projects; and by universities. They work in cities and in remote uninhabited regions, in the laboratory and in the office, and in the deserts and jungles of developing countries. Canada, a country dependent on its vast natural resources, requires the geologist's skills for the maintenance of the economy. A world facing crises in the supply of energy-giving fuels and metals will depend increasingly on the geologist for guidance in finding new

supplies. Mankind facing progressive deterioration of the environment requires the geologist's knowledge of the earth to maintain the quality of life.

183.10.1 HONORS IN GEOLOGY

The Honors program educates students in all the major geological sciences and is designed to prepare them for graduate work or a career in Geology immediately upon graduation. Required courses impart a substantive core of geological knowledge together with such background in other sciences as is required for the proper understanding of the subject. Some specialization is allowed, particularly in the fourth year. Except by special permission of the Department, students enrolled in the program should take the courses listed below, although not necessarily in the same order, and obtain a grade-point average of 6.5 calculated over the last two years. For First Class Honors an average of 7.5 is required.

First Year: Geology 202 and 203; Chemistry 202; Mathematics 202 or 203 and Mathematics 204; Physics 205 and 209; two single-term Arts courses (English recommended).

Third Year: Geology 409, 420, 421, 445, 446, 452, 460; Geophysics 327, 329; one or two approved options (Geology 430 and Arts course recommended).

Fourth Year: Geology 447, 507 and/or 508, 570, 580; five or six approved options (Geology 482, 523, 532, 547 and Arts course recommended).

183.10.2 HONORS IN GEOLOGY AND ZOOLOGY

The Honors program in Geology and Zoology is intended to prepare students, especially those with an interest in Paleontology, for either graduate work or a career in Geology or Zoology. Students should be prepared to follow the guidelines below, and are required to obtain a grade-point average of 6.5 calculated over the last two years. For First Class Honors, an average of 7.5 is required. In addition students are required to take an oral examination on stratigraphic and biological principles in the fall of the fourth year.

First Year: Biology 296, 297, 298, 299; Chemistry 200 or 250; Geology 202 and 203; two single-term Arts courses (English recommended).

Second Year: Geology 310, 320, 362; Zoology 304, 305, 352, 353; Mathematics 202; two single-term Arts courses (Anthropology 390 strongly recommended).

183.10.3 SPECIALIZATION IN GEOLOGY

The Specialization program educates students in most of the major geological sciences and prepares them for a career in Geology or, providing the requirements are met, graduate work. Required courses impart a core of geological knowledge together with such background in other sciences as is required for the proper understanding of the subject. A certain amount of specialization is allowed, particularly in the fourth year. Except by special permission of the Department, students enrolled in the program should take the courses listed below, although not necessarily in the same order. Students are encouraged to take six single-term courses in a subject of concentration other than Geology; a senior course in this subject may, under certain circumstances, be substituted for one of the required listed below.

First Year: Geology 202 and 203; Chemistry 200 or 202; Mathematics 202 or 203 and Mathematics 204; Physics 205 and 209 or Physics 242; two single-term Arts courses (English recommended).

183.10.4 CONCENTRATION IN GEOLOGY

Students in the three-year program who are interested in Geology may take the equivalent of three to six full-session courses in this subject. A three-year B.Sc. with a six-course concentration in Geology can serve as a preparation for a professional career if subsequently followed by a fourth year. Students enrolled in the three-year program may transfer to the four-year program at the end of the first, or, in most cases, at the end of the second or third years. Recommended Geology courses include 202 and 203 , 309, 310, 320, 330, 331, 362, 380, 409, 420, 421, 445, 446 and 460.

183.11 Geophysics

The Department of Physics offers two programs dealing with solid earth physics and space physics. The Honors in Geophysics program is designed to prepare students for careers in graduate work in geophysics and is described in § 183.17.3. The Specialization in Geophysics program is designed to prepare students with the conceptual and laboratory background required for employment at the B.Sc. level in industry, government and technical schools, and is described in § 183.17.6.

183.12 Linguistics

183.12.1 HONORS IN LINGUISTICS

The Department of Linguistics offers both the B.Sc. and B.A. degrees with Honors in Linguistics. Students wishing to emphasize the humanities should register for the B.A. The B.Sc. Honors in Linguistics emphasizes the scientific investigation of human language and requires, in addition to courses in Linguistics, supporting courses in related scientific fields.

First Year: There are no Honors program courses in Linguistics for first-year students. A student wishing to begin an Honors program in Linguistics should consult the Department well before the end of the first year. However, all students accepted into Honors Linguistics must pass the following courses or their equivalents: Biology 296 and 299; Mathematics 202 and 204; Psychology 260. In addition, Physics 205/209 or 212 is strongly recommended.

Honors students will arrange with their departmental supervisors for approved options in related fields, depending on the student's special interests. In addition, every Honors student must take two full courses in a language other than English. This requirement may be subsumed under the Arts options required by the Faculty of Science.

A GPA of 6.0 must be maintained to enter and continue in Honors in Linguistics and to graduate with Honors in Linguistics. A GPA of 7.5 on all courses taken in the last two years of the program must be achieved to graduate with First Class Honors in Linguistics.

183.12.2 SPECIALIZATION IN LINGUISTICS

This program is designed to give the student a broader background in Linguistics than the General Degree. If satisfactory standing is maintained, it should prepare the student for application to graduate school in Linguistics. The program consists of twenty full-session courses which should include the following, and should be arranged in consultation with the Department of Linguistics:

(1) at least five full-session courses in Linguistics, chosen in consultation with the Department;

(2) at least four full-session courses in a minor field of concentration, chosen in consultation with the Department;

The Department also offers a B.A. Honors in Mathematics (See § 43.15.1).

183.13.2 SPECIALIZATION IN MATHEMATICS

This program is intended for students who are interested in mathematics but do not want to take as many high level mathematics courses as is required in the honors program. With the proper choice of options it can lead to a wide variety of careers.

The program consists of twenty full-session courses, at least 8 of which must be courses offered by the Mathematics Department.

First Year: Mathematics 202/204, Mathematics 221/222, Computing Science 214/215, one Arts option, one option.

Third Year: Five options.

Fourth Year: Five options.

By the end of the second year, the student chooses an area of concentration, and that choice will govern many of the options in the program. For example, a student choosing to concentrate in traditional Applied

Mathematics must include upper level courses in Mathematics, Physics or Engineering. Among other possible concentrations are Actuarial Science, Economics, Computing Science, Statistics, and Education. A custom program can be designed for virtually any career interest. The student is advised to consult the Department as soon as possible regarding program recommendations.

Each program is subject to the requirements of the Faculty: at least 12 full-session courses in the Faculty of Science, at least 3 full-session courses in the Faculty of Arts, and no more than 7 junior (200 level) courses. For Faculty requirements see § 183.1.2.

The Department also offers a B.A. Specialization in Mathematics (see § 43.15.2).

NOTE: Mathematics 203 is equivalent to 202. The corresponding Honors course can be substituted for a course listed. For example, Mathematics 207 can be substituted for 202.

183.16 Pharmacology

183.16.1 HONORS IN PHARMACOLOGY

The program leading to the degree of B.Sc. with Honors in Pharmacology is offered by the Department of Pharmacology (Faculty of Medicine). The program is designed to prepare students for advanced study in Pharmacology or in a closely related scientific field, leading to an academic and/or a research career. However, because no courses in Pharmacology are offered until the students are in their third year of study, *all* students are required to register for "Specialization in Pharmacology" (§ 183.16.2) for the first three years of the program.

At the end of their third year, students with a G.P.A. of at least 6.5 in each of the first three years of the program may request a transfer to the Honors program, provided that the courses they have taken and the standing attained are satisfactory. However, a grade of at least 7 in each of the following required areas of concentration is required before the student will be given departmental approval to transfer to the Honors program:

Pharmacology 432; Pharmacology 435 and/or Pharmacology 436 and Physiology 410.

A student considering the Honors program must consult the Chairman of the Deparment of Pharmacology (or his/her designee) concerning his/her eligibility and the selection of course options throughout the program. Students in the Honors program must take at least five full-session courses during the winter session of each year of the program. Students wishing to emphasize the humanities and social sciences in their program should register for the B.A.; those who wish to emphasize the physical and biological sciences should register for the B.Sc. With either degree, the program is especially, but not exclusively, appropriate for students considering post graduate study, training, or research in Psychology. The Department requires that students have a 7.0 GPA from the immediately preceding year in order to enter the program, and maintain a 7.0 GPA each year in order to continue in the program. Students are not normally admitted to the first year of Honors in Psychology; they may not enter the program after the beginning of their third year.

Honors in Psychology requires a minimum of eight and a maximum of ten full-session courses (or equivalent) in Psychology including the following: Psychology 309 (prerequisite Mathematics 30 or 100) or, with consent of the Department, Statistics 255 or Computing Science 322; one Science course with laboratory; one Arts course; and the Honors Seminars 306 and 307 (or 301) and 406 and 407 (or 401). The Honors Seminars will ordinarily be taken in the second and third years of the student's residence in the Honors program at the University. An important feature of the Honors program is the opportunity for the student to engage in independent study and research. During the third year, students will complete a research apprenticeship and, during the fourth year, students will write an empirical Honors thesis (Pyschology 599), both with the guidance of a faculty member in the Department of Psychology. A minimum of five courses will be taken in related subjects. The courses in related subjects might be all in one field (e.g., Mathematics or Biology) or in several fields, depending on the student's special interest and relevance of the courses to the subject matter of Psychology.

In addition a minimum of five optional courses will be chosen; some of these will be integrated with the program in Psychology while others can be general options.

For the B.Sc. with Honors in Psychology, the student's program must include a minimum of twelve full-session courses (or the equivalent) from the Faculty of Science.

Honors students must have their program approved by a Department Advisor.

183.19.2 SPECIALIZATION IN PSYCHOLOGY

This program must include English 200 or 210. The equivalent of twenty full-session courses must be completed, of which a minimum (or the equivalent) of five and a maximum (or the equivalent) of eight full-session courses must be Psychology courses. The courses from Psychology must include:

The student's program must include a minimum of twelve full-session courses (or the equivalent) from the Faculty of Science. It is strongly recommended that supporting courses be selected from the following three general areas: Mathematics (Departments of Mathematics, Statistics, or Computing Science), Biology (or Physiology) and Philosophy.

Specialization students must have their program approved by a Department Advisor.

183.19.3 CONCENTRATION IN PSYCHOLOGY

The Department of Psychology offers courses leading to both B.A. and B.Sc. degrees. Students wishing to emphasize the humanities and social sciences in their programs should register for the B.A. and follow one of the sequences suggested in the Faculty of Arts section of this Calendar. Students wishing to emphasize the biological sciences should register for the B.Sc.

Students selecting Psychology as a principal subject of concentration should take: (a) Psychology 260, 261 and 309, (b) two of Psychology 362, 366 and 368, (c) one of Psychology 341, 353 and 383, (d) two full courses in Psychology listed in the Science section of the calendar and (e) a maximum of one full course in Psychology listed in either the Science or Arts sections of the calendar. Students selecting Psychology as a second subject of concentration should complete the requirements by taking courses listed under a, b and d above (three-course sequence) or those listed under a, b, d and e above (four-course sequence).

Students should consult the Department of Statistics and Applied Probability as soon as possible regarding the choice of their courses.

183.21.1 HONORS IN ZOOLOGY

The Honors Program in Zoology is intended primarily for students planning to continue into post-graduate study and a research or academic career. It also provides a comprehensive background in Zoology for those planning a teaching career in science with emphasis on biology, or for students interested generally in science.

The study of animals is wide-ranging and complex. At the molecular level, biological processes depend on the same phenomena that underlie chemistry, physics and the other natural sciences. Quantitative techniques in biology are rapidly being improved in the understanding of subcellular processes, the aggregation and differentiation of cells, the mechanics of complex organisms, the analysis of populations and ecosystems, and the ramifications of taxonomic relationships. Consequently, it is necessary that zoologists have a background in chemistry, physics and mathematics.

Normally, the Honors Program will be completed in four years. Special arrangements for extension of time must be made through the student's advisor and the Honors Students Committee of the Department of Zoology.

An overall Grade Point Average of 6.5 must be maintained each year in the Zoology Honors Program.

The Zoology Honors Program is comprised of the equivalent of 40 single-term courses. Ten of these shall be courses in Science, including one full year in each of Chemistry, Physics and Mathematics and/or Statistics; of the four remaining courses in Science, at least one shall be in a department other than Chemistry, Physics, Mathematics, Statistics and Applied Probability, or Zoology. Statistics 337 is recommended as one of the ten courses. Six shall be courses in the Introductory Biology Program (Biology 296, 297, 298, 299, 301, 302). Twelve shall be courses in Zoology, which should include Zoology 304, 305, 340 (or 441, or 442), 352, 353, 463, and 421. Six shall be courses in Arts, including the equivalent of two in English, French, or a foreign language. The remaining six shall be approved options for the student.

Honors route in Cell Biology and Physiology. The above section describes the main route to an Honors degree in Zoology. A second Honors route in Zoology is available with an emphasis on Cell Biology and Physiology. It requires the same six courses in Introductory Biology and six courses in Arts but it specifies ten Science courses to be taken: Chemistry 200 or 302, Chemistry 250 or 350, Mathematics 202 and 204, Physics 203/207 or 203/209 or Physics 205/207 or 205/209, Biochemistry 300. It requires ten single-term courses in Zoology or Biology as follows:

(a) Four shall be Zoology 352/353 and Zoology 325/340
or
Zoology 304/305 and Zoology 350/340;
(b) Three shall be chosen from Zoology 441/442, Zoology 411/412, Biology 445;
(c) Three additional courses from Zoology or Biology of which Zoology 421 and Zoology 462 or 463 are highly recommended.

The remaining eight courses may be taken in any department but must be approved as appropriate in the program.

Each student in the Zoology Honors Program has an assigned advisor, who is to be consulted whenever program decisions are taken. The program is flexible enough to fit individual requirements. A student may arrange with his/her advisor and the Honors Students Committee to substitute some courses in closely related fields (e.g., Biology, Marine Science, Paleontology, Physiology) for Zoology courses.

Students are required to take a comprehensive oral examination on animal biology and biological principles during their fourth year.

An effort is made to employ Honors students in biological research during the summer.

183.21.2 HONORS IN ZOOLOGY AND GEOLOGY

See "Honors in Geology and Zoology", § 183.10.2, above.

183.21.3 SPECIALIZATION IN ZOOLOGY

The Specialization Program in Zoology is intended for students who wish to pursue Zoology further than is possible in the General Degree Program. Students in this program are urged to develop a strong background in Chemistry, Physics and Mathematics. It is possible to proceed to post-graduate study from the Specialization Program, but the Honors Program provides a stronger foundation for that.

Normally, the Specialization Program will be completed in four years. Special arrangements for extension of time must be made through the student's advisor and the Specialization Students Committee of the Department of Zoology.

An overall Grade Point Average of 5.5 must be maintained each year in the Zoology Specialization Program.

The Specialization Program comprises the equivalent of 40 single-term courses. Of these, ten shall be courses in Zoology or Biology, including Zoology 325 (or Zoology 304 and 305) and 350 (or Zoology 352 and 353). Four shall be courses in the Introductory Biology Program (Biology 296, 297, 298, 299, 301, 302). Eight shall be single-term courses in Science, other than Zoology or Biology. These eight must include courses in at least four departments, including Chemistry. Statistics 337 is recommended as one of the eight courses. Six shall be courses in Arts, including the equivalent of two in English, French or a foreign language. The remaining twelve shall be approved options. Approved options may include Zoology, Science or Arts courses, or courses in other faculties with permission.

Each student in the Zoology Specialization Program has an assigned advisor, who is to be consulted whenever program decisions are taken. A student may arrange with his/her advisor and the Specialization Students Committee to substitute some courses in closely related fields (e.g., Biology, Marine Science, Paleontology, Physiology) for Zoology courses.

183.21.4 CONCENTRATION IN ZOOLOGY

Students intending Zoology as a subject of concentration in a three-year degree program should take Biology 30 and Chemistry 30 for matriculation.

Students lacking Biology 30 must register in Biology 130 in University. Students who have completed Biology 30 will take two of Biology 296, 297, 298, 299 in University. In first year, Chemistry 250 and Physics 203 and 207 or 209, or 205 and 207 or 209 should be taken.

A general program student usually can proceed to graduate work in Zoology only by spending a year as a special student after taking the B.Sc. If an undergraduate in the general program wants to do graduate work

in Zoology, the Chairman of the Department should be consulted for advice on the best combination of courses in the final years of the undergraduate program.

184 DETAILS OF COURSES

184.1 General Information

Courses open to students in the Faculty of Science are listed here in alphabetical order, whether they are offered by the Faculty of Science or by another faculty.

Each course is designated by its computer abbreviation and a number. Students should use this abbreviation and number when filling in their registration forms.

Courses numbered 100 to 199 are introductory, usually equivalent to high school courses. Those numbered 200 to 299 are junior courses, normally taken by first-year undergraduates. Those numbered 300 to 499 are senior courses, normally taken after the first year. Courses numbered 500 and up are normally restricted to honors and graduate students.

Following the title of the course is the symbol "★" standing for "course weight", and a number indicating the weight of the course as used in computing grade-point averages. A normal full-session course is weighted 6. A single-term course is weighted 3. Some honors and graduate courses involving research may vary in weight according to the length and difficulty of the project. Some courses are offered for credit only, and carry a weight of 0.

The next three figures, enclosed in parentheses, indicate the hours of instruction required by the course in a week. The format is as follows: the first position indicates lecture hours; the second position indicates seminar hours (s), demonstration (d), clinic (c), or lecture-lab (L); and the third position indicates laboratory hours. The expression "3/2" means three hours of instruction every second week. If the course is a single-term course, the term in which it is offered is mentioned.

THE APPEARANCE OF A COURSE DESCRIPTION IN THE FOLLOWING LIST DOES NOT CONSTITUTE ANY GUARANTEE THAT THE COURSE WILL ACTUALLY BE OFFERED IN THE FORTHCOMING SESSION. INFORMATION AS TO WHICH COURSES WILL BE OFFERED, THE NAMES OF THE INSTRUCTORS, AND ALL FURTHER DETAILS MUST BE SOUGHT FROM THE DEPARTMENT CONCERNED.

201.3 General Information

Graduate work has been offered at The University of Alberta since its inception in 1908. During recent years the numbers of graduate students have increased rapidly, particularly in the programs leading to doctoral degrees. The present organization of the Faculty with a Dean was adopted in 1957.

The degrees offered by the Faculty are the Master of Arts, Master of Agriculture, Master of Business Administration, Master of Education, Master of Engineering, Master of Fine Arts, Master of Health Services Administration, English, Master of Laws, Master of Library Science, Master of Music, Master of Nursing, Master of Pharmacy, Master of Science, Master of Visual Arts, Doctor of Music, Doctor of Education, and Doctor of Philosophy. Postgraduate Diplomas are offered in Health Services Administration, English, Exploration Geology, Law and Education Administration. The purpose of the postgraduate diploma program is to provide an opportunity for persons who are not able to undertake a graduate degree program to take a recognized package of courses with a view toward increasing their mastery of a specialized area. In 1980 the degrees awarded included one hundred and fifty-seven Ph.D., seventy-two M.A., one hundred and thirty-four M.Sc., six LL.M., one hundred and sixteen M.Ed., fifty-six M.B.A., fourteen M.Eng., five M.V.A., seven M.Mus., nineteen M.H.S.A., one M.Ag., five M.F.A. and twenty-seven M.L.S., four M.N., and two Postgraduate Diplomas in Health Services Administration. There were 2,547 students registered in the faculty in 1980-81.

General regulations, applicable to all graduate students, are set out in § 202, below. Special regulations, applicable to those in a particular degree program, are set out in § 203, below. Further inquiries should be directed to the Dean, Faculty of Graduate Studies and Research, 2-8 University Hall, University of Alberta, Edmonton, Alberta, T6G 2J9.

202 GENERAL REGULATIONS

202.1 Classification of Graduate Students

Graduate students at The University of Alberta are classified in one of the following seven categories:

(1) *Qualifying graduate student.* A student who holds a three year bachelor's degree from The University of Alberta, or a similar qualification from some other institution, may be admitted as a qualifying graduate student. A graduate of a four-year program entering a completely new field may also be admitted as a qualifying graduate student. On satisfactorily completing a qualifying year in the department, a student may be reclassified as a probationary graduate student, a candidate for a master's degree, or as a provisional candidate for a doctor's degree.

(2) *Probationary graduate student.* Such a student is one whose academic record is either (i) difficult to assess, as in the case of some foreign students, or (ii) below the standard normally required. After the completion of one academic year, probationary graduate students who have proved their competence to the satisfaction of their department and the Faculty may be accepted as a candidate for a master's degree or a provisional candidate for a doctor's degree. If accepted, then on the recommendation of the department, they may have courses completed during their probationary year credited towards the requirements for a degree. Each such application will be considered on its merits.

(3) *Candidate for a master's degree (Category A).* Such a student is one who is a graduate of a 4-year degree program continuing in the same field (equivalent of an honors degree or degree with specialization of The University of Alberta). (See § 15.2.10).

(4) *Candidate for a master's degree (Category B).* Such a student is one who is a graduate of a 4-year degree program (beyond senior matriculation), specializing for the first time but not requiring a qualifying year. (See § 15.2.10).

(5) *Provisional candidate for a doctor's degree.* All Ph.D., combined M.D.-Ph.D., and Ed.D. students are first admitted as provisional candidates, and reclassified as candidates only when they have met certain requirements outlined in the special regulations for the relevant degree (see § 203, below).

(6) *Candidate for a doctor's degree.*

(7) *Special graduate student.* Such a student is one who is in every respect eligible for admission to the Faculty and who, though not registered in a degree program at this University, takes one or more *graduate* courses, with the permission of the department concerned.

(8) *Exchange graduate student* — a bona fide student of another university or college who has been permitted to take one or more courses for transfer of credit to his/her own institution which has agreed in advance to such an arrangement.

(9) *Candidate for a Postgraduate Diploma.* Such a student must meet the general admission requirements of the Faculty (§ 202). This specialized program is designed for persons who have had previous work experience and may normally be completed in one academic year of full-time study.

202.2 Admission

202.2.1 ADMISSION REQUIREMENTS

The requirements for admission as a graduate student are:

(1) A baccalaureate degree, with a grade point average of at least 6.0 in the work of the last two undergraduate years at The University of Alberta, or an equivalent qualification from another institution; and

(2) A statement from the chairman of the department concerned to the effect that the applicant is, in all respects, acceptable to the department. A special graduate student or an exchange graduate student, however, not being a candidate for a degree or post-graduate diploma, does not require departmental recommendation.

(3) All *non-Canadians* for whom English is not the major language (a) first *must* write and pass satisfactorily either the Michigan English Language Examination (The Director, Testing and Certification Division, English Language Institute, The University of Michigan, Ann Arbor, Michigan 48104, U.S.A.) or the Test of English as a Foreign Language (TOEFL, Educational Testing Service, Princeton, New Jersey 08540, U.S.A.) before formal admission can be given; and (b) in addition, if formally admitted, must arrive on campus and write, *one week before registration,* an English Language Examination set and administered by The University of Alberta. Students whose performance is unsatisfactory in this English Examination will be allowed to continue their graduate work, but may be required to take English language instruction as part of their regular program.

202.2.2 APPLICATION FOR ADMISSION

Application for admission to the Faculty must be submitted on forms supplied by the Dean. No assurance can be given that applications received after July 15 (for First Term), November 15 (for Second Term) Winter Session; March 1 (for Spring Session) or April 1 (for the Summer Session) can be processed in time to permit registration in that session. A graduate of another university must arrange with the Registrar of that institution to forward two transcripts of his/her academic record to the Dean prior to these dates. The Dean may require the applicant to furnish an official description of the content of the courses listed on the transcripts.

202.2.3 REFUSAL OF ADMISSION

Notwithstanding the Admission Requirements referred to above (§ 202.2.1), The University of Alberta may at its discretion refuse admission to any applicant.

202.3 Registration

202.3.1 CHANGES OF REGISTRATION

Deletion of courses, changes from "credit" to "audit", or changes from "audit" to "credit", may be made only on recommendation of the department in which the student is taking the graduate degree.

Such changes of registration, first approved by the Department Chairman, must be received by the Faculty of Graduate Studies and Research no later than six weeks prior to the date of the final lecture in the course(s) involved: October 20 for First Term courses, February 16 for Second Term and full-session courses. *No credit will be given for any course unless it is included on the program form or covered by an official change of registration.*

Only in special cases supported by the department, and approved by the Faculty of Graduate Studies and Research will a student be allowed to add a First Term or a full-session course to the program after September 19. The deadline date for the addition of new Second Term courses is January 29.

NOTE: Individual departments may require an earlier deadline date for changes in course registration.

202.3.2 MAINTENANCE OF REGISTRATION

Every student on a graduate degree program must register once a year in a full session in order to keep the program active. This registration entitles the student to the use of University facilities and to assistance from his/her supervisor for a twelve month period. Registration during the final year of the program permits the student to graduate at either of the two following Convocations.

The procedure for re-registration is the same as for initial registration, and students must obtain a program form from their department and present it at registration even if they are registering for thesis only.

Students who fail to maintain continuous registration will be considered to have withdrawn from their program. If they wish to resume work on the program, they must apply for re-admission to the Faculty of Graduate Studies and Research and have their program re-assessed in terms of the regulations in force at the time of re-application. If they are recommended for re-admission, a re-admission fee of $60.00 will be charged in addition to the fees assessed in the regular manner.

202.3.3 MAY-AUGUST SUMMER PERIOD

Graduate students who are working full-time on their graduate program during part or all of the period from May to September are encouraged to record their presence on campus at their departmental office. Those holding University awards during this period *must* so record their presence. Residence credit may be given for this period if the student has signed the record.

202.3.4 CANCELLATION OF REGISTRATION

A student who wishes to withdraw from the University should complete "Notice of Withdrawal" forms which must then be submitted to the Dean for approval. A student who withdraws without completing such forms will not be eligible for any refund of fees, nor for exemption from fees in the event that they have not been paid.

A fee adjustment will be made and refunds will be authorized in accordance with the table published in § 15.2.5. The date used for the purpose of calculating the refund is that on which the withdrawal is approved by the Dean.

202.4 Academic Standings

Except in a qualifying year, the pass mark in *any* course taken for credit towards an advanced degree is a grade of 6. Grades of 5 may be accepted in two single-term courses or one full-session course provided a minimum average of 6.0 is acquired at the time

of completion of work for the degree. In this connection the student should keep in mind that courses are weighted differently. Thus a grade of 7 in a session or term course does not necessarily bring one's average up to 6.0 if a grade of 5 was received in another course which carried a greater weight. In a qualifying year, a grade of 4 or 5 may be accepted in an individual course, provided that the grade point average for the year's work is at least 6.0. (Note: The above are *minimum grades* which the Faculty will accept. Individual departments may require higher grades than these.) A grade of 4 obtained by Probationary, Special, or Exchange, Graduate Students will be recorded as a failure.

Graduate students are not permitted to take supplemental examinations. If, after consulting the department or the committee concerned, the Faculty decides that a graduate student is not making satisfactory progress in either course work or research, the student may be required to withdraw.

202.5 Thesis Regulations

In graduate programs in which a thesis is required the candidate shall prepare at least three copies of the thesis. Additional copies may be required by individual departments. For example, all education departments require an additional bound copy for the Education Library.

Three copies of the thesis must be presented to and approved by the Faculty of Graduate Studies and Research, before they are bound.

A booklet entitled "Regulations and Guide for the Preparation of Theses" is available from the Faculty of Graduate Studies and Research.

STUDENTS SHOULD NOT USE THESES PREPARED BEFORE 1976 AS EXAMPLES OF FORMAT.

It is the responsibility of the student and the supervisor to be familiar with all regulations of the Faculty of Graduate Studies and Research with respect to theses, and to any specific requirement of the student's department.

In any case of uncertainty about thesis format, students are encouraged to consult the Faculty office before final typing.

202.6 Oral Examination and Convocation

Unless otherwise specified, each candidate must pass a final oral examination following the submission of the thesis to the department. *The finished thesis must be submitted to the examining committee at least two weeks before the oral examination.*

In order to obtain the degree at the earliest Convocation following the completion of the thesis, the student must have submitted the unbound copies of the thesis to the Faculty Office on or before a date set by the Faculty to allow enough time for the student's name to appear in the Convocation program. The schedule of deadline dates appears in the Academic Schedule or is available from the Faculty Office.

202.7 Time Limit

To be recommended for a degree of Doctor of Philosophy or Ed.D. a candidate must have completed all the requirements within six years of the time he/she is first registered as a probationary graduate student or provisional candidate in the Ph.D. or Ed.D. programs.

To be recommended for a Master's degree, a candidate must have completed all the requirements within four years of the time he/she is first registered as a probationary graduate student or candidate in the Master's program.

202.8 Appeals and Grievances

Student grievances of an academic nature sometimes arise. If this occurs, students in the Faculty of Graduate Studies and Research are advised to first contact the instructor concerned from whom, in most cases, satisfactory explanations will be obtained. If the matter is not resolved, students are advised to see the Department Chairman and the Dean of the Faculty of Graduate Studies and Research, in that order.

For further information regarding Appeals Procedures at the Faculty level the student should seek the advice of the Dean.

For further information related to Appeals and Grievances, students are directed to § 16.7 of the University Regulations and Information for Students Calendar.

203 DEGREE REGULATIONS

203.1 Master's Degrees

203.1.1 COMMON REGULATIONS

Except as noted in § 203.1.2 below, the following regulations apply to all master's degree programs.

(1) A graduate student registered in a program for a master's degree must spend a minimum of two terms in full-time attendance at the University either as a Candidate for the Master's Degree or as a Probationary Graduate Student. An alternative proposal for meeting this residence requirement may be considered if recommended by the department concerned.

NOTE: Some departments may require that a graduate student be in full-time attendance for specified terms.

(2) A candidate entering the Faculty from a four-year specialized program and continuing work in the same field is normally required to complete the equivalent of one calendar year's work. Other candidates are normally required to complete the equivalent of two years' work, the first year as a qualifying student. Details are determined by the department concerned.

(3) Considerable variation is permitted in the balance between the research and the courses required for the degree. All candidates must include some course work in the program, and proposals involving research work equivalent to less than two full courses require Faculty approval.

A number of Departments (Agricultural Engineering, Animal Science, Business Administration and Commerce, Chemical Engineering, Civil Engineering, Community Development, Computing Science, Economics, Educational Administration, Educational Foundations, Electrical Engineering, Elementary Education, Food Science, Germanic Languages, Health Services Administration, Industrial and Vocational Education, Library Science, Mathematics, Mechanical Engineering, Mineral Engineering, Physical Education, Romance Languages, Rural Economy, Secondary Education, Sociology and Soil Science) offer a master's degree by a non-thesis route. In such programs the emphasis is on course work, supplemented by a special study. Details may be obtained from the Departments concerned.

(4) From the commencement of the Master's program each student shall have a supervisor/advisor, whether or not the student is following a thesis or non-thesis route.

(5) Only in special circumstances, and with the approval of the department in which the graduate work is being done, will extramural courses be accepted for credit.

(6) The results of research must be submitted in the form of a thesis conforming to the Faculty regulations.

(7) An examining committee of at least three faculty members, one from a department other than that in which the student is registered, must be approved by the Faculty. The committee will review the thesis and conduct an oral examination designed to test the candidate's knowledge of the thesis subject and of related fields. Persons other than the examiners may attend with the approval of the Dean or the chairman of the committee.

(8) All students in a non-thesis master's degree program must have a minimum of two evaluators/supervisors, at least one of whom is from their department. Supervisors are recommended for approval by the department to the Dean of Graduate Studies. These evaluators are responsible for maintenance of Faculty and departmental standards for the project. A typed report of the project or some other finished product is made available and kept on file in the department.

203.1.2 SPECIAL REGULATIONS FOR PARTICULAR DEGREES

(1) For the *M.A. in Community Development,* in addition to the above requirements, a four-month field internship is required. (See § 204.17, below.)

(2) The *M.Ag.* degree differs from the M.Sc. in Agriculture in the following particulars:

(i) the applicant is normally expected to have completed three years of satisfactory professional experience;
(ii) the minimum residence requirement is one term;
(iii) the degree program consists of the equivalent of five full-year graduate level courses plus a project equivalent in weight to at least a one-term course.

(3) The *M.Eng.* differs from the M.Sc. in Engineering in the following particulars:

(i) the minimum residence requirement is one term;
(ii) The degree program consists of the equivalent of five full courses, and a project instead of a thesis.

(4) In the program for the *M.F.A. in Drama* the thesis will be replaced by the presentation of a creative project and a related historical or critical essay. (See § 204.22, below.)

(5) In the program for the *M.Mus. in Applied Music,* the thesis will be replaced by the presentation of a special project and a performance requirement. (See § 204.54, below.)

(6) Programs leading to the notation of specialization in East European and Soviet Studies require the joint approval of the Division of East European Studies and the participating department. Signatures for the Division and the Department are required on the recommendation of admission, the study program, the notice of oral examination, and the report of the final examining committee.

(7) *M.Eng. in Welding Engineering:*

(i) Depending on the student's field of study for his/her B.Sc. degree, he/she will be assigned to either the Department of Civil Engineering or the Department of Mineral Engineering as his/her home department.
(ii) A maximum of 50% (5 one-term courses) of the total course load for the M.Eng. degree can be taken in the student's home department. Similarly, not less than 30% of the course load must be taken within such department.
(iii) All home department courses must be on the 600 level.
(iv) Dependent on individual approval, a student may be permitted to take a maximum of two appropriate 400 - or 500 - level undergraduate courses for credit towards his/her degree. Such courses cannot be part of his/her home department's undergraduate core curriculum.
(v) The work for the project may be conducted within the University environment or outside in industry, but approval, control, and supervision will remain with the student's faculty supervisor.
(vi) Certain courses must be taken by all students in

the program, regardless of educational specialty. Consult the current course listing for details.

(vii) Degree designation will be Master of Engineering in (home department field), e.g., Master of Engineering in Civil Engineering (Welding Engineering).

(8) *M.Eng. in Oil Sands Engineering*

(i) Depending on the student's field of study for his/her Bachelor's degree, he/she will be assigned to one of the Departments of Engineering as his/her home departments.

(ii) The degree program consists of ten single-term courses and a project.

(iii) Six of the single-term courses must be taken from a list of core courses. Consult the current course listing for details.

(iv) The work for the project may be conducted within the University environment or outside in industry, but approval, control, and supervision will remain with the student's faculty supervisor.

(v) The degree designation will be Master of Engineering in (home department field), e.g., Master of Engineering in Civil Engineering (Oil Sands).

(9) *M.B.A.—LL.B. Joint Program*

The Faculty of Business Administration and Commerce and the Faculty of Law offer a program of joint study which permits students to earn both the M.B.A. and LL.B. degree in four years.

Acceptance by the Faculty of Graduate Studies and Research (for admission into the M.B.A. program) and by the Faculty of Law, separately, is a prerequisite to admission into the M.B.A.—LL.B. program; admission into each faculty will be determined by the same selection process and criteria as for other students. In addition, each student must be admitted into the combined program. Admission into the combined program will be determined by a Selection Committee composed of representatives of the Faculty of Law and of the Faculty of Business Administration and Commerce. Since this is a special program, particular attention in the selection process will be given to:

i. a student's past academic achievement; and

ii. maturity, interest, and a rationale of how such a combined program will enhance a student's career and professional skills.

Each student must apply separately to the Faculty of Law and to the Faculty of Graduate Studies and Research (for admission into the M.B.A. program).

In addition, each student must apply to the combined program by completing an additional M.B.A.—LL.B. application form available in the Faculty of Law or the Faculty of Business Administration and Commerce.

In addition to new entrants, students in the first year of either the regular M.B.A. program or the Faculty of Law are eligible to apply for the joint program.

203.2 The Degree of Ph.D.

(1) Students may be admitted as a provisional candidate for the degree of Doctor of Philosophy if they hold a bachelor's or a master's degree, or equivalent, from an approved university. Admission is contingent upon recommendation by a department and upon the availability of suitable supervision, suitable courses of study and library, laboratory, and other facilities. Students will remain as provisional candidates until they have successfully completed their candidacy examination (see Para. 6 below).

(2) The essential requirement for the doctorate is the planning and carrying out of research of high quality leading to an advance in knowledge in the candidate's field of study.

(3) The time necessary to complete the requirements for the doctorate depends upon the student's progress. For a student with a bachelor's degree the minimum requirement is three academic years of study and research, of which two academic years must be in residence at The University of Alberta. For a student with a master's degree the minimum requirement is two academic years of study and research in residence at The University of Alberta. An alternative method of meeting the residence requirement may be considered on recommendation to the Faculty of Graduate Studies and Research by the department concerned.

(4) The student's program shall be under the direction of a supervisory committee of not fewer than the three faculty members appointed by the Faculty of Graduate Studies and Research. The chairman of the committee shall be the faculty member under whose supervision the student is carrying out the research. Where appropriate, one or more members of the committee may be chosen from a department other than that in which the research is being carried out. The committee shall recommend to the Faculty of Graduate Studies and Research a program of research. The same committee shall arrange for the necessary examinations and for adjudication of the thesis.

(5) A department may require a student to demonstrate a knowledge of one or more languages in addition to English. If a department has such a requirement the student must satisfy it before being allowed to take the candidacy examination.

(6) At least six months before taking the final examination (on the thesis), the student shall pass a candidacy examination in subjects relevant to the general field of research. At the candidacy examination, the student must demonstrate to the satisfaction of the examining committee that he/she possess (a) an adequate knowledge of the discipline and of the subject matter relevant to the thesis, and (b) the ability to pursue and complete original research at an advanced level. At most, only minor attention should be given to the work done on the thesis project. As well, the student may be required by the department to pass comprehensive examinations prior to the actual candidacy examination. Normally an oral examination is required and will be held when most, if not all, of the course work is completed and the thesis project started or well defined.

The examination shall be under the direction of the supervisory committee to which two other members of the teaching staff have been added. At least one member of the examining committee shall be a person from a department or discipline other than that in which the research is being carried out. Persons other than the examiners may attend only by agreement of the Dean of the Faculty of Graduate Studies and Research or the chairman of the committee. Visitors may not participate in the committee's discussion concerning decision on the student's performance.

(7) The results of the candidate's research shall be presented in a thesis satisfying the general requirements of the Faculty of Graduate Studies and Research. The material must be of sufficient merit to meet the standards of reputable scholarly publications.

(8) The thesis shall be examined by an examining committee consisting of the supervisory committee and at least two other examiners. One member of the exam-

ining committee shall be from a department or discipline other than that in which the student is working, and one member shall be an external examiner who is a recognized authority in the special field of research and should have had no previous association with the candidate.

(9) A final oral examination, based largely on the thesis, shall be conducted by the examining committee. Members of the staff of the student's major department as well as members of the Council of the Faculty of Graduate Studies and Research, or their alternates, have the right to attend but should so notify the chairman of the examining committee. Other persons may attend with special permission of the Dean of the Faculty of Graduate Studies and Research or the Chairman of the examining committee.

Except for the Dean (or Associate Dean) of the Faculty of Graduate Studies and Research, who may participate fully in the examination, persons who are not members of the examining committee: (a) may participate in the questioning only by permission of the Chairman of the Committee, and (b) are not permitted to participate in the discussion of the student's performance and must withdraw before such discussion commences.

203.3 Combined Program for the Degrees of M.D. and Ph.D.

Highly qualified students desiring to pursue a career of teaching and research in either basic medical science or in clinical medicine may enrol in a program of six to seven years' duration leading to the acquisition of both an M.D. and a Ph.D. degree.

A student may, after completion of two years of a medical program, withdraw from that program and apply for admission to the Faculty of Graduate Studies and Research. If acceptable to the appropriate basic science department and to the Faculty of Graduate Studies and Research, the student would embark upon a program leading to the Ph.D. degree. The time required for the completion of the requirements for the Ph.D. degree would depend upon the previous training of the applicant, and would be normally three years in the case of a student who had entered the Faculty of Medicine holding a B.Sc. degree, and four years in the case of a student who entered the Faculty of Medicine from a two-year premedical program. Upon completion of the Ph.D. program, the student could re-enter the Faculty of Medicine and complete the requirements for the M.D. degree.

Students interested in such a program may obtain further information from the chairman of the appropriate department.

203.4 The Degree of Ed.D.

The degree of Doctor of Education, attests proficiency in a program of graduate study in which the emphasis is upon preparation for competent professional performance. The general regulations with respect to admission, residence requirements, candidacy examinations and final oral examinations, based largely on theses, for the Ed.D. degree are the same as those listed for the Ph.D. degree with the following exceptions:

(1) Several years of successful teaching and an M.Ed. degree or its equivalent are prerequisites for admission.

(2) A reading knowledge of French is required. In special circumstances another language may be substituted.

(3) The program emphasizes breadth in educational theory, practice, and research rather than intensive specialization in a particular area.

(4) The student's program may make provision for supervised field experience.

204 GRADUATE PROGRAMS AND COURSES

204.1 General Information

A brief description of each program offered under the auspices of the Faculty of Graduate Studies and Research is given in alphabetical order in the following sections. Prospective applicants should note particularly the admission requirements, the fields in which research may be carried out, and the requirements for each program in addition to the general requirements of the Faculty of Graduate Studies and Research.

Both graduate courses and undergraduate courses which may be taken for credit in a graduate program are listed following the description of the program.

Each course is designated by its computer abbreviation and a number. Students should use this abbreviation and number when filling in their registration forms.

Following the title of the course is (in most instances) the symbol ★ standing for "course weight" and a number indicating the weight of the course as used in computing grade-point averages. The weights (or course units) for the Faculty of Engineering are based on the number of hours, lectures, seminars and laboratories and are listed following the symbol □. A normal full-session course is weighted 6. Single-term courses are weighted 3. Some courses involving research may vary in weight according to the length and difficulty of the project.

The next three figures, enclosed in parentheses, indicate the hours of instruction required by the course in a week. The format is as follows: the first position indicates lecture hours; the second position indicates seminar hours (s), demonstration (d), clinic (c), or lecture-lab (L); and the third position indicates laboratory hours. If the course is a single-term course, the term in which it is offered is mentioned.

THE APPEARANCE OF A COURSE DESCRIPTION IN THE FOLLOWING LISTS DOES NOT CONSTITUTE ANY GUARANTEE THAT THE COURSE WILL ACTUALLY BE OFFERED IN THE FORTHCOMING SESSION. INFORMATION AS TO WHICH COURSES WILL BE OFFERED, THE NAMES OF THE INSTRUCTORS, AND ALL FURTHER DETAILS MUST BE SOUGHT FROM THE DEPARTMENT CONCERNED.

204.2 Agricultural Engineering

204.2.1 THE DEGREE OF M.AG., M.ENG. AND M.SC.

(1) The Department of Agricultural Engineering offers programs leading to the degrees of Master of Agriculture, Master of Engineering and Master of Science.

(2) Candidates with undergraduate training in Engineering Agrology can enrol in either the M.Ag. or M.Sc. programs. Candidates with a degree in agricultural engineering or its engineering equivalent can enrol in either the M.Eng. or M.Sc. programs.

(3) Candidates with undergraduate training in forestry can enrol in an M.Sc. program in either of the following specializations: (a) Forest Operations or (b) Wood Utilization.

(4) Required courses depend on the area of specialization and the undergraduate background of the student. Master of Agriculture and Master of Engineering programs consist of ten single-term courses or equivalent plus a project. Applicants will normally be expected to have at least three years of post B.Sc. experience. The minimum residence requirement would be one term and the time limit for completion of the program would be four years. Master of Science programs normally consist of eight single-term courses or equivalent plus a thesis. Agricultural Engineering 600 is a requirement for all graduate students.

(5) Research work leading to the preparation of a thesis for the M.Sc. degree is undertaken within the Department of Agricultural Engineering. Graduate students who select some phase of irrigation for investigation may conduct part of their research at the Canada Agriculture Research Station, Lethbridge, Alberta, or other approved off-campus research, educational or technical institution.

(6) Funds are available for a limited number of graduate students to be engaged by the Department as teaching and research assistants. Financial assistance is also available for graduate students through research grants to staff in specific areas.

204.11 Business Administration

204.11.1 THE DEGREE OF M.B.A.

(1) The Faculty of Business Administration and Commerce offers a program leading to the degree of Master of Business Administration designed for students preparing for a career in management.

(2) The M.B.A. degree is a two year program designed for students with various educational backgrounds. Since no specific undergraduate major is required for entrance, the particular combination of courses and time required to complete the M.B.A. program will vary according to the academic background of each student. Flexibility has been built into the program to accommodate those who have their undergraduate degree in many areas, including but not limited to Liberal Arts, Education, Engineering, Science or Business.

The first portion of the program consists of core subjects which address the fundamental concepts underlying administration and decision-making. These classes in basic principles are intended to give the student a theoretic foundation, and the tools of analysis upon which advanced classes are built. Completion of all core classes requires one full academic year, and some carry-over into a second year.

The Faculty does not require students to repeat core classes in which they have already developed competence equal to that developed in our core class offerings; however, waivers of core classes are made only on the basis of exemption examinations.

The second portion of the program gives students an opportunity to develop some depth of preparation in fields of their choice by taking advanced classes (500-level courses). For additional flexibility, each student has the option of either writing a thesis, or taking additional advanced classes.

The non-thesis option requires five advanced electives and a research seminar in the student's field of specialization. In addition, one of Business Policy 555 or Business Policy 556 is normally required of all students. Note that at least seven advanced classes are required for the degree, when no thesis is written.

The thesis option requires three advanced electives and a thesis. In addition, one of Business Policy 555 or Business Policy 556 is required. Note that at least four advanced classes are required for the degree, if a thesis is written.

(3) Admission into the M.B.A. program requires the applicant to meet the requirements of the Faculty of Graduate Studies and Research and be approved by the Faculty of Business Administration and Commerce. Approval by the Faculty of Business Administration and Commerce depends upon the undergraduate grades, three letters of reference, statement of purpose explaining how the MBA relates to applicant's career goals, and test score on the *Graduate Management Admission Test.* All applicants are required to write the *Graduate Management Admission Test* and have their scores forwarded to the Associate Dean, Graduate Program, Faculty of Business Administration and Commerce, The University of Alberta, Edmonton, Alberta. Further information and application forms are available from the Examinations and Timetabling Division, Rm. 123, Administration Building.

In addition to the above requirements, all non-Canadian students for whom English is not their native language must write and pass with a minimum score of 600, before formal admission approval can be given, the *Test of English as a Foreign Language.* Further information and application forms are available from the Examinations and Timetabling Division, Rm. 123, Adminstration Building. Results should be forwarded to the Dean, Faculty of Graduate Studies and Research.

(4) The Faculty of Business Administration and Commerce has a limited number of Graduate Assistantships which range from $4,600 to $5,000 (1980-81 scale) depending on the academic status of the student.

All graduate assistantships awarded by the Faculty of Business Administration and Commerce will be determined early in May. Consequently, it will be possible to consider only those applications for study in the M.B.A. program which are complete as of April 30th.

Applicants who are interested in being considered for such awards are strongly urged to complete their applications not later than mid-April. In particular, the *Graduate Management Admission Test* must have been written not later than the March sitting of that test. Registration to write the GMAT must normally be received by the Educational Testing Service approximately one month before the test date.

(5) A limited number of fellowships and scholarships are also available. All students applying for these awards *must* submit their applications to the Student Awards Office by February 1st.

(6) For more information write to the Associate Dean, Graduate Program, Faculty of Business Administration and Commerce.

204.13 Chemical Engineering

204.13.1 THE DEGREES OF M.ENG., M.SC. AND PH.D.

(1) The Department of Chemical Engineering offers facilities for advanced training and research leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Chemical Engineering. A program leading to a Master of Science or Master of Engineering in Process Control (Chemical Engineering) is also available for students wishing to specialize in this area.

(2) General fields for research include fluid mechanics and rheology, reaction kinetics and catalysis, mass transfer and separation processes, heat transfer, thermodynamics, hydrocarbon P-V-T and phase equilibrium studies, polymer reactor engineering, process dynamics and control, on-line computer data acquisition and control, mathematical modeling and environmental engineering. Many research programs are orientated towards better utilization of natural resources in the Province, e.g., processing of Athabasca oil sands, natural gas and petroleum feedstocks.

Emphasis is given to computer applications both in the courses of instruction and in research. This is made possible through interest of the staff and through the facilities that are available in the Department Data Acquisition Control and Simulation Centre and through the University Computing Services. Instruction is offered in computer oriented mathematical techniques, modeling, analog and digital computer simulation, systems engineering, and in real-time computer applications.

(3) For the Master of Engineering program, work equivalent to ten single-term courses plus the engineering project, Chemical Engineering 900 must be completed. The courses are of the same type and calibre as those taken by M.Sc. and Ph.D. candidates. The project may be completed within a three to six week period following the regular winter session, so that the M.Eng. program may be completed in a minimum of nine months of full-time study. The minimum residence requirement is one term for a B.Sc. graduate with at least one year post-B.Sc. experience. The maximum time permitted for completion of a Master of Engineering program is five years from the date of first registration.

(4) For the M.Sc. degree, graduate work equivalent to a minimum of twelve months of full-time study is required for a student possessing an undergraduate degree in the same field from a recognized university. In the M.Sc. and M.Eng. programs the Department will also accept qualified applicants with degrees in other fields of engineering. Graduates with non-engineering backgrounds may be admitted under special arrangements which may involve the completion of certain undergraduate engineering courses. M.Sc. programs normally consist of six single-term courses plus seminar, research and thesis. Certain graduate courses are mandatory. Details of all programs must be worked out in consultation with the Department.

(5) For the Ph.D. program, in addition to the requirements of the Faculty of Graduate Studies and Research, the Department requires the candidate to have satisfactorily completed at least 39 term hours of formal course work. Of these, 21 term hours should be selected from courses offered by the Department of Chemical Engineering, 12 term hours should be from courses outside the Department, and not less than 6 term hours of the total must be outside the Faculty of Engineering.

(6) A student who intends to study for the Ph.D. degree is required to pass a set of written Ph.D. preliminary examinations. These examinations, which embrace the major fields of Chemical Engineering, are normally taken by the student after one year of graduate studies. Although the timing depends on circumstances, the Ph.D. preliminary examinations are normally held in early January and in May.

(7) Graduate Assistantships are available for qualified students on a part-time or full-time basis with remuneration according to the student's background and the hours of service. Scholarships and fellowships are available for research in Chemical Engineering. Summer assistance can usually be arranged for students continuing their research through the summer months without scholarship support.

204.17 Community Development

204.17.1 THE DEGREES OF M.A.

(1) Candidates enrolled in this program must have a general background in the social sciences and relevant humanities, with special emphasis on senior-level proficiency in economics, sociology, political science, anthropology and social psychology. Most students applying for admission to this program will take an initial year as a qualifying graduate student to bring their general background in the social sciences and relevant humanities at the senior undergraduate level up to the requirements. However, students entering the program with an honors degree in a relevant field or with equivalent preparation in the core areas, can be considered as candidates for the Master's degree.

(2) The Division offers two routes for the M.A. degree, a thesis route and a non-thesis route:

(a) The thesis route: Over the two-year period students will be expected to take the equivalent of at least five and one-half full session courses, three and one-half of which are graduate level courses and more than half of which are mandatory. Students in this route will then write a thesis equivalent to two full-session courses. The mandatory courses form the core of the program and are intended to give the student a definitive and comprehensive view of community development principles and practices. INT D 459 is a prerequisite for all mandatory courses. INT D 559 must be taken in the first year; INT D 601 and INT D 602, must be taken in the second year.

(b) The non-thesis route: Over the two-year period students will be expected to take the equivalent of at least six and one-half full-session courses, four of which are graduate level courses and more than half of which are mandatory. Students in this route will then take INT D 900 which is the non-thesis project.

The balance of each student's program is made up of courses chosen from other Departments and Facul-

ties, depending upon his/her special interests. Areas which are highly recommended include (1) social science research methods (2) adult education (3) group dynamics (4) development and change (relevant courses in economics, rural and urban sociology, education, anthropology, philosophy, and organizational development). Other courses are offered by Geography, History, Political Science, Recreation Administration and Education. Where students' special interests are not met by existing courses, conference (or reading) courses or practicums can be arranged under the supervision of a staff member with some competence in that particular field.

(3) For additional information regarding this program, including the availability of assistantships, students should contact the Director, Division of Community Development, Room 748, Education South Building, The University of Alberta, Edmonton, Alberta. Such inquiries should be made as early as possible, particularly by students who wish to begin acquiring the necessary prerequisites through Spring or Summer Session courses.

204.19 Comparative Literature

204.19.1 THE DEGREES OF M.A. AND PH.D.

(1) The Department of Comparative Literature offers programs leading towards the degrees of Master of Arts and Doctor of Philosophy in all literatures taught at this University.

(2) Applicants for graduate work in Comparative Literature should, in their previous programs, have concentrated on the literature of one or two languages (combined honors). They must have a competent reading knowledge of at least one language other than English (for native English speakers) or French (for native French speakers) in order to undertake an M.A. program, and of at least two languages other than English (for native English speakers) or French (for native French speakers) in order to undertake a Ph.D. program.

(3) In addition to the thesis, four courses are normally required for an M.A. and six additional courses for a Ph.D. The number of courses and their areas shall be determined individually. 204.20.1 THE DEGREES OF M.SC. AND PH.D.

(1) The Computing Science Department offers programs leading to the degrees of Master of Science and Doctor of Philosophy in a number of fields, including automata and switching theory, artificial intelligence, data base management, graphical communication, information retrieval, minicomputers, numerical analysis, operating systems, programming languages, simulation studies, statistical analysis, symbolic manipulation, theory of computation. Most traditional and instructional computing is done on the University's Amdahl 470, operating under Michigan Terminal System (MTS). The system supports a large number and variety of remote terminals. The department has its own computing laboratory, which contains a variety of minicomputers as well as a PDP 11/60 system (used for picture processing and data base management research), a PDP 11/45 system (for virtual memory and multiprogramming studies), and a microprogrammable Nanodata QM1.

(2) Candidates for the M.Sc. degree in Computing Science are to have an Honors degree or the equivalent, from a recognized university, with a background in computing science and mathematics at least equivalent to the Computing Science and Mathematics courses required in the first three years of the Honors Program in Computing Science at the University of Alberta. A student who does not meet these requirements will be required to take course work additional to that contained in his M.Sc. Program, either concurrently with his graduate program or in a year of study prior to admission as an M.Sc. candidate.

(3) After acceptance into the M.Sc. Program, candidates will be required to take a minimum of six single-term graduate courses and write a thesis or to take a minimum of eight single-term graduate courses and complete a project. The program may normally be completed in about 18 months of continuous study.

(4) To be admitted as a provisional candidate for the Ph.D., a student must normally have an M.Sc. degree in Computing Science or a related field. Unusually qualified applicants having the equivalent of a first-class honors B.Sc. degree may be admitted directly into the Ph.D. program; such students will be required to complete a minimum of six single-term graduate courses in addition to the requirements in (5).

(5) The Ph.D. candidate will be required to take a minimum of six single-term graduate courses and pass the departmental comprehensive examinations. The major part of the student's program will consist of original research, the results of which will be contained in the doctoral thesis.

(6) Students in all degree programs will be expected

to satisfy the requirements currently in force with respect to attendance at departmental colloquia and seminars and public presentation of the student's research results.

(7) Financial assistance is available throughout the calendar year in the form of Graduate Assistantships, and Research Grant Assistantships.

(1) Students who satisfy the admission requirements of Graduate Studies and Research and who have the approval of the Department of Educational Administration may pursue programs of study and research leading to the degrees of M.Ed., Ed.D., Ph.D., and Postgraduate Diploma. The M.Ed. degree may be taken by either the thesis route or the non-thesis route. Each route offers opportunities for specializing in various aspects of administration.

Taken by either route, the M.Ed. program requires two terms of residence which normally are accomplished by one winter session of study as a full-time student. The program may be completed in 14 months of continuous study, extending from the beginning of one summer session to the termination of the next. Two years of residence are required for the Ph.D. degree.

Admission to the Postgraduate Diploma requires a completion of M.Ed. degree or equivalent and experience in an administrative position. These requirements are in addition to the admission requirements of the Faculty of Graduate Studies. The program consists of eight ★3 (half-term) graduate-level courses in Educational Administration. There is no residency requirement.

(2) Each student's program consists of required courses in Educational Administration and of electives available in the Department or in other Departments in the University. Required courses provide the general theoretical framework for administration, while electives provide a degree of specialization related to research and/or future occupation. Further opportunities for specialization exist within a student's program, which may include supervised projects and such field experiences as may be arranged by staff. A student may prepare, therefore, to serve in various administrative positions in schools, school systems, colleges, universities, and government, or as a teacher in colleges and universities.

(3) A number of fellowships and assistantships in teaching and research are available for well-qualified candidates.

(4) Prospective students should consult the Chairman of the Department for further information on the program. Applicants are requested, also, to inform the Chairman of their tentative plan of attendance.

204.28 Electrical Engineering

204.28.1 THE DEGREES OF M.ENG., M.SC. AND PH.D.

(1) The Department of Electrical Engineering offers postgraduate courses, leading to the M.Eng., M.Sc. and Ph.D. degrees, to qualified graduates of recognized universities.

(2) Considerable research facilities are available in a number of areas, notably biomedical engineering, nonlinear, sample data, and optimal control systems, lasers, microprocessor applications, microwave semiconductor devices, microwave communications, microwave power, particle accelerators, plasmas, space research, power systems and ultra-high vacuum and surface phenomena.

(3) A normal requirement for the M.Sc. degree is nine graduate single-term courses (or equivalent) and a Thesis (A reduction in the number of courses is under review). These courses must include three of the core courses listed in (7) below as well as Electrical Engineering 600. Of the remaining courses two should normally be taken outside the Department. M.Sc. candidates take Electrical Engineering 600 in the Second Term of their program and are required to submit a research report to a supervisory committee which consists of their thesis supervisor and one other faculty member. The topic of the report is to be chosen in consultation with the thesis supervisor. This report must be submitted before March 31 of the year in which Electrical Engineering 600 is taken.

(4) Master of Engineering programs consist of ten single-term courses (under review), three of which must be core courses as listed in (7) below, plus a project which is approximately equivalent to a single-term course. A candidate may complete a Master of Engineering program in a minimum of nine months. The minimum residence required is one term for a B.Sc. graduate with at least one year of post-B.Sc. experience, and one session for a B.Sc. graduate with less than one year of post-B.Sc. experience. The maximum time permitted for completion of a Master of Engineering program is five years from the date of first registration.

(5) For the Ph.D. program, course requirements depend upon individual circumstances and must be approved by the Department of Electrical Engineering. The emphasis is on research leading to a thesis of high calibre. The departmental course program steering committee will assess the student's background and recommend courses to make up for course deficiencies (if any), and each student's supervisory committee will assess his/her research ability. A Ph.D. candidate must take E E 609 and submit a research proposal.

(6) Financial assistance can be arranged in the form of Graduate Assistantships, scholarships and Research Grant Assistantships listed in the Awards section of the Calendar.

(7) The core courses are E E 622, E E 631, E E 655, E E 670, and E E 656.

204.30 English

204.30.1 THE DEGREES OF M.A. AND PH.D.

(1) The Department of English offers graduate work leading to the Master of Arts and Doctor of Philosophy degrees in English Language and Literature.

(2) The M.A. program of a student with an honors B.A. in English (or its equivalent) will normally consist of three full-term graduate courses (or their equivalent) in the Department, some practical training in bibliography, a thesis, and an oral defence of the thesis. The student will spend a minimum of one year in residence. The M.A. program of a student without an honors B.A. in English may take longer and will be based upon the number of English courses that have been taken as an undergraduate, and will also include some practical training in bibliography, a thesis, and an oral defence of the thesis. A reading knowledge of one language other than English will be required of all students (normally French or German, though other languages may be approved).

(3) A student with an M.A. in English (or its equivalent) may be admitted as a provisional candidate for the Ph.D. degree. 204.38 Germanic Languages

204.38.1 THE DEGREES OF M.A. AND PH.D.

(1) The Department of Germanic Languages offers graduate work leading toward the M.A. and Ph.D. degrees with a concentration in either German Literature or Germanic Linguistics and Philology.

(2) Among the areas for which the Department is especially qualified, through staff and library resources, to direct work leading to graduate degrees, are Germanic philology and linguistics, Medieval Literature, The Age of Goethe, Romanticism, Nineteenth and Twentieth Century Literature. The University Library is especially rich in primary and secondary sources, including periodicals, of the post-naturalistic period and is fortunate in having the *Georg Kaiser Collection* which offers a rare opportunity for research into the life and work of this author, using photocopies of original material much of which is still unpublished.

(3) For the M.A. degree, the admission requirements are those of the Faculty of Graduate Studies and Research.

(4) For admission as a provisional candidate for the Ph.D. degree, in general, The University of Alberta M.A. in German or its equivalent (including *Staatsexamen*) will be required. Students whose ability to write a thesis-length work is untested will be required to write

an extended term paper in one of their graduate courses during the first term of their first year of doctoral studies. Students must also demonstrate their proficiency in oral and written German.

(5) There are two routes leading to the M.A. degree, with thesis and without thesis.

(6) *M.A. with thesis.* In addition to the thesis requirement there are course requirements.

(i) For students with a three-year B.A. six to eight courses are required in a two-year program, the first of which is a qualifying year; for students with a four-year Bachelor's degree normally six courses are required in a two-year program; and for students with a B.A. Honors degree in German three courses are required in a one-year program.

(ii) All candidates for the M.A. with thesis must take German 512, 593, and the non-credit course German 515, unless fulfillment of equivalent requirements can be demonstrated. Each program will be decided upon in consultation with the Department.

(iii) All candidates for the M.A. with thesis are required to take a final oral examination, which is a defense of the thesis.

(7) *M.A. without thesis.* There are course requirements for the M.A. degree without thesis.

(i) For students with a three-year B.A. seven to nine courses are required in a two-year program, the first of which is a qualifying year; for students with a four-year Bachelor's degree normally seven courses are required in a two-year program; and for students with a B.A. Honors degree in German four courses are required in a one-year program.

(ii) All candidates for the M.A. without thesis must take German 512 and the non-credit course German 515, unless fulfillment of equivalent requirements can be demonstrated. Each program will be decided upon in consultation with the Department.

(iii) All candidates for the M.A. without thesis are required to submit an extended term-paper which will be discussed with the candidate by an evaluation committee.

(8) In addition to the dissertation, the requirements for the Ph.D. degree are as follows:

(i) Reading proficiency in an approved language other than German or English.

(ii) In addition to the requirements for the M.A., the equivalents of six full-year courses. In each case, the student's program will be decided upon in consultation with the Department.

(iii) The candidacy examination consisting of a department written examination and a Faculty oral examination.

(iv) The final oral examination, which is a defense of the dissertation.

(9) Financial assistance is available in the form of fellowships and Graduate Assistantships.

(10) For further information contact the Chairman of the Department.

The thesis option emphasizes the development of research and planning expertise relevant to efficient and effective health and social services delivery. The non-thesis option emphasizes the development of administrative expertise relevant to service programs and agencies in the health and welfare fields.

The details of a student's course requirements are determined by the faculty of the Division and consideration is given to the student's prior background of course work and experience as well as their career plans. Each student is expected to develop an area of special interest such as hospitals, nursing service, social welfare, medical care, epidemiology, and so on. Within this framework, the normal Qualifying Year course requirements are as follows:

Plus: Two approved electives which will be either advanced (candidacy year) courses in health services administration or other courses outside the Division which are deemed to be centrally relevant to the career interests and needs of the student because of the specialized knowledge or depth of knowledge which they provide.

(4) Grade requirements for graduation will be the same as those for a Master's degree at The University of Alberta, that is, a grade point average of 6, or better.

(5) Procedures for admission, student review and student discipline will be the responsibility of a Committee of the whole of the full-time Health Services Administration faculty, as it is for Master's students.

204.40 History

204.40.1 THE DEGREES OF M.A. AND PH.D.

(1) The Department of History offers instruction leading to the degrees of Master of Arts and Doctor of Philosophy.

(2) M.A. programs are offered in several fields of Asian, British, Canadian, European, Latin American and United States history. Ph.D. programs are offered in certain areas of these fields in which adequate library resources and supervision are available.

(3) A student holding a four-year Honors or Special B.A. in History from The University of Alberta, or a comparable degree from another university, may be admitted to the status of Candidate for the M.A. degree. A student who lacks the above qualification but who holds an acceptable bachelor's degree, or its equiva-

lent, may be admitted as a Qualifying Graduate Student, who will be expected to complete additional courses before proceeding to the M.A. program proper.

(4) A student proposing to enter a Ph.D. program is expected to hold an acceptable M.A. degree or its equivalent. In exceptional cases, a student admitted as a candidate for the M.A. may subsequently be permitted to enter the Ph.D. program without writing a Master's thesis.

(5) All Candidates for the M.A. and all Provisional Candidates for the Ph.D. must demonstrate competence in reading a language other than English by passing an examination administered by the Department. For all graduate students specializing in Canadian history the language must be French; the specific language requirement for others will be decided in consultation with the student's supervisor. In addition, the Department expects every candidate for an advanced degree to be proficient in any language or languages necessary for carrying out his/her thesis research.

(6) A student admitted as a Qualifying Graduate Student must normally take five full courses or the equivalent, at least three being History courses, and attain a grade-point average of 7.0, with no single grade below 6. The courses will usually be senior undergraduate courses at the 300 or 400-level; they will be chosen in consultation with the Chairman of the Department's Graduate Studies Committee. Advancement to candidacy status may be delayed until the student has passed the language examination.

(7) A student admitted as a Candidate for the M.A. must:

(i) write a thesis, the text of which should normally be not less than 100 nor more than 150 pages in length;
(ii) take and pass one 500-level bibliographical seminar (History 521-590 below);
(iii) take and pass History 602 (Philosophy of History and Historical Methodology), if the student does not already hold credit in an equivalent course acceptable to the Department; and
(iv) pass a language examination administered by the Department, if the student has not previously done so.

(8) All students proposing to proceed to the Ph.D. are admitted initially as Provisional Candidates. A Provisional Candidate must:

(i) take and pass two 500-level bibliographical seminars in History (though this requirement may be waived in whole or in part if these or similar seminars have been taken previously);
(ii) take and pass two 600-level seminars in History;
(iii) take and pass History 602 if the student does not already hold credit in this or in an equivalent coarse;
(iv) pass a language examination administered by the Department, if the student has not previously done so; in addition, the student may be required to pass a second language examination, but the Department never requires any student to pass examinations in more than two languages other than English; and
(v) submit a thesis proposal based on some preliminary research.

(9) When a Provisional Candidate has completed the requirements outlined in (8) above, normally not later than eighteen months after entering the program, he/she will be expected to pass written comprehensive examinations in two fields as defined in History 521-590. The comprehensive examination in each field will consist of two three-hour parts, which must be written on consecutive days. One part will test the student's knowledge of the general field; the other will test the student's depth of knowledge in a special area of that field defined in advance in consultation with the student's supervisory committee. These examinations are administered during two periods each year, in September or October and in March or April.

(10) If the Provisional Ph.D. Candidate passes written comprehensive examinations in both fields, he/she will be permitted to proceed to the oral candidacy examination. The two written examinations and the oral examination must all be attempted within the space of one month. Upon successful completion of the oral examination, the student will be advanced to formal candidacy for the Ph.D.

(11) A student who has been admitted to candidacy for the Ph.D. may proceed to the degree by completing a thesis, the text of which should normally be not less than 250 nor more than 400 pages in length.

(12) The Department annually appoints a number of Graduate Research and Teaching Assistants. History graduate students are also eligible for various University fellowships and bursaries. For details, see the Awards section of this calendar.

(13) Application forms, information about fellowships, bursaries, etc., and a departmental bulletin on *Higher Degrees in History* may be obtained from the Dean of the Faculty of Graduate Studies and Research. Requests for other information should be directed to the Chairman, Graduate Studies Committee, Department of History.

204.45.1 THE DEGREE OF LL.M.

(1) The Faculty of Law offers a program of graduate study leading to the degree of Master of Laws.

(2) Applicants for this program must hold the degree of LL.B. or its equivalent from this or some other university, of sufficient standard to satisfy the Dean of the Faculty that they will be capable of undertaking and profiting by the program. They must also meet the general requirements for admission to the Faculty of Graduate Studies and Research.

(3) All candidates for the degree of Master of Laws must complete at least one academic year, i.e., normally one academic session from September to May, in residence at the University. In special circumstances the Dean of the Faculty may prescribe some longer period, or may permit the required period of residence to be spread over two consecutive academic sessions.

(4) To obtain the degree of Master of Laws candidates must submit and defend a thesis on a topic selected by themselves, subject to the approval of the Dean, in addition to attending courses throughout two terms, the number and character of such courses to be determined in consultation with the Dean.

(5) A candidate may select courses from a broad spectrum of legal subjects offered in the Faculty of Law as well as relevant subjects in other Faculties.

(6) Financial assistance, including Intersession Term Graduate Fellowships, may be available to suitably qualified candidates. Such assistance will involve candidates in the performance of certain teaching or research duties in the Faculty of Law, though such duties will not impede candidates in the pursuit of their own studies. In addition, The University of Alberta offers certain scholarships to candidates of sufficiently high academic merit.

(7) Inquiries regarding programs, courses and financial assistance other than University scholarships should be made to the Dean of the Faculty of Law. Inquiries about University scholarships should be made to the Dean of the Faculty of Graduate Studies and Research.

204.45.2 GRADUATE COURSES

Graduate courses include those offered in the Faculty of Law and related disciplines which have been selected by a candidate in consultation with the supervisor and which have the consent of the Dean.

POSTGRADUATE DIPLOMA PROGRAM

(1) The Faculty of Law also offers a Postgraduate Diploma Program in Law for the fall and winter terms which may be of interest to members of Canadian law societies and other legally qualified persons.

(2) The program was designed to provide an extensive exposure to a limited area of the law and help prepare candidates as specialists in that area.

(3) The program will also provide candidates with the opportunity to become familiar with the most modern developments and to bring practitioners and other members of the legal profession up to date.

Admission Requirements

(4) Applicants for the Diploma Program must hold the degree of LL.B., or its equivalent, from an approved university and must have had a minimum of two years experience in the practice of law or in a related field.

(5) Acceptance in a Postgraduate Diploma program will be determined by the Faculty of Graduate Studies in consultation with the Committee of Postgraduate Diploma Studies of the Faculty of Law.

These courses will be selected by consultation between the candidate and the chairman of Postgraduate Diploma Studies of the Faculty of Law. The courses selected will be from the courses regularly offered by the Faculty of Law and will normally reflect a concentration in one particular area of the law.

(7) Candidates for the Postgraduate Diploma will not normally be permitted to take courses they completed for the degree of LL.B. This will apply to graduates of other universities as well as to graduates of the University of Alberta.

(8) With the permission of the Chairman and Committee on the Postgraduate Diploma Program, however, a candidate may take certain courses (e.g. Taxation, Land Use Planning) whose content has changed significantly since the candidate took the LL.B.

204.46 Library Science

204.46.1 HISTORICAL NOTE

The Faculty of Library Science, the only professional library school in the prairie provinces offers the Master of Library Science Degree.

The first classes in a Bachelor of Library Science program began in 1968. In 1970 the B.L.S. program was accredited by the Committee on Accreditation of the American Library Association and was thus recognized by the American and Canadian Library Associations as meeting library education standards.

In 1971 the Faculty initiated a Master of Library Science program for which the B.L.S. program was the qualifying year. In 1976, in keeping with the Canadian pattern of North American education for librarianship, the B.L.S. was discontinued, and the present two-year M.L.S. program was instituted.

As the first professional degree, the M.L.S. represents a program designed to develop the knowledge, understanding, attitudes, and skills that will prepare graduates for positions of responsibility in school, public, academic, and special libraries. The M.L.S. program was accredited by the American Library Association in January, 1979.

204.46.2 GOALS AND OBJECTIVES

The general goal of the Faculty is to provide learning experiences that will assist its graduates to assume responsibility and leadership in meeting the information needs of a changing society. The Faculty acknowledges its responsibility to provide such experiences based upon a continuous exploration or library functions and services, and its responsibility to undertake the necessary planning and research. These responsibilities include provision for the continuing education needs of practising librarians.

The specific objectives of the M.L.S. degree program are: a) To provide a theoretical and methodological base which will enable students to analyze problems, design solutions, and adapt library principles to changing social conditions; b) To prepare studends to select, organize, and disseminate information, and to develop and administer programs of service in the light of changing public needs and demands; c) To prepare students for professional positions in librarianship and cognate fields.

204.46.3 STUDENT ORGANIZATIONS

There is an organization for all students enrolled in the Faculty of Library Science. Students elect their own officers, with the presiding officer representing them at meetings of the Faculty Council. The organization provides liaison between students and facutly and encourages participation in a variety of academic, professional and extracurricular activities.

In addition to the regular student organization, there is an official University of Alberta Student Chapter of the American Society for Information Science (ASIS), which was founded by students in the Faculty of Library Science. The Chapter, which was chartered by ASIS Council in May, 1977, serves interested students in the Greater Edmonton area and provides special programs relating to modern methods of information processing such as computer-based procedures and reprographic techniques.

204.46.4 LABORATORY-LIBRARY

The Faculty of Library Science maintains a laboratory-library which provides, in addition to library space, facilities for group and individual work and study. The collection, designed to supplement that of the University Libraries, includes some 10,000 volumes and a full range of audio-visual materials. The collection is composed of standard library and information science texts, sample reference and selection tools, periodicals, annual reports, and materials for children and young people.

Faculty Computing Facilities

The Faculty of Library Science has three terminals, two print terminals (one stationary, the other portable) and a CRT terminal. All operate at 30 characters per second through acoustic couplers and standard voice-grade telephone lines. They are available to faculty members and students for instruction, research, and demonstrations, both with the University's computing facilities and also with external data bases. Access is routinely provided to such external services as those of Lockheed, Informat (SDC), OCLC, CAN-OLE, and others.

204.46.5 ADMISSION REQUIREMENTS FOR M.L.S. PROGRAM

(1) The applicant must have a Bachelor's degree from a recognized institution of higher learning, with academic standing acceptable to the Faculty of Graduate Studies and Research and the Faculty of Library Science. In some instances the University is prepared to admit students who have achieved high scores on the Graduate Record Examination Aptitude Tests.

(2) In preparing for a Master of Library Science degree program, students are advised to include courses distributed among the social sciences, biological and physical sciences, literature and other areas of the humanities, and also to major in one of these subjects.

(3) A reading knowledge of a modern language other than English is advisable. Reading knowledge is assumed if a student has completed French 200, German 200, Russian 300, or, at an equivalent level, any other modern language acceptable to the Faculty of Library Science. French, German, and Russian are particularly useful in bibliographic work.

(4) An applicant whose native language is not English is normally required to present a score of at least 600 in the Test of English as a Foreign Language (TOEFL) administered by Educational Testing Service, Box 593, Princeton, New Jersey 08540. Students should arrange for the testing agency to report results to the Faculty of Library Science, which will judge whether or not the results are satisfactory.

Having been designated as an official test centre, The University of Alberta is able to offer a series of TOEFL test administrations throughout the year. Six Special and six International examinations are held each year. Further information and application forms may be obtained from the Examinations and Timetabling Division, Office of the Registrar, Rm. 123, Administration Building, University of Alberta.

(5) All applicants with degrees from other countries must take the Graduate Record Examination Aptitude Tests administered by the Educational Testing Service. Students should arrange for the testing agency to report results to the Faculty of Library Science, which will judge whether or not the results are satisfactory.

(6) Preference is given to applicants who have had library experience under professional supervision before registration. Such experience tests a candidate's aptitude for library work and gives some knowledge of library terminology and processes.

(7) Applicants are judged not only upon their academic record but also by their professional promise as indicated in three letters of reference. A personal interview, arranged at a time and place convenient to the applicant, may also be required.

(8) Since there is a quota on the number of students in the Faculty of Library Science, The University of Alberta cannot guarantee admission to the Faculty for all fully qualified applicants.

204.46.6 APPLICANTS WITH THE B.L.S. DEGREE

Applicants with a B.L.S. degree from an accredited library school or its equavalent, and an academic record acceptable to the Faculty of Graduate Studies and Research and the Faculty of Library Science will normally be admitted as Candidates for the M.L.S. degree and should be able to complete the required work in one year.

Students who cannot enroll in at least three half-courses per term (full-time attendance), and whose employment relates directly to their academic studies, may petition the Faculty of Graduate Studies and Research to have the normal residency requirement waived. Petitions should be made through the Dean of the Faculty of Library Science.

204.46.7 APPLICATION FOR ADMISSION

All applicants are required to submit a Faculty of Graduate Studies and Research Application for Admission form to the Registrar. In addition, applicants who are not graduates of The University of Alberta are required to pay a $12.00 application fee and to arrange for the Registrars of the universities they attended to send official transcripts of their records to The University of Alberta Registrar.

Each applicant, when notified that his/her application has been accepted, shall pay a *deposit of $50.00* to The University of Alberta. This amount will later be applied on his/her fees if he or she registers, or be forfeited in full if he or she fails to register.

204.46.8 CLASSIFICATION OF LIBRARY SCIENCE STUDENTS

Students admitted to the first year of studies in library science are classified as qualifying graduate students. Upon completion of the first year of work students will be reclassified as either probationary graduate students or as candidates for a master's degree (Category A). See § 202.2.

Students admitted to the program who already hold the B.L.S. degree are classified as probationary graduate students or as candidates for a master's degree.

204.46.9 REGISTRATION

Particulars will be provided when a student is officially admitted to the Faculty. On entering the M.L.S. program, all students will be assigned a faculty advisor who will assist them in planning their course of studies.

204.46.10 ACADEMIC STANDING

The Faculty of Library Science adheres to the regulations of the Faculty of Graduate Studies and Research as outlined in § 202.4.

204.46.11 ACADEMIC APPEALS AND GRIEVANCES

A student who believes he or she has an academic grievance should first approach the instructor concerned. Failing satisfaction, he or she should then take his/her case to his/her Faculty advisor and then the Dean of the Faculty of Library Science and the Dean of the Faculty of Graduate Studies and Research in that order. Beyond this, the appeal should be made directly to the Academic Appeals Committee of the General Faculties Council. (See also § 16.7 "Appeals and Grievances" as found in the University Regulations and information for Students Calendar).

204.46.12 THE DEGREE OF M.L.S.

The Faculty of Library Science offers a two-year (four-term) program for university graduates leading to the degree of Master of Library Science (M.L.S.).

A full time student who is registered for the M.L.S. degree program will normally be able to complete degree requirements in two years. During the qualifying year students will be required to take five full courses or their equivalent (ten half courses). During the candidacy year students will be required to take the equivalent of ten half courses, and spend a minimum of two terms in full-time attendance. Students may, with approval, include up to two full courses in a faculty other than the Faculty of Library Science. The program includes provision for both a thesis and non-thesis option.

Credit for courses taken elsewhere may be granted as advanced credit by the Dean of the Faculty of Graduate Studies and Research on the recommendation of the Faculty of Library Science provided that the courses have not been counted towards a previous degree or diploma. (Please note the special provision for applicants with the B.L.S. degree. See § 204.46.6)

Inquiries regarding program and course details and financial assistance other than University scholarships should be made to the Dean of the Faculty of Library Science. Inquiries about University scholarships should be made to the Student Awards Office.

(2) Candidates for the M.Sc. must have an Honors degree or equivalent from a recognized university, with a strong background in Mathematics and/or Statistics. Candidates holding a Pass degree will be required to take additional courses either concurrently with their graduate program or prior to admission as a M.Sc. candidate.

(3) The minimum requirement for the M.Sc. degree is either six single-term graduate courses (or equivalent) and a thesis or eight single-term graduate courses (or equivalent), and a project. Approval of the chairman of the Mathematics Department is needed to take graduate courses that are not in Mathematics or Statistics. The M.Sc. program will normally be completed in 20 months but it can be done in a minimum of one year.

(4) To be admitted as a provisional candidate for the Ph.D., a student must normally hold the equivalent of the M.Sc. in Mathematics from The University of Alberta. In addition to the examinations called for by the general regulations, a qualifying exam must be taken at the end of the first year as a provisional candidate. The principal requirement for the Ph.D. is a substantial contribution to knowledge, embodied in a thesis. Except in very special cases every Ph.D. student will be required to take a minimum of seven graduate courses after the B.Sc. (Honors) degree or equivalent. In any case, one of these courses must be a full year 500-level or 600-level Mathematics course in an area other than that of the student's thesis. The program of a full-time student who is a Provisional Candidate for the Ph.D. shall normally include at least three mathematics courses, or courses in approved or allied fields (graduate or undergraduate) in the first year, at least two in the second year, and at least one in each additional year. Candidates will spend at least two years in advanced study and research after the master's degree.

(5) Courses taken in other departments depend upon the field of interest of the candidate.

(6) Candidates for the Ph.D. degree must satisfy the Department that they have a competent reading knowledge of two of French, German, or Russian.

(7) Graduate Assistantships are available for candidates working towards a higher degree. They involve at most twelve hours of work per week including teaching, class preparation and working time. Research Grant Assistantships are also available.

(8) Prospective graduate students should consult both the Chairman of the Department and the staff member in charge of the field in which they are particularly interested.

(9) Each student, on admission for graduate work in the Department, will have an advisory committee. The committee will determine, supervise and modify the student's program of study and research. In order to qualify for a degree, the student must satisfy the general requirements of the Faculty of Graduate Studies and Research, and the special departmental requirements described above, and must satisfactorily complete the program set up for him/her by the advisory committee.

204.49 Mechanical Engineering

204.49.1 THE DEGREES OF M.ENG., M.SC. AND PH.D.

(1) The Department of Mechanical Engineering offers postgraduate courses and provides research facilities for well-qualified students of recognized universities who wish to pursue advanced studies leading to the M.Eng., M.Sc., and Ph.D. Areas of study include Applied Mechanics, Thermodynamics, Fluid Mechanics, Gas Dynamics, Heat Transfer, Combustion, Design, Biomedical, Industrial Engineering and Welding Engineering and Oil Sands.

(2) The normal requirement for a Master of Engineering program is credit in ten single-term courses, five of which must be in the candidate's major field, plus a project equivalent to two single-term courses. A candidate may complete a Master of Engineering program in a minimum of nine months. The minimum residence required is one term for a B.Sc. graduate with at least one year of post-B.Sc. experience, and one session for a B.Sc. graduate with less than one year of post-B.Sc. experience. The maximum time permitted for completion of a Master of Engineering program is four years from the date of first registration.

(3) For the Master of Science program the candidate must have satisfactorily completed a minimum of five single-term courses (additional courses may be required on advice of student's supervisory committee), plus a thesis acceptable to the Department of Mechanical Engineering and the Faculty of Graduate Studies and Research.

(4) For the Ph.D. program, all requirements of the Faculty of Graduate Studies and Research must be met. In addition the Department normally requires that the candidate must have satisfactorily completed approved courses in a major field and at least one minor field. The minimum requirements after a Bachelor's degree are ten single-term courses, five of which must be in the major field, plus research leading to a thesis of high calibre. For those students entering the Ph.D. program after a Master's degree the minimum course requirement is five single-term post Master's courses. As part of the requirements for admission to candidacy for the Ph.D. the provisional candidate will normally have to pass departmental comprehensive examinations (either oral or written) embracing the major field which will be arranged in consultation with the Department. Candidates may also have to satisfy the Department that they have a reading knowledge of a foreign language selected by the advisory committee.

(5) In each of the programs certain courses are required by the Department. Lists and details of required courses may be obtained from the Department.

(6) Financial assistance is available in the form of scholarships and fellowships (see Awards section of this Calendar) and through the Department in the form of Graduate Assistantships and Contract Research (available for Canadian students and students holding a valid work permit). The assistantships are available on a full-time or part-time basis with remuneration according to the student's qualifications and the hours of service. Summer assistance can usually be arranged for students without scholarship support who continue their research through the summer months.

(2) Well equipped facilities are available for a limited number of graduate students. Areas of specialization include: administration, physiology of exercise, sociocultural, psychology of sport, motor performance, and history.

(3) Requirements for admission conform with the general regulations of the Faculty of Graduate Studies and Research.

(4) Students enrolling in the M.A. degree program have the option of electing between a non-thesis or thesis degree route. A thesis M.A. is designed to prepare the student for entrance into a Ph.D. program. A non-thesis M.A. is designed to prepare the student for a career such as service in public and private agencies, or to provide an opportunity for experienced graduates to up-date their education.

(5) Students entering the non-thesis M.A. route must possess a Bachelor of Physical Education degree or equivalent and are expected to have a minimum of three years' experience in the field of physical education or recreation.

(6) The normal requirements for the M.A. thesis degree or the M.Sc. degree are the completion of four to six courses in addition to the thesis.

(7) Students enrolled in the non-thesis M.A. program must complete, as a minimum, two full courses above those required of a student with an equivalent academic background but pursuing the M.A. thesis degree. A significant piece of scholarly writing is to be submitted in lieu of the thesis.

(8) Course requirements for the Ph.D. program depend upon individual circumstances and must be approved by the Department of Physical Education. The main emphasis is on research leading to the dissertation.

(9) Depending on qualifications, the candidate for the master's degree should anticipate one to two years for completion. The Ph.D. degree will normally require two to three years beyond the master's level.

(10) Graduate Assistantships are available to a limited number of students.

204.67 Physical Therapy

204.67.1 THE DEGREE OF M.SC.

(1) *Purpose of the Program:* To prepare physical therapists for leadership roles in academic, clinical, and laboratory settings by preparing them to undertake research to establish the effectiveness of various approaches to treatments used by physical therapists and by so doing, develop a strong scientific framework for the discipline of physical therapy.

The program has been designed in response to increased demands by academic and clinical institutions for therapists educated above the present baccalaureate level. It provides persons holding a baccalaureate degree in physical therapy with an opportunity for advanced study in their own field. The program at The University of Alberta offers advanced training in orthopaedics, sports therapy, therapeutic exercise, and other physical therapy specialty areas.

(2) *Entry to the Program.* To meet the requirements of the Faculty of Graduate Studies and Research, applicants must have a Grade Point Average (G.P.A.) of at least 6.0 in the last two years of their physical therapy baccalaureate program at The University of Alberta or an equivalent qualification from another institution. Applicants will be judged not only on their academic record, but also on their professional potential as indicated in letters of reference, interviews, and other supportive material; and they must also normally have had at least one year of clinical experience prior to being accepted into the program. It is possible to enter the program in January, May or September.

(3) *Format of the Program.* The proposed program normally takes two years. The Faculty of Graduate Studies and Research requires that a minimum of one academic year (8 months) must be spent in residence for a Master of Science Degree. Thus it may be possible to complete the program in less than two years depending on student's academic background.

During the first year of the program students are expected to select a pattern of courses in a particular area of interest which will enable them to bring their previous educational background in physical therapy

and associated fields to an advanced level, to enable them later to engage in meaningful research within that area.

In order that students may design a program which fits their particular needs, the Department of Physical Therapy requires only one compulsory course — PTHER 500: Research Seminar.

Students are required to pass a general competency examination in physical therapy. Normally, the examination takes place between the first and second year of the program. The examination, which may be oral or written, is under the direction of the Chairman of the Department of Physical Therapy or his/her designee, and the examination committee consists of members of the physical therapy teaching staff.

During the second year of the program, the student focuses on the development of research skills through appropriate course work in research methodology, directed study and activity with an in-depth exploration of his/her particular area of interest under faculty guidance.

Normally, the course requirements for the degree of Master of Science in Physical Therapy are four to six full courses, or their equivalent, at graduate level, in addition to the thesis. Students, in consultation with their advisor, will design a program of studies suitable to their particular needs and interests with course requirements being based on students' previous training and anticipated needs in their area of interest. Courses from other departments may be accepted as part of a student's total program. Some undergraduate course work may be contained in a student's program, providing that a minimum of four full graduate courses, or their equivalent, are also included. Credit for courses taken elsewhere may be granted Advanced Credit by the Dean of Graduate Studies and Research upon recommendation of the Department of Physical Therapy provided that the courses have not been counted towards a previous degree or program.

Each student will be required to complete a thesis based on independent investigation. The thesis will carry a weighting equivalent to at least 2 full graduate courses.

Theoretical Physics: Solid state, physical acoustics, nuclear physics, elementary particles, field theory relativity, gravitational theory.

Other Areas: Radiation and medical physics, biophysics.

(3) Individual programs will be arranged in consultation with the Associate Chairman of the Department of Physics and members of the Department.

(4) A number of Graduate Assistantships are available and these range from $5,900 (for M.Sc. candidates) to $6,750 (for Ph.D. candidates). Applicants are considered automatically for this assistance when they are accepted in the graduate program. In addition to the above, a certain number of research supplements to the value of $1,900 are available during the summer.

(5) For an M.Sc. program in experimental physics a minimum of two full courses or equivalent is generally required by students with the equivalent of the Honors B.Sc. degree of The University of Alberta. For students in a theoretical program the minimum course requirement is three full courses or equivalent including Physics 680 and 682 or 684. A small research project, the results of which are presented in a thesis and an oral examination are also required. The program is designed so that it may be completed in one year under normal circumstances. A supervisory committee of three faculty members is appointed for each graduate student and in May of the first year of the program they make a formal recommendation on the candidate's potential in graduate work. At this time students may in certain cases be permitted to transfer directly to a Ph.D. program if their progress warrants it.

(6) *The Ph.D. program.* Students in an experimental program are required to take a minimum of five full session graduate courses or equivalent including Physics 680 after the equivalent of the Honors B.Sc. degree of The University of Alberta. These include the courses required for the M.Sc. program. An exception is made in the case of the Geophysics program where Physics 571 may be substituted for Physics 680. For the Theoretical program there is a minimum of six full session courses or equivalent after the Honors B.Sc. level including Physics 680, 683, 684 and 685. All students in the Ph.D. program are advised to take at least two half courses in fields of study different from their own research areas. When the course requirements are successfully completed and his/her research is well advanced, each Ph.D. student must pass an oral candidacy examination. The student's research is presented in thesis form and orally to an examining committee. The minimum time for a Ph.D. degree is three academic years of study and research after the Honors B.Sc. degree or two academic years after the equivalent of the M.Sc. degree at The University of Alberta.

(7) Information may be obtained by writing the Associate Chairman of the Department of Physics.

204.73.1 THE DEGREE OF M.SC.

(1) Facilities exist within the Department of Radiology, University Hospital and The University of Alberta, for students who wish to proceed to the Master of Science degree.

(2) Research may be carried out in the following fields:

(i) Radiological aspects of Nuclear Medicine.
(ii) Clinical or Basic Radiology.
(iii) Health Physics.
(iv) Radiological Physics (arranged in co-operation with the Physics Department).
(v) Instrumentation.
(vi) Ultrasonic Diagnosis.
(vii) Alternative imaging modalities.

(3) Entrance requirements are graduation in Medicine for the clinical research areas, and in the appropriate scientific disciplines for the other research studies.

(4) Appropriate course work to be decided upon in conjunction with the Chairman of the Department or Director of Diagnostic Radiological Research.

(5) Length of the program is one or two years.

(6) Support can be obtained from several grant-awarding agencies for work in these areas.

(7) Inquiries should be directed to the Chairman of The Department or the Director of Diagnostic Radiological Research, Department of Radiology, University of Alberta Hospital, Edmonton.

204.74 Romance Languages

204.74.1 THE DEGREES OF M.A. AND PH.D.

(1) Graduate work leading to the degrees of M.A. and Ph.D. may be taken in the major areas of Romance Linguistics, French, French-Canadian, Italian and Hispanic Literatures. (M.A. only in Italian and French-Canadian.)

(2) Two M.A. routes are available in French, a thesis M.A. (Literature) and a non-thesis M.A. (Translation).

(3) The master's degree French-Canadian or Spanish or Italian requires three courses over and above the eight courses of an Honors program in that field, for a total of eleven courses, plus the thesis (a student presenting five courses may enter as a Qualifying Graduate Student).

(4) Two M.A. routes are available in Romance Linguistics; a) a thesis M.A. designed to prepare the student for entrance into a Ph.D. program; b) a non-thesis M.A. designed to prepare the student for careers such as Community College teaching.

(5) The M.A. or an equivalent degree from a recognized university is normally required for admission to the Ph.D. program. The Ph.D. in French Literature requires four courses in the literature of the graduate field of specialization and the doctoral thesis, as well as the fulfilment of such pre-candidacy requirements as may be determined by the supervisory committee. The Candidacy Examination will be taken in the major Literature only. Students working towards the Ph.D. in Hispanic Literature are required to take four graduate level courses in the literature of the field of specialization, to pass the prescribed departmental and faculty candidacy examinations, and to complete the doctoral dissertation. The Faculty Candidacy Examination is an oral examination of the field of specialization on the basis of a reading list drawn up by the candidate and the supervisor and approved by the supervisory committee. Prior to the Faculty Candidacy Examination, the following departmental requirements must be fulfilled: students must write the prescribed examinations in the literature of the field of their specialization, and they must have already demonstrated a competent reading knowledge of a second Romance language and literature, the latter to be examined orally on the basis of a prepared reading list. (Latin will be accepted in lieu of a second Romance language.) Students working towards the Ph.D. in Romance Linguistics are required to take a minimum of four graduate level courses. Doctoral studies in Romance Linguistics require proficiency in one Romance language, plus linguistic work on three Romance languages (Latin may be substituted for one of the preceding), plus a reading knowledge of a language other than English or a Romance language, plus a pre-candidacy research paper. Some knowledge of Latin is strongly recommended.

(6) Graduate Assistantships, and Third Term (May to August) Assistantships are available. Non-thesis students are not eligible for Third Term Assistantships.

(7) Prospective candidates should direct their inquiries to the Associate Chairman of the Department.

215.2 General Information

The Faculty of Extension serves as a link between the University and its storehouse of information and expertise for people of the Province who need access to this information and these skills in order to solve practical problems and to further personal growth and personal interests.

In order to accomplish its task, the Faculty offers courses, seminars, and materials in various forms to members of the Provincial community in the areas of business, fine arts, the humanities, the professions, the sciences, and through the provision of books, films, tapes, and educational media equipment. Faculty members are also involved in consulting, training, and research in adult education.

Details of the programs and services offered by the Faculty are outlined below.

216.1 Extension Library

The Extension Library provides a service to residents of rural Alberta who have no public library in their communities. It has a book collection of over 80,000 volumes which provides intellectual, educational, recreation and leisure reading for its patrons. Books are sent by mail to individuals and families, and in boxes of twenty to small libraries and community groups. The Extension Library is also a major collecting centre for inter-library loan requests, and has access to the University's main library to support this function.

The Library supports Extension courses in a wide variety of subjects through its close co-operation with the Adult Student Centre in Corbett Hall.

216.2 Educational Media

An Audio-Visual Library containing some 4,500 16mm films, more than 4,100 recordings, and 2,800 audio cassettes is maintained. A variety of projectors and recording playback equipment is available as well.

An educational media reference file provides data on the nature, availability, and uses of various types of educational media, and, in addition, on developments in educational television and programmed learning. This reference service is also designed to meet the needs both of teachers and of a wide variety of community groups.

With the support of educational media facilities, the Faculty provides formal and informal courses in the principles and techniques of audiovisual communication in Edmonton and throughout the Province.

216.3 Adult Student Centre

The Adult Student Centre combines the resources of a media centre and a meeting place for small groups. The media includes books, journals, records, tapes, and filmstrips. Listening and viewing points for individual use of audio-visual materials are provided. Books and journals relate to the field of continuing education including adult counselling, teaching methods, community development, human resources development, and to broad areas covered by Extension courses.

The Centre is open to formal and informal groups for meetings as well as to Extension students and the general public.

Members of the public may borrow printed materials for a subscription of $2 per year. Extension students may borrow this material free of charge.

216.4 Public Administration Training

Certificate Courses in Local Government Studies and Public Administration Studies provide the necessary training required by administrators in the public sector. In addition, this segment of the Faculty is responsible for major conference courses held annually at Banff.

The needs of local government officers for special training are met through a combination of correspondence courses and tutorial sessions.

Federal and Provincial administrators are provided with evening or daytime lecture courses in the Public Administration Certificate Program. Since 1966, this curriculum has expanded to provide public administrators with a variety of courses addressing both theoretical and practical concerns of administration.

216.5 Fine Arts

Part-time and full-time instructors in painting, ceramics, drawing, photography, and printmaking offer a variety of courses in the fine arts at Edmonton. In addition, the Faculty conducts classes in drawing, painting, and composition at a number of centres throughout the Province. Instructors of national and international reputation are invited to Edmonton to offer intensive short courses in painting during the summer.

216.6 Liberal Studies

Liberal studies includes in its scope evening and daytime programs, short courses, seminars, and workshops in the humanities, languages, applied behavioral sciences, and public affairs. New course and program patterns to suit the circumstances of collective and independent adult learners, in conjunction with the Extension Library and Educational Media. Faculty in this area provide consultative and organizational service to other groups and institutions, urban and rural, engaged in or concerned with the liberal education of adults.

216.7 Community Resources Development

Towards this end, experiential training programs, conferences, workshops, and consultative services are offered in the areas of leadership development, agricultural technology, community development, urban studies, socio-economic development, and group dynamics.

Public issues including agricultural policy, social and economic development policy, and urban affairs are topics of study in many other programs.

A particular effort is being made to support the Provincial Government and native organizations in their efforts to improve the social and economic position of people of native ancestry.

The work of this section is carried out in close co operation with many public and volunteer organizations.

Publications prepared by the Faculty of Agriculture and Forestry and Plant Industry Division of Alberta Agriculture are distributed by this area of the Faculty.

216.8 Business and Professional Training

Business and professional continuing education provides opportunities for adults to refresh and update th knowledge they require to perform effectively in the

vocations. The main thrust of the work is in the area of management education and specialized programs of continuing education for various professional groups. This work is carried out through the initiating, developing, and offering of courses. The format for courses includes informal evening and day-time classes, seminars, and short courses — some residential in nature — based on new research. Courses are also offered which lead to University Certificates in Computers and Business Data Processing, Management Development, Personnel Administration, Employee Benefits Administration, and Real Estate. The staff consult with members of the business and professional community to ascertain their needs for continuing education. At the same time they work closely with other members of the University faculty to develop programs which will, in the most effective way, meet these needs.

222.2 *Undergraduate Awards*

222.2.1 GENERAL INFORMATION

Application forms for bursaries or for scholarships which require application, may be obtained from the Administrator of Student Awards. For undergraduates the due date for completed application forms in most cases is June 1. Where no application information is listed, the award is made automatically without application.

Normally, unless otherwise stated, these awards are based on a full normal load of academic work done only at this University. Where an award is listed in a particular faculty it is generally tenable in that faculty (except course prizes which are open to any full-time student in that course). In order that awards may be equitably distributed, no student may hold more than one major scholarship award in a given year.

Awards will be announced as they are made from May through to September.

Unless otherwise stated, monetary awards, except certain cash prizes, are contingent upon the student's proceeding with his, or her, university program in the immediate next academic session, and are payable only when the student is in actual attendance at the University. The payment of fees is a first charge against such awards.

The University assumes liability for the payment of scholarships, bursaries, prizes and other awards only to the extent that gifts from donors or returns from particular investments for these purposes will permit.

For matriculation awards refer to § 222.1 and the Matriculation awards listed under specific faculties in § 223.

For awards in graduate study refer to the Graduate Studies section of the Awards Calendar or the Graduate Studies and Research Calendar.

224 AWARDS IN THE FACULTY OF GRADUATE STUDIES AND RESEARCH

224.1 General Information

The following Scholarships and Fellowships are awarded primarily on the basis of academic standing. In general, awards are made only to applicants whose previous academic standing is either First Class or high Second Class. Students admitted to the "Qualifying year" are not eligible for scholarships or fellowships.

Unless otherwise stated, awards are for one year only, but application for renewal will be considered in open competition. No award will be made to other than a full-time student. Unless otherwise stated, awards are tenable only at The University of Alberta.

Unless the terms specify otherwise, awards of less than $3,000 will be paid over the eight-month academic term beginning September 1. Awards of more than $3,000 will be paid over twelve months starting May 1 or September 1.

In order that awards may be equitably distributed no student may hold more than one major award in a given year. A major award is defined generally as $3,000 or more for eight months or $4,000 for twelve months. Holders of major awards may accept, in addition, minor awards up to a maximum of $1,000.

Holders of major awards may not accept a teaching or other assignment involving more than the equivalent of eight hours per week during the academic session or a total of 200 hours during a twelve-month period. This is generally considered to be a two-third assistantship or its equivalent. It may be spread over the full 12 months or may be concentrated in any part of the 12 month period. Notwithstanding the above, holders of major awards must not be prohibited from matching the income of a full G.Ap. by combining a part G.Ap., where applicable, with a major award, provided that the donor agency regulations allow this. Holders of Dissertation Fellowships may not accept any such duties.

Holders of awards must pay regular tuition fees unless otherwise stated.

All Fellowships, Scholarships, Assistantships etc. are subject to Canadian Income Tax.

228 CANADIAN ARMED FORCES SUBSIDIZATION PLANS

228.1 General Information

The high professional ability required of present day military officers demands the best in education and training. The Department of National Defence therefore sponsors programs of university education and leadership training for selected young men and women who have the potential to become officers in the Canadian Armed Forces. The admission standards are high, but for those who qualify the way is open to a challenging and rewarding career.

The programs sponsored are the Regular Officer Training Plan, (ROTP), Medical Officer Training Plan, (MOTP), Dental Officer Training Plan (DOTP) and Reserve Entry Training Plan (RETP). Training given under these plans is divided into two parts: normal attendance at university throughout the academic year and military training each summer.

228.2 Regular Officer Training Plan

This plan combines university subsidization with career training as an officer in the Regular Component of the Canadian Forces. Successful applicants are enrolled in the rank of Officer Cadet. They are required to maintain a good standing both academically and militarily while in the plan. All tuition and other essential fees are paid by the Department of National Defence. In addition the Officer Cadet receives an annual grant to purchase books and instruments, and is paid for personal and living expenses. This increases annually. Free medical and dental care is provided. Annual leave (20 working days) with full pay and allowances may be granted each year, usually after the summer training period.

228.3 Medical Officer Training Plan

The Medical Officer Training Plan provides, at public expense, academic and internship training of not more than three years and nine months of the final medical studies, including compulsory internship, for undergraduates of Canadian medical schools who enrol in the Canadian Forces for service as Medical Officers. It consists of paid tuition, an annual book and instrument grant, complete medical and dental coverage, paid holidays and monthly pay of 2nd Lieutenant. Three years military service in the Canadian Armed Forces starting with the rank of Captain, is required upon obtaining your licence to practice medicine.

228.4 Dental Officer Training Plan

Sponsorship is provided under the Dental Officer Training Plan during the 1st, 2nd, 3rd and 4th year of dentistry. Subsidization consists of paid tuition, an annual book and instrument grant, complete medical and dental coverage, paid holiday and monthly pay for personal and living expenses. Four years military service in the Canadian Armed Forces starting with the rank of Captain is required upon receiving your licence to practice dentistry. Three years obligatory military service applies for successful candidates who are sponsored for three years or less.

228.5 Reserve Entry Training Plan

This plan provides an opportunity for selected undergraduates to prepare themselves for promotion to commissioned rank in the Reserve Component of the Canadian Forces. They are selected during the later months of the University year by the local Reserve Unit and are enrolled as Officer Cadets in the Primary Reserve. Cadets receive pay for training completed at local Reserve Units during the academic year (up to 15 days) and at training bases during the summer (up to 16 weeks).

228.6 Admission Requirements

An Applicant must:

(a) be a Canadian citizen;

(b) be physically fit for enrolment in the force; and

General Information

241 UNIVERSITY HISTORY AND TRADITIONS

241.1 Historical Sketch

241.1 INTRODUCTORY

The University of Alberta is a publicly supported, co-educational institution, sharing with the Universities of Calgary and Lethbridge, and Athabasca University, the sole right of conferring degrees, other than degrees in Divinity, within the Province of Alberta. It is a member of the Association of Commonwealth Universities and of the Association of Universities and Colleges of Canada.
tion of Universities.

The University's main campus of 154 acres borders the wooded southern bank of the North Saskatchewan River and lies about two miles from Edmonton's business centre. The University Farm of approximately 700 acres is the largest property away from the main campus but other holdings include the botanical gardens near Devon and lands as far distant as Fort Assiniboine. A considerable area is held under rental agreements, including the Ellerslie farm and the Kinsella ranch.

Some two dozen major teaching and research buildings are situated on the campus as well as two affiliated colleges, six halls of residence, the Students' Union, and service buildings. Michener Park, once part of the University Farm, is a student housing area. South of 87th Avenue, on lands formerly part of the original campus, are the quarters of the Research Council of Alberta, the Provincial Laboratory of Public Health, two teaching hospitals, the Edmonton Veterans' Hospital, the Aberhart Sanatorium, the Dr. W. W. Cross Cancer Institute, and the Northern Alberta Jubilee Auditorium.

241.1.2 THE BEGINNINGS OF THE UNIVERSITY

Alberta became a province in 1905. In 1906 the first session of her legislature passed an act to authorize the establishment of The University of Alberta. The act's sponsor was Alexander Cameron Rutherford, Alberta's first Premier and first Minister of Education. His government purchased the site in what was then Strathcona, and Dr. Rutherford himself persuaded Henry Marshall Tory to leave McGill to become the University's first President, an office he held from 1908 to 1928.

The Act permitted all resident graduates of British and Canadian universities to register as members of Convocation. Convocation elected five members to a Senate; the government appointed ten more. The Senate, acting as the governing body of the University, established the Faculty of Arts and Science as the core of the new institution. In 1910 a revision of the *University Act* constituted the Board of Governors, with powers of business management and administration.

Classes opened in September, 1908, in what is now Queen Alexandra School with forty-five students and a faculty of five: W. H. Alexander, Classics; E. K. Broadus, English; W. M. Edwards, Mathematics; L. H. Alexander, Modern Languages; and Dr. Tory himself. Thence they moved to the upper floor of Strathcona Collegiate Institute and then in 1911 to Athabasca Hall. Athabasca not only served as residence for staff and students, but also accommodated classrooms, laboratories, the library, the gymnasium, and the administrative offices. The members of the first graduating class received their degrees at the Convocation of 1912, with Mr. Justice C. A. Stuart presiding as Chancellor.

A period of rapid growth followed, with registration reaching 439 in 1914. Assiniboia Hall was completed in 1913, Pembina Hall in 1914, and the Arts Building was formally opened in 1915. The Faculty of Law had its beginning in 1912. In the same year the Department of Extension initiated its work of promoting a closer relationship between the University and the people of the province. In 1913 the Faculty of Applied Science (in 1948 renamed Engineering) and the Faculty of Medicine were instituted, the latter able to offer three years of a five-year program.

The Students' Union was established during the first session and the first edition of *The Gateway*, the students' newspaper, appeared in 1911. The Committee on Student Affairs began in 1912 as a joint committee of students and University officials to exercise general supervision over matters affecting student welfare and discipline. Today the Council on Student Affairs carries on its work.

241.1.3 YEARS OF CHALLENGE: 1914 TO 1945

The outbreak of war in 1914 slowed the pace of development. The new University sent 438 of its staff, alumni, and students to the armed forces. Eighty-two were killed or died on active service. Their names, together with those of the casualties of the war of 1939-45, are commemorated on a bronze tablet near the entrance to Convocation Hall.

Although the war brought a halt to the building activity, the organization of the University's teaching moved on with the establishment of the Faculty of Agriculture in 1915, the School of Accounting (later the Faculty of Commerce) in 1916, the School of Pharmacy and the sub-faculty of Dentistry in 1917, and the Department of Household Economics in 1918.

With the end of the Great War the University rapidly expanded in number of students and staff. New laboratory facilities were built adjacent to the Arts Building, and the Medical Building was completed in 1921 in the form it had until new wings were added following the war of 1939-45. The curriculum was fundamentally revised in 1919-1920 to permit greater freedom in election of courses. The first summer session was held in 1919. The institution of the Research Council of Alberta signified not only an increasing emphasis on science, but a further recognition of the University's involvement in the development of the province. In 1927 St. Joseph's College was opened under Roman Catholic auspices. St. Stephen's College had, as Alberta College South, been the first building on the campus. It was renamed in 1927 after the union of the Methodist and Presbyterian churches and became the United Church theological college for Alberta.

The depression years brought serious problems. Though registration did not decline, its increase was painfully slow, from 1,560 students in 1929 to 2,327 in 1939. Full-time teaching staff increased even more slowly. The budget actually fell and did not recover to its pre-depression level until after the war. No new

building took place after the present Corbett Hall was completed. (Corbett Hall was originally constructed as a provincial normal school, not a University building.) Dr. R. C. Wallace succeeded President Tory in 1928, and in 1936 was followed by Dr. W. A. R. Kerr, who had been the first Dean of the Faculty of Arts and Science. The affiliation of Mount Royal College in 1931 marked a new beginning of university work in Calgary. The Banff School of Fine Arts opened in 1933 and the Western Board of Music was established in 1931. Entrance to the University from Grade XI was abolished in 1937. In 1930 fraternities were permitted; a less controversial change was the abolition of the old practices involved in freshman initiation.

The impact of the war of 1939 was very different from that of 1914-18. Though war naturally disrupted the University's life, there was a determination to preserve its essential being while using its facilities as fully as possible in relation to the national effort. The Air Force took over the three residences and out-of-town students, whose number had not substantially declined, flocked into Garneau boarding houses and made use of a new cafeteria, known to later generations as Hot Caf (which was demolished in 1969 to provide the site for the Central Academic Building). Medicine, Dentistry, and Education offered accelerated courses. Engineering offered special courses to members of the armed services. No more important development took place than the acceptance in 1945 by the University of sole responsibility for the training of Alberta teachers. The school of Education, established in 1928, became a faculty in 1942, and after the war it became, in terms of enrolment, the largest in the University.

Dr. Robert Newton was named President on Dr. Kerr's retirement in 1941. He played an important part in the framing of the University Act of 1942, which transferred from the Senate to the General Faculty Council jurisdiction over academic matters and vested all final authority in the Board of Governors, whose jurisdiction had previously been confined to finance. No major changes in the University's constitution occurred until the Act of 1966 provided for the establishment of other and separate provincial universities under a Universities' Commission, since disbanded.

241.1.4 YEARS OF EXPANSION: 1945 TO 1969

With the end of the war, a flood of veterans poured into the University and registration rose from 2,023 in 1943-44 to a peak of nearly 5,000 in 1947-48. Accommodation in classrooms, laboratories, and libraries was pathetically inadequate, and housing was generally even less satisfactory. Army huts only partially relieved the pressure. While by 1947 student numbers had tripled from pre-war figures, the full time teaching staff did not even double. Thereafter the pace of campus development slowly increased. New wings were added to the Medical Building in 1947 and 1948; the first Students' Union Building opened in 1950, the Rutherford Library and the Engineering Building in 1951, and the Agriculture Building in 1953. The latter was enlarged in 1958 to become the Agriculture and Biological Sciences Building. The Administration Building dates from 1957.

The hectic post-war years merged into the slower growth of the 1950's. Dr. Andrew Stewart became President in 1951 and was succeeded by Dr. Walter H. Johns, who served from 1959 to 1969. In that ten-year period the enrolment rose from approximately 5,000 to 17,500, as the post-war generation came to university age.

This unprecedented increase in numbers made necessary the rapid construction of new buildings during the 1960's. The Physical Education Building, the Physical Sciences Building, and additions to the Medical and Engineering Buildings were followed by the Education Building in 1963, the Donald Ewing Cameron Library, the Household Economics Building, and the new residences named after western explorers. The dining centre was named in honor of Reg Lister, who had for so many years taken care of the older residences. The Henry Marshall Tory Building was opened in 1966, Phase I of the Engineering Centre in 1968, and the Clinical Sciences Building of the Faculty of Medicine in 1969. A new Students' Union Building opened in 1967.

The increasing range and complexity of subjects studied at the University was reflected in the classification of Graduate Studies as a faculty in 1957, in the division of the Faculty of Arts and Science into two faculties in 1963, and in the foundation of a number of new centres and institutes dedicated specifically to research. Outside of Edmonton, the University's work in Calgary, instituted in 1951, gradually expanded and an affiliated junior college was established in Lethbridge. These became separate universities in 1966. Other junior colleges in Medicine Hat, Camrose, Red Deer, and Grande Prairie became affiliated with the University to help bring higher education to more areas of the province.

241.1.5 RECENT YEARS

Dr. Max Wyman, the first graduate of the University to become its president, took office in 1969 and served until 1974; Dr. Harry Gunning, who succeeded him, held office from 1974 to 1979. During these years new problems arose, as a levelling-off of student numbers and world-wide inflation made the University's projected budgets less adequate than had been expected. Buildings already begun were completed one by one: the Biological Sciences Centre and the Central Academic Building in 1970, the Law Centre in 1971, and the Basic Medical Sciences Complex and the Engineering Centre, Phase II, in 1972. In 1972, also, the first residents moved into the Housing Union Building, designed and financed on the initiative of the Students' Union. Since then, the Humanities Centre, the Fine Arts Building, one phase of a projected expansion of the Rutherford Library, and additions to the Chemistry Building and Education Building have successively come into use. In 1978, following several years of moratorium on construction, ground was broken for a new Agriculture and Forestry Building.

A growing awareness of the value, both architectural and practical, of the University's older buildings led to a decision to renovate, rather than demolish, Pembina Hall. Pembina's transformation into a fully modern graduate student residence was so successful that it earned national recognition in the form of a Heritage Canada Award. Athabasca Hall underwent an even more drastic transformation, as its wooden construction needed to be completely replaced with modern materials; the renovated building was reopened in the autumn of 1977 and received a Heritage Canada award in its turn. In the autumn term of 1978 three concerts were held to commemorate the installation of a new organ in the renovated Convocation Hall.

In 1970 the Collège Saint-Jean, in South Edmonton, became an integral part of the University as the Collège Universitaire Saint-Jean and in May of 1978 it became the University's newest faculty when the name officially changed to Faculté Saint-Jean. It offers a bilingual program of courses in Arts, Science, and Education.

Spring Session (a six-week period between the end of the regular Winter Session and the beginning of Summer Session), during which intensive courses are offered, was inaugurated in 1972 and proved an immediate success.

The importance of scholarly publishing in the academic community was recognized when the Board of Governors formally established the University of Alberta Press. Although at first without regular staff, the Press nevertheless succeeded in publishing a small group of works of high quality. The appointment of L. E. S. Gutteridge as the first Director of the Press in 1977 placed its operations on a more adequate basis, and gave promise that the University's contributions to scholarship through publication would increase in future.

Dr. Myer Horowitz was installed as the ninth president of the University in September, 1979.

241.2 University Traditions

241.2.1 THE UNIVERSITY MOTTO

The University motto, *Quaecumque vera*, is taken from the Latin Vulgate version of the Bible, the Epistle of St. Paul to the Philippians, chapter 4, verse 8:

De cetero, fratres, quaecumque sunt vera, quaecumque pudica, quaecumque justa, quaecumque sancta, quaecumque amabilia, quaecumque bonae famae, si qua virtus, si qua laus disiplinae, haec cogitate.

The same passage, from the King James version, is:

Finally, brethren, *whatsoever things are true*, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things.

241.2.2 THE COAT OF ARMS

On November 15, 1909, a Faculty meeting passed a motion recommending to the Senate the adoption by the University of the Provincial coat-of-arms as its crest with the addition of an open book superimposed upon the cross and bearing the motto "Lux et Lex", and also the words "University of Alberta" attached as may seem fit. The present motto was substituted for that originally proposed in January 1911.

In 1950, the form of the shield and other details were altered to conform more strictly to heraldic principles, and the following official description of the Arms was adopted:

Blazon: Azure in front of a range of Snow Mountains proper, a range of Hills *Vert*, in base of a Wheat Field surmounted by a Prairie, both also proper, on a chief *Argent* a St. George's Cross.

Crest: in front of Sun Rays or an Open Book proper.

Motto: Quaecumque vera.

The Arms are copyrighted and may not be used without permission of the Board of Governors. The name of the University is similarly protected.

241.2.3 THE UNIVERSITY COLORS

The original suggestion for the University Colors came from the late Mrs. W. H. Alexander, who drew her inspiration from the autumn colors of the river valley below the campus. Professor Alexander relayed the suggestion to the Faculty meeting of October 5, 1908, which passed it on to the Senate for approval.

At its first meeting of October 13, 1908, the Senate accepted the "beautiful and at the same time infrequent" combination of green and gold as particularly appropriate to the new University of Alberta — the green representing the "wide stretches of prairie land flanked by deep spruce forests", and symbolic of "hope" and "optimism", the gold representing the "golden harvest fields", and symbolic of the "light of knowledge".

241.2.4 ACADEMIC COSTUME

All gowns are to be of the customary Cambridge shape, i.e., for undergraduates, a gown of black material not falling below the knee with round sleeves cut above the elbow; for bachelors, a gown of black material falling below the knee with full sleeves cut to the elbow and terminating in a point; for masters, doctors of medicine and doctors of dental surgery a gown of black material falling below the knee with black sleeves with semi-circular cut at bottom.

Hoods are to be of the Oxford pattern, and of spruce green material.

The bachelor's hood is to have a border (1½ inches wide), the master's a full lining, of the color distinctive of the faculty. The M.D. and D.D.S. hoods are to be of the master's pattern.

The faculty colors are:

Agriculture and Forestry	Pale Blue
Arts (including LL.D.)	White
Business Administration and Commerce	Silver Grey
Dentistry	Maroon
Education	Royal Blue
Engineering	Light Green
Home Economics	Pink
Law	Scarlet
Library Science	Lemon
Medicine	Crimson
Nursing (B.Sc.)	Crimson and White
Pharmacy and Pharmaceutical Sciences	Cinnamon
Physical Education and Recreation	Royal Blue and Gold
Rehabilitation Medicine	Salmon Pink
Science	Gold-yellow

Doctor's gowns (Ph.D. and Ed.D.) are to conform to the Intercollegiate Code in design. They are to be of black material and the velvet trim is to be Philosophy blue for the Ph.D., and Education light blue for the Ed.D. Doctors of Laws are entitled to wear a full-dress scarlet robe faced with white silk.

Doctor's hoods (Ph.D. and Ed.D.) are to conform to the Intercollegiate Code in shape, size and color. They are to be of black material to match the gown, and the full lining is to be of gold satin with a six-inch green satin chevron. The velvet trim distinguishes the two degrees and matches the velvet trim on the gown. There is to be a narrow green piping where the gold lining joins the black material. Honorary degree hoods (LL.D., D.Litt. and D.Sc.) are of scarlet silk and of the Cambridge form and have a full lining of white silk.

All caps are to be of the ordinary black trencher shape with black tassels, with a black velvet cap with gold cord for LL.D., D.Litt., and D.Sc. full dress.

242.1 Introductory

reports and recommendations to the Board or the General Faculties Council or other appropriate body. In addition, the Senate may authorize the conferring of Honorary Degrees.

The Senate brings together the University and the public. Although it has little formal decision-making power, it seeks to stimulate issues of concern and to aid in their resolution. It is a two-way link between the communities.

It approves courses, provides for the granting and conferring of degrees, and hears appeals by students and others from decisions of faculty councils. It makes rules and regulations for the management and conduct of the Library and determines standards and policies respecting admission of students. It may make recommendations to the Board on affiliation of other institutions, on academic planning, campus planning, the budget, procedures regarding appointments, promotions, salaries, tenure and dismissals, and any other matter which it considers to be of interest to the University. It has the general supervision of student affairs.

243.4 General Information

The libraries of The University of Alberta contain more than 2,000,000 volumes, 500,000 documents, 15,000 periodical subscriptions, audio visual aids and a large collection of research materials in microform.

The Humanities and Social Sciences Library is located in the Rutherford Library complex with some units in the Cameron Library. The main book collection and the union catalogue for the campus are located in Rutherford Library North. Here also, on the second floor, are the Reference and the Circulation Services. The Periodicals Reading Room, located on the 2nd floor of Rutherford South, contains current issues of periodicals in the humanities and social sciences plus recent issues of Canadian and foreign newspapers. Bound periodicals are located on the second floor and tiers 4, 5 and 6 of Rutherford South.

In the Cameron Library the Humanities and Social Sciences collections include the Government Publications on the third floor and Micromaterials Reading Room in the basement. The Cameron basement also houses Special Collections, Interlibrary Loan service and Duplicating Services.

In the Cameron Library the Undergraduate Library on the second floor contains an open shelf collection of over 80,000 volumes specially selected to meet the needs of undergraduates during their first two years of study. The Reserve Reading Room on the first floor houses books which are assigned by the instructors as required reading in the arts and sciences.

The Science Library occupies the fourth floor of the Cameron Library, and contains material for use in the fields of agriculture, engineering, science, home economics and other related subjects. The head of this Library is also responsible for two small branch libraries in related fields; the Mathematics Library located in the Central Academic Building, and the Physical Sciences Library in the Physics-Chemistry Building.

The Health Sciences Library on the fifth floor of the Cameron Library houses books and periodicals in the fields of medicine, dentistry, nursing, pharmacy, rehabilitation medicine and health services administration. This Library operates one branch at the University Hospital, the John W. Scott Library, which may be used by all recognized University Library patrons, but is mainly for use by the faculty and house staff at the hospital.

The Weir Memorial Law Library is housed in the Law Centre located on 111th Street. The Law Library contains reports, statutes, digests, encyclopaedias, treatises for Canada, the provinces, Great Britain and many of the other Commonwealth countries. United States' materials include the National Reporter system, the American Digest, Shepards Citators, annotated state codes, federal statutes and regulations. Over 1,200 periodicals are received with complete files of the major periodicals. Special subject collections are being established in: Oil and Gas, Taxation, International Law and Comparative Law.

The other major library on the campus is the Herbert T. Coutts (Education) Library which occupies the three-storey east wing of the Education Building. Circulation and reference services as well as a card catalogue of the Library's holdings are maintained here. The head of this Library also supervises the Curriculum Materials Library on the lower floor of the building.

244.1 Alberta Institute of Pedology

The Institute of Pedology is an organization of soil scientists with headquarters at the University. It was organized in 1968 by agreement between the University, the Research Council of Alberta, and the Research Branch of the Canada Department of Agriculture. The Institute consists of all pedologists in the Soil Science Department of the University, the Soils Department of the Alberta Research Council and the Alberta Pedology Unit of the Land Resources Research Institute, Agriculture Canada.

The Institute co-ordinates work in the following fields: soil survey in Alberta, research in pedology, compilation and publication of information on soils, interpretation of basic data on Alberta soils for use by all disciplines, and the clearing of requests for assistance and/or co-operation from other institutions concerned with pedological data.

The Institute is authorized to accept funds in support of investigations requested by donors. The Technical Co-ordinating Committee may administer funds, exclusive of the budgets of the co-operating institutions, accepted by the Institute to assist it in achieving its objectives.

The Chairman of the Soil Science Department of the University is ex-officio Chairman of the Technical Co-ordinating Committee.

The Institute of Earth and Planetary Physics was founded in 1970 with the aid of a Negotiated Development Grant from the National Research Council. Its support has since been assumed by the University. The Institute unites geophysicists in the Department of Physics and meteorologists in the Department of Geography for the promotion of research in earth and planetary physics. The scientific members of the Institute include the academic staff listed above, about 10 research associates and about 50 graduate students registered in the two Departments. Technical assistance is provided by staff of the Departments of Physics and Geography. One or more Distinguished Visitors are invited each year for two or three months.

Research topics in which Institute members are active include seimology, geomagnetism, electromagnetic induction in the Earth, paleomagnetism and rock magnetism, plate tectonics, time series analysis, mass spectrometry applied to geochronology and to stable isotopes, synoptic-scale and local-scale meteorological studies including studies of atmospheric and oceanic pollution, and space physics especially of the magnetosphere and environment of the Earth-Sun system.

The Institute of Law Research and Reform was established in November, 1967, by agreement between

the Provincial Government, the Law Society of Alberta, and the University. Its objects are twofold: to promote law reform, particularly at the provincial level, and to encourage legal research in co-operation with the Faculty of Law. By February, 1979 the Institute had made 35 Reports to the Government in connection with law reform, covering a wide range of subjects. Projects on foot include revisions of the Land Titles Act and Companies Act; Labour Management Relations; Limitation of Actions; a number of projects in Family Law; Judicial Reviews of Administrative Proceedings; Evidence; Exemptions from Execution; Wage Garnishment and Confidentiality and Freedom of Information. In its promotion of legal research as distinct from law reform the Institute has made to members of the Faculties of Law of the University of Alberta and the University of Calgary a number of grants which have produced useful research.

The Population Research Laboratory is a research arm of the Department of Sociology, established in 1966 as the sole demographic and urban research unit in Western Canada. The PRL consists of permanent staff and research associates recruited from among faculty members, from members of other departments and from the community at large who have research interests in population and/or urban studies.

The objectives and function of the Population Research Laboratory cover four major directions: teaching of students within the sociology programs; service of an intra- and inter-departmental nature as well as to the larger community; research in population and urban studies; publications and conferences. The largest publication projects are *Canadian Studies in Population*, a bilingual journal, published jointly with the Canadian Population Society; and the three series: (1) Discussion Papers, (2) Reprints, and (3) Edmonton Area Series. The quarterly newsletter "In Summary" provides information on current projects, seminars and reports.

Research Projects carried out by the laboratory staff and research associates cover a wide range of areas: population studies that focus on demographic methodology, fertility, mortality, population projections, and sample designs; and urban studies including such areas as urbanization, housing and urban lifestyles. The PRL conducts annually the *Edmonton Area Study* which is an amalgam survey of Edmonton residents; gathering basic demographic data and data on special research problems.

In 1978, *The Centre for Criminological Research* became a part of the Population Research Laboratory. The major functions of the Centre include the research training of students and the conduct of research in crime and delinquency.

The Nuclear Research Centre conducts studies to determine the fundamental properties of the nucleus of atoms. The central facility for research is a seven million volt Van de Graaff accelerator. In addition the present staff is directly involved in the experimental program of the 500 million electron volt cyclotron at Vancouver (TRIUMF Project). This is a co-operative project of The University of Alberta, the University of British Columbia, Simon Fraser University, and the Uni-

versity of Victoria. The centre offers research fellowships to physicists for research in nuclear physics.

The Theoretical Physics Institute was established in 1960 to promote research in theoretical physics. The active membership is comprised of the University staff actively engaged in research in theoretical physics. Their research interests range over astrophysics, statistical physics, physical acoustics, general relativity, elementary particles, nuclear physics, non-linear fields, properties of metals and semi-conductors, quantum field theory and chemical physics.

There are also normally about a dozen postdoctoral fellows and research associates carrying out research under the direction of the permanent members. In addition, the Institute offers special visiting fellowships for periods of one month to one year to visiting physicists of distinction. A support staff of three secretaries and two computer programming analysts provides technical assistance.

The General Alumni Association of the University is representative of upwards of 70,000 graduates located in every province of Canada and in many foreign countries. Its objective is to promote the welfare of the University.

Annually the Association undertakes a three-pronged program (a) to help perpetuate the interest and concerns of alumni in the University and to provide a medium for face to face communication among graduates; (b) to involve the alumni in an awareness of the changing environment in which students, faculties and administration are interacting and how these things relate to the greater society; (c) to support the University — 1. through representation by members on governing bodies; 2. through studies and recommendations on matters of University concern; 3. through financial and other resources that can be made available to the University.

The principal officers of the Alumni Association are the president and vice-president, elected annually by a mail vote of Alumni Council members. These officers are members of the Senate of the University. Two representatives of the Association serve on the Board of Governors for three year terms. Other officers include the past-president, the director, who as alumni executive secretary is a regular member of the University staff, and the honorary secretary.

As members of Convocation, graduates are automatically lifetime members of the General Alumni Association. As such, they receive when published, at no cost, issues of "The New Trail Folio", a University and Alumni publication.

There is no membership fee.

Special Sessions

261 UNIVERSITY REGULATIONS

261.1 General Information

Courses in the Spring Session are held on The University of Alberta campus during the period May 4-June 12. Similarly, Summer Session courses are held on-campus during the period July 6-August 14. In a few instances courses are held at off-campus centres.

Courses in the Evening Credit Program (Off-Campus) are offered only at centres off-campus. The courses primarily are designed to meet the needs of students who are working towards the B.Ed., B.A., or B.Sc. degrees.

The Evening Credit Program courses formerly offered in Edmonton have been integrated into the regular Winter Session offerings of the Faculties and Schools as On-Campus Evening Degree Credit Courses. Normally students who took Evening Credit Program courses in the past will now be part-time students.

Since some courses are subject to registration quotas, students are advised to register as early as possible.

261.5 Classification of Students

261.5.1 UNDERGRADUATE AND GRADUATE STUDENTS

(1) *Undergraduate students* are those who are registered in a faculty other than the Faculty of Graduate Studies and Research. These students fall into two categories:

(i) Full-time students—those who are enrolled in the equivalent of three or more half courses in a term.

(ii) Part-time students—those who are enrolled in the equivalent of less than three half courses in a term.

(2) *Graduate students* are those who have been admitted to the Faculty of Graduate Studies and Research. These students are designated as "Full-time" or "Part-time" by the Faculty of Graduate Studies and Research according to their workload of courses and/or research. A more detailed classification of graduate students will be found in § 202.1 of the Graduate Studies and Research Calendar.

261.5.2 INTRAMURAL AND EXTRAMURAL STUDENTS

(1) *Intramural Students* are those who are attending The University of Alberta at Edmonton or any of its off-campus centres.

(2) *Extramural Students* are those who, although not attending the University or any of its off-campus centers, are permitted to take one or more courses by correspondence or directed study. This privilege may be granted by a faculty in special circumstances.

261.5.3 CLASSIFICATION OF UNDERGRADUATE STUDENTS

(1) *Degree, Diploma, or Certificate Program Students* are those who are registered in a program leading to a degree, diploma, or certificate normally granted by The University of Alberta.

(2) *Special Students* are those who have been permitted to register in one or more courses, but not officially for credit towards a degree or diploma at this or any other institution.

(3) *Visiting Students* are bona fide students of other universities or colleges, who have been permitted to take one or more courses for transfer of credit to their own institutions which have agreed in advance to such an arrangement. In the Faculty of Graduate Studies and Research visiting students are called "Exchange Students".

(4) *Probationary Students* are students who have been admitted (or permitted to continue) on a probationary basis, because their previous academic record is either deficient in some respect, below the standard ordinarily required, or difficult to assess. Normally, if such a student fails to meet the conditions stipulated within the time limit imposed, he will not be allowed to proceed further in his program.

(5) Auditors are not registered for credit but are taking one or more courses under the following conditions:

*(i) The individual must receive permission from the course instructor, the chairman of the department, and the dean of the faculty in which the course is offered.

(ii) Such permission shall not in itself be a guarantee of admission to the class. The final

decision shall weigh class size, impact on credit students, and other factors that the instructor, department or faculty establishes.

(iii) Courses audited in this manner will not be considered as meeting prerequisite, admission, or course requirements for any University degree program.

(iv) Individuals auditing courses shall limit their participation in the class to that deemed appropriate by the instructor.

*Since final permission to audit a course cannot be given until the number of students registered in the course for credit is known, students and others should not seek authority to register as auditors until the start of classes.

261.6 Admission

261.6.1 ADMISSION REQUIREMENTS

General Requirements: For admission a student must present five Alberta Grade XII subjects specified by the appropriate Faculty and have at least a 60.0% overall average on these five subjects and a mark of at least 50% in each. Students with a different educational background must present equivalent qualifications. For detailed information on particular Faculties, students should consult the University Regulations and Information Calendar.

Refusal of Admission: Notwithstanding anything in its regulations, The University of Alberta may, at its discretion, refuse admission to any applicant. Admission will normally be refused to an applicant who has had to write what the University considers an inordinate number of examinations to attain the nominal entrance requirements of the University.

261.6.2 ADMISSION PROCEDURES FOR NEW STUDENTS

Any person who wishes to register and who has never attended The University of Alberta before must seek admission by the deadline: March 3 for Spring Session, April 1 for Summer Session;for On-Campus Evening Degree Credit Courses and Evening Credit Program (Off-Campus) see Section 261.4.2. The procedure is outlined below.

Undergraduate students: Complete an Application for Admission form and return it with the $20.00 application fee to the Office of the Registrar. Arrange to have transcripts for *all* previous education sent by the appropriate offices to the Registrar.

Graduate students: Complete the Application for Admission to Graduate Studies form and return it with the $12.00 application fee to the Office of the Faculty of Graduate Studies and Research. Arrange to have two transcripts sent by each of the appropriate offices for *all* previous education to the Office of the Faculty.

Advanced Standing: Applicants for admission who have previously completed some university level work elsewhere may be admitted with advanced standing, which may shorten their program at The University of Alberta. Applicants whose previous university work was done by correspondence may be granted advanced standing under certain conditions but normally only with respect to the first year of their program.

Advanced Placement: Applicants who have taken the equivalent of university courses in some other manner may be given advanced placement, rather than advanced standing, which excuses them from taking the corresponding university courses, but requires them to substitute other courses in order to complete a program of normal weight at the University.

All applications for admission with advanced placement or advanced standing should be addressed to the Registrar well in advance of the deadlines. (See § § 261.2, 261.3 and 261.4.) Each application will be dealt with on its own merits. The University reserves the right to require applicants for advanced standing or advanced placement to write examinations at any level including that of matriculation.

The amount of advanced standing that may be granted is limited by the residence requirements of the University, which provide that a student proceeding towards a first degree will normally be required to attend at least one academic year and complete a full year's program.

Credit by Special Assessment: Some faculties have agreed to allow students to seek credit in certain specified courses without actually registering in and taking courses, if they can demonstrate an acceptable level of mastery of the course content. The procedures whereby a student seeks credit in a course by this non-traditional route is known as *Credit by Special Assessment.*

Faculties, in consultation with departments, will determine which, if any, of their course credits may be earned by special assessment, and the conditions that a student must satisfy in order to have his application approved.

The privilege of seeking credit in a course by special assessment is limited to students admitted to the University.

Students wishing to complete course credit(s) by this means are advised to report to their Faculty Office in order to be apprised of faculty regulations and deadlines for submission of applications.

261.6.3 ENGLISH LANGUAGE PROFICIENCY

General Requirements

Since the language of instruction at the University of Alberta is English, except for those courses offered in French by Faculte Saint-Jean, all applicants to faculties other than Faculte Saint-Jean must possess an adequate knowledge of written and of spoken English. Regardless of country of origin or of citizenship status, applicants will be required to demonstrate proficiency in the English language as a prerequisite to admission. This demonstration may take any one of several forms:

1. successful completion of the equivalent of three years of full-time instruction in an English language secondary institution in Canada;

2. presentation of a successfully completed full-year or more of course work, including an introductory course in English, in an accredited post-secondary institution where English is the language of instruction and from which advance credit is normally allowed by the University of Alberta;

3. successful completion of the equivalent of three years of full-time instruction in a school/institution outside Canada where academic subjects are taught by "English Language" instructors, as accredited by the International Institute of Education (I.I.E.), or as recognized by the University of Alberta;

4. successful completion of the equivalent of three years of full-time instruction in a school in Canada in which the major language of instruction is other than English but where the level of English

proficiency required for graduation is equivalent to that in English language schools, as recognized by a provincial Department of Education;

Or

5. presentation of results of the Test of English as a Foreign Language (TOEFL) or its equivalent in other approved standard tests.

a. Applicants presenting a TOEFL score of 600 (or its equivalent in other approved standard tests) will be considered as having demonstrated English language proficiency.

b. Applicants presenting a TOEFL score of less than 600 but 550 or greater will usually be considered as having a minor deficiency. Subject to the requirements of the particular Faculties, such an applicant may be granted conditional admission into the University but will be required to successfully complete one or more remedial Faculty of Extension non-credit English language courses and may be required to register in less than a normal course load in his or her regular program until the English language deficiency has been corrected. The student will not be permitted to register in a further academic year until satisfactory command of the language of instruction has been demonstrated (as in (a) above).

c. An applicant presenting a TOEFL score of less than 550 will be considered as having a major deficiency in the language of instruction and will not be admitted into the University of Alberta until proficiency can be demonstrated.

Specific Faculty Requirements

Some faculties may require greater strength in English communicative skills than is required in other programs. These additional requirements are detailed in the Faculty Regulations Section of the Faculty Calendar. In applying to such faculties the applicant must satisfy the additional language requirements as well as meet the general requirements outlined above. Students seeking entry as non-matriculated adults should see the special English proficiency requirements detailed in the Faculty Regulations sections of the Calendar.

Further information is available from the A.P.E.L. Division, Office of the Registrar, Room 128 Administration Building. TOEFL application forms are available from the Examinations and Timetabling Division, Office of the Registrar, Room 123 Administration Building; or by writing direct to Educational Testing Service, Princeton, New Jersey, U.S.A., 08540.

261.6.4 ADMISSION PROCEDURES FOR CONTINUING AND FORMER STUDENTS

A student who has previously registered and is continuing in the same program without interruption is not required to re-apply for admission to subsequent years unless he has been advised that he may not continue in the program.

A student who wishes to register either in another program within the same faculty or in a program offered by another faculty must complete an Application for Re-enrolment form. This may be obtained from the Registrar and the application must be approved by the Dean who is responsible for the program the student seeks to enter.

A student who has interrupted his program for one or more Winter Sessions, must also complete an Application for Re-enrolment form which will be handled in the same manner as that outlined in the paragraph above.

If a student has interrupted his studies because he was required to withdraw, he should ensure that his intention to seek re-admission is communicated to the appropriate Dean by June 15. This date is set to ensure that adequate counselling may be given.

261.7 Registration

261.7.1 RESPONSIBILITY FOR REGISTRATION

Each student is responsible for the completeness and accuracy of his registration. He is also responsible for any adjustments of registration made necessary by the results of supplemental examinations. Particular care should be exercised with regard to prerequisite courses.

261.7.2 REGISTRATION PROCEDURE

Persons who have not attended The University of Alberta before must first seek admission as outlined in § 261.6.

Registration forms must be completed and returned to the appropriate Faculty office by the deadlines specified in the Academic Schedule. The forms for each session are different; a student who wishes to attend more than one session must complete more than one set of forms.

Students registering in the Faculty of Graduate Studies and Research will be charged a $10.00 registration fee for each session attended. This fee will be assessed at the same time as the instructional fees.

Students whose registrations have been approved will receive from the Registrar a statement of fees.

Each student will be required to confirm his Spring and Summer registration by the payment of fees before the session begins (§ 261.8.1).

261.7.3 LIMITATIONS ON REGISTRATION

One full course or equivalent per session is regarded as the normal load for a student in the Spring Session, Summer Session, On-Campus Evening Degree Credit Courses or Evening Credit Program (Off-Campus). However, a student with a good academic record may be permitted by his Faculty to register in a maximum of two full courses or the equivalent. Decisions with respect to the quality of a student's academic record normally will be based on the equivalent of a year's university work completed previously. Under no circumstances will a student be permitted to register in more than the equivalent of two full courses in a Session, or one full course if he attends only one term of a Session.

There are, however, certain designated courses which may not be taken concurrently with other courses and this is indicated immediately after the course number in the Schedule of Courses and Timetable.

261.7.4 COURSE SELECTION

A Schedule of Courses and Timetable for each Session appears at the back of this calendar; Spring Session on green paper, Summer Session on yellow paper, On-Campus Evening Degree Credit Courses on blue paper and Evening Credit Program (Off-Campus) on grey paper.

For each course and each section of a course, where applicable, the name of the instructor is given. If it is not possible to satisfy the preference stated on the registration form, the registration will be considered for other sections of the course.

Enrolment per section will be limited and students will be assigned to sections in the order in which their approved registrations are received at the Office of the Registrar. Prospective students should, therefore, apply as early as possible if they wish to have their selections honoured.

Every effort will be made to have the courses, sections, and instructors follow the Calendar descriptions, but courses and sections may be dropped or added, and instructors may not be those listed.

261.7.5 CHANGES AND CANCELLATION OF REGISTRATION

A student who has registered in a course may not transfer from one course to another, or from one term to another, a course, or withdraw from a course or from his program without first obtaining permission from the Dean of his faculty. The permission, in the form of a "Change of Registration" or "Withdrawal" form, signed by the Dean, must be presented to the Registrar before the change becomes official.

A student who abandons a course or withdraws from his program without completing the required forms will not be eligible for any refund of fees,nor for exemption from fees in the event that he had not paid them. For the purpose of calculating refunds the date on which the required forms were signed by the Dean will be used.

Changes in registration will not normally be approved after the deadline specified in the Academic Schedule. Students who abandon a course without their Dean's approval may be assigned a failing grade.

Registration in Summer Session courses may be cancelled for students who have been required to withdraw from the University because of failing academic performance in the immediately preceding regular academic session.

261.8 Fees—Spring Session and Summer Session

For the convenience of students interested in the various sessions, the fee regulations are listed separately for each session. Fees for the Evening Credit Program (Off-Campus) may be found in § 261.9. Fees for On-Campus Evening Degree Credit Courses may be found in § 261.10.

261.8.1 PAYMENT OF FEES

(1) Instruction and General fees are due and payable at the time of registration; registration is regarded as incomplete until fees have been paid. (2) There is no provision for partial payments.

(3) Fees should be remitted by cheque or money order payable to The University of Alberta. Receipts for the payment of fees will not be issued unless requested later for reimbursement by employer, etc. The cancelled cheque is a receipt. An official tuition fees income tax receipt covering all sessions will be issued before February 28, 1982 to students whose fees are paid in full.

(4) A penalty of $15.00 will be charged on any payment received after the first day of the Session and must be added to any remittance mailed or delivered to the University. See also § 261.7.5 and §261.8.3 for changes of registration and withdrawals and refunds.

(5) Notwithstanding (4) above, students who apply for assistance from the Students' Finance Board on or before their last day for payment of fees without penalty will not be charged a late penalty provided that their loan applications are subsequently approved, resulting in full payment of fees on or before the last day of the appropriate session.

261.8.2 FEE SCHEDULE

261.8.3 WITHDRAWALS AND REFUNDS

A student who wishes to withdraw from the University must complete a Notice of Withdrawal form which must then be submitted to his Dean or Director for approval. A student who withdraws without completing such form will not be eligible for any refund of fees nor for exemption from fees in the event that he has not paid them.

Students who withdraw will have their fees re-assessed on a pro rata basis per course to the effective date of withdrawal, except that no re-assessment will be made when the withdrawal date falls in the last week of the course(s). In addition, undergraduate students will be assessed a $10.00 administrative charge, and, in the case of graduate students, the registration fee will be retained.

Refunds will be authorized when the previously paid fee assessment exceeds the assessment to date of withdrawal. The effective date of withdrawal is that on which the Dean or Director signs the required forms.

261.9 Fees—Evening Credit Program (Off-Campus)

For the convenience of students interested in the various sessions, the fee regulations are listed separately for each session. Fees for Spring Session and Summer Session may be found in § 261.8. Fees for On-Campus Evening Degree Credit Courses may be found in § 261.10.

261.9.1 DEFINITION

Instruction fees are set by the Board of Governors, assessed by the Registrar (Graduate Registrar in the case of graduate students) and collected by the Comptroller.

261.9.2 ASSESSMENT OF FEES

For the purpose of assessing fees and fee refunds, the Session is divided into two equal terms. The First Term runs from September through December and the Second Term runs from January through April.

Students are classified as either graduate (those registered in the Faculty of Graduate Studies and Research) or undergraduate (those registered in other Faculties) and sub-classified in each term as either full-time or part-time. A full-time student is any student taking three or more half-courses in a term. A part-time student is any student taking less than three half-courses in a term.

For fee purposes a full-session course will be treated as two half-courses with one half-course applying to each term.

The assessment of instruction fees is done on a "per course" basis. Assessment for both terms will be done at the time of registration.

Schedules of instruction fees for each program are provided in Section 261.9.5.

261.9.3 PAYMENT OF FEES

Instruction and General fees are due and payable at the time of registration; registration is regarded as incomplete until fees have been paid and is subject to cancellation unless payment has been made by the final date mentioned in the following regulations.

(1) Fees should be remitted by cheque or money order payable to The University of Alberta.

(2) Payment should be sent directly to the Comptroller, The University of Alberta, Edmonton. Students whose fees are paid in full will receive official receipts for income tax purposes before the following February 28.

(3) The penalty for late payment is $15.00. The last day for payment of undergraduate fees without penalty for students registered only in the First Term (September to December) is September 30, for students registered only in the Second Term (January to April) the date is January 15. Students registered in both First and Second Terms may pay full fees on or before September 30 or they may pay by instalments and the last dates for payment without penalty are September 30 for First Term and January 15 for Second Term. The first instalment consists of fees assessed for the First Term and the second instalment those assessed for the Second Term plus a $5.00 instalment charge. In addition, if payment has not been made by October 15 for First Term fees and February 1 for Second Term fees, registration will be subject to cancellation and the student to exclusion from classes.

(4) The dates, penalties and registration conditions detailed in (3) above apply to graduate students but amended as to First Term due date if requisite.

(5) Second Term only registrants may receive statements of fee accounts during the First Term.

261.9.4 WITHDRAWALS AND REFUNDS

A student who wishes to withdraw from the University must complete a Notice of Withdrawal form which must then be submitted to his Dean or Director for approval. A student who withdraws without completing such forms will not be eligible for any refund of fees nor for exemption from fees in the event that he has not paid them.

When a student withdraws from one or more courses, his/her fees will be reassessed on a per

course basis with the fee for each dropped course prorated in accordance with the table below. If the total reassessment for a term exceeds the maximum listed for the particular program or faculty, it will be reduced to that maximum.

Also, students who change course(s) from credit to audit will be assessed the table percentage at credit rate and the balance of 100%, if any, at audit rate.

Refunds will be authorized when the previously paid fee assessment exceeds the assessment to date of withdrawal. The effective date of withdrawal is that on which the Dean or Director signs the required forms. In the event that a revised assessment following withdrawal results in unpaid fees, students will be held responsible for payment in full of the difference.

261.10 On-Campus Evening Degree Credit Courses

261.10.1 DEFINITION

There are two major classifications of fees, Instruction and General. Instruction fees are set by the Board of Governors, assessed by the Registrar (Graduate Registrar in the case of graduate students) and collected by the Comptroller. General fees are set by student governing bodies as well as the Board of Governors and follow the same assessment and collection procedures as Instruction fees.

Fees other than Instruction and General will be assessed in particular cases as they apply (see § 261.10.12).

261.10.2 ASSESSMENT

For the purpose of assessing fees, and fee refunds, the Winter Session is divided into two equal terms. The First Term runs from September through December and the Second Term runs from January through April.

Students are classified as either graduate (those registered in the Faculty of Graduate Studies and Research) or undergraduate (those registered in other faculties) and sub-classified in each term as either full-time or part-time. Full-time undergraduate students are those who are enrolled in the equivalent of three or more half-courses in a term. Part-time undergraduate students are those who are enrolled in the equivalent of fewer than three half-courses in a term. Graduate students are designated as "Full-time" or "Part-time" by the Faculty of Graduate Studies and Research according to their workload of courses and/or research. A more detailed classification of graduate students will be found in § 202.1 of the Graduate Studies and Research Calendar.

For fee purposes a full course will be treated as two half-courses, with one half-course applying to each term.

The assessment of Instruction and General fees for both terms will be done at the time of registration. Instruction fees are assessed on a per course basis up to a certain maximum. Schedules of these fees for each program are provided in § 261.10.7 to § 261.10.12.

261.10.3 PAYMENT

Registration is regarded as incomplete until fees have been paid in accordance with the regulations detailed below (see particularly § § 261.10.4 and 261.10.5).

(1) The following regulations regarding payment of fees apply to undergraduate students (refer to § 261.10.4 for details on late payment penalties):

WHERE: In the Ice Arena.

WHEN: Full fees as detailed on your fee assessment form are due and payable by cash or cheque during Registration Week—Tuesday, September 1 to Saturday, September 5, as scheduled in your Advanced or In-Person Registration Procedures Booklet.

Students who register for the full session may elect to pay fees in two instalments. The first instalment will be the first term assessment. The second instalment will consist of the second term assessment plus an instalment charge of $5.00.

NOTE: Students who do not make payment in accordance with the foregoing should report with fee assessment form to the Comptroller's Office, third floor of the Administration Building. Payment may then be made to the Cashier between the hours of 9:00 a.m. and 4:00 p.m. Monday through Friday.

Students making payments by cheque may follow the above procedure. However, where practical, students are encouraged to place cheques in a special deposit box provided in the main floor rotunda of the Administration Building up to September 30. Cheques may also be mailed to the Comptroller but note that the University cannot accept responsibility for the actions of the post office in cases of payments received by the University after the deadline date. All cheques should be made payable to The University of Alberta. Also, the fee assessment form should be enclosed with the cheque in the special fees remittance envelope which is provided.

The last date for payment of fees without penalty for full session students and First Term only students is September 30.

The last date for payment of fees without penalty for Second Term only students and for the second instalment by full session students is January 15. Payment is to be made as detailed in NOTE above.

Receipts for the payment of fees received by mail will not be issued unless requested later. Your cancelled cheque is your receipt. Students whose fees are paid in full will receive official receipts for income tax purposes before February 28, 1982.

(i) *Students whose fees are to be paid from assistance through The Students Finance Board of The Province of Alberta..*

Upon receipt of the Certificate of Eligibility from the Board, each student should submit all copies to the Fees wicket, where the Confirmation of Enrolment section will be completed, including the amount of fees to be remitted by the bank to the University. The Students Finance Board requires that full Instruction and General fees due to an educational institution are the first charge against any financial assistance awarded. Further, the Board makes provision for full allowance for fees in its first disbursement. In cases where the assistance awarded is less than full fees, the balance of fees payable will be subject to normal fee payment regulations.

Students processing certificates after the September 30 deadline for payment of fees will not be assessed a late payment penalty if:

—the student had appropriately completed the "Financial Assistance Expected" section of the registration form or otherwise had informed the Comptroller's Office not later than mid-September that financial assistance was expected.

—the application for assistance was made to the Board not later than mid-September. Note that it is advantageous to students to submit applications as early as possible, namely from about mid-July onwards.

—the assistance awarded is at least sufficient to pay the first instalment of fees or if not sufficient to pay the first instalment, the deficiency is paid at the date of submission of the Certificate.

(ii) *Students whose fees are to be paid by scholarships, bursaries or other assistance, either directly to or by The University of Alberta.*

If the award is sufficient to pay at least First Term fees, the "Financial Assistance Expected" section of the student's registration form should have been completed, giving the amount of the assistance and the source of the award. If this was not done, the student should submit the information to the Comptroller's Office not later than mid-September.

(iii) *Students who receive assistance directly.*

Students who receive assistance directly, i.e., not through the University, are subject to normal fee payment regulations and they are required to follow the payment procedure detailed in (i) above, even though the University may be required to provide confirmation of registration.

(iv) *Students age 65 and over who are eligible for remission of fees.*

Students eligible for remission of fees shall:

—be age 65 or more at commencement of the Session,

—submit proof of age,

—be a resident of the Province of Alberta.

The remission of fees (including auditing fees) shall apply to undergraduate credit courses only. The Application for Remission form is available at the Fees wicket, third floor of the Administration Building, and should be completed prior to September 30 (January 15 in the case of Second Term only registrants).

(2) Similar regulations to those detailed in (1) above apply to graduate students, with the following changes (refer to § 15.2.4 for details on late payment penalties):

(i) During registration a fee information sheet will be given to each graduate student who will then calculate the amount of his fee assessment and pay same in accordance with (1) above. Subsequently, a fee assessment form will be mailed to each student showing the amount of his fees. In the event that this amount is greater than that calculated by the student, the difference is due and payable immediately on receipt of the mailed assessment form.

(ii) Graduate students who elect to pay fees in instalments may do so as follows:

First instalment—First Term fees as calculated by student (see (i) above) due not later than September 30.

Second instalment—Second Term fees plus a $5.00 instalment charge, due on or before January 15.

261.10.4 LATE PAYMENT PENALTIES

(1) *Undergraduate students*

(i) The last day for payment of fees is September 30. If the student is paying in two instalments, the last day for payment of the first instalment is September 30; and for the second instalment, January 15. A penalty of $15.00 will be charged when the payment is received by the University after these dates. Students are reminded that the University cannot accept responsibility for the actions of the post office if payments are not received by a deadline date. In addition, if payment has not been made by October 15 for First Term fees and February 1 for Second Term fees, registration will be subject to cancellation and the student to exclusion from classes.

(ii) When registration is cancelled, a reassessment of fees will be made to the date of cancella-

tion and the amount unpaid entered on the student's record. Future registrations will not be accepted and all certification of academic records will be withheld until the account has been settled.

(iii) When a student has been permitted to register late, the last date for payment of fees will be fifteen days after the date of assessment. A penalty of $15.00 will be charged when the payment is received after this date. If payment is in instalments, the last date for payment of the second instalment is January 15 and the above penalty provision applies.

(iv) The last day for payment of fees for those students who are registered in Second Term course(s) only is January 15. A penalty of $15.00 will be charged when the payment is received after this date. In addition, if payment has not been made by February 1, registration will be subject to cancellation and the student to exclusion from classes together with action by the Registrar detailed in (ii) above.

(2) *Graduate students.*

A penalty of $15.00 may be charged when payment of First Term fees is received after September 30, and, when paying by instalments, payment of Second Term fees is received after January 15. In addition, if any fees remain unpaid by February 1, registration will be subject to cancellation and the student to exclusion from classes. Refer to (1)(ii) above for resulting action by the Registrar. The same conditions as stated above for payment of Second Term fees apply to students assessed fees for the Second Term only.

261.10.5 WITHDRAWALS AND REFUNDS

Students who wish to withdraw from the University should report at once to Student Counselling Services in order to complete "Notice of Withdrawal" forms which must then be submitted to the Dean for approval. Students who withdraw without completing such forms will not be eligible for any refund of fees nor for exemption from fees in the event that they have not been paid.

When a student withdraws from one or more courses his/her fees will be assessed on a per course basis with the fees for each dropped course prorated in accordance with the table below. If the total reassessment for a term exceeds the maximum listed for the particular program or faculty, it will be reduced to that maximum.

Also, students who change courses from credit to audit will be assessed the table percentage at credit rate and the balance of 100%, if any, at audit rate.

Assessment per Term

First Term	
Prior to Sept. 18*	0%
Sept. 18 to 30	20%
Oct. 1 to 15	40%

*First day after deadline for registation and changes in registration. Corresponding dates for graduate students are October 1 and February 1.

Undergraduate students will be assessed a $10.00 administration charge on withdrawal from the University and the $15.00 registration fee assessed all graduate students will be retained in the event that a graduate student withdraws from the University.

Graduate students whose fees are assessed on a program basis rather than on a per course basis will, for the purpose of fee assessment on withdrawal, be assessed a maximum of one-half of full Winter Session fees for each of the two terms.

Refunds will be authorized when the previously paid fee assessment exceeds the assessment to date of withdrawal. The effective date of withdrawal is that on which the Dean signs the required forms. In the event that a revised assessment following withdrawal results in unpaid fees, students will be held responsible for payment in full of the difference.

261.10.6 CHANGES IN FEES AND FEE PAYMENT PROCEDURES

The University reserves the right to change its fees from year to year without notice. Students who have not completed their program when a change is made will pay at the new rate for the balance of their program.

261.11 Academic Regulations

261.11.1 PRE-SESSION STUDY

Where pre-session study is a requirement, this is indicated in the schedule of the courses offered, and the students concerned will be sent study outlines by the Office of the Registrar. Information concerning required textbooks may be obtained from the University bookstore. For further information please refer to § 261.12.8 of this calendar.

Where pre-session study is required, examinations on the prescribed preparatory study may be held during the first week of classes. If preparation proves to be inadequate, a student may be asked to withdraw from the course. This requirement makes it essential that registration be completed at an early date, textbooks secured, study commenced, and work carried forward consistently.

261.11.2 RESIDENCE REQUIREMENTS

(1) A student proceeding towards a first degree normally must attend at least one academic year and complete a full year's program.

(2) The final year of a degree program must normally be taken in attendance at The University of Alberta.

(3) If a student has fulfilled the first requirement before beginning the final year of his program, he may apply to the Dean of his faculty for permission to fulfill the second requirement by attendance at Spring Session or Summer Session or by taking On-Campus Evening Degree Credit Courses.

261.11.3 ATTENDANCE

Since presence at lectures, participation in classroom discussions and projects, and the completion of assignments are important components of most courses, students will serve their interests best by regular attendance. Those who choose not to attend must assume whatever risks are involved.

261.11.4 EVALUATION PROCEDURES AND GRADING SYSTEM

At the beginning of the session each instructor will announce the distribution of weight between term work and final examinations in each course, and also the policy with respect to supplemental examinations. In addition he will outline the evaluation procedures to be used and explain the grading system.

The grading system uses the following nine grades:

9	
8	Excellent
7	
6	Good
5	
4	Pass
3	(see Note)
2	Fail
1	

NOTE: A grade of 3 in an individual course will be accepted by some faculties but only if warranted by a student's over-all academic record.

In courses taken towards an undergraduate degree or for those used as a prerequisite to another course, the minimum passing grade is 4 unless otherwise specified; in courses taken towards a graduate degree the minimum passing grade is 6. Under the percentage system previously in use, the minimum passing grade in courses taken towards an undergraduate degree was 50 per cent; in courses taken towards a graduate degree, 65 per cent.

Some courses may be offered on a "Pass"/"Fail" basis. Conditions under which a student may take such a course are specified by his faculty council.

Aegrotat Standing may be granted, in special circumstances, on the grounds of illness to a deserving student who has completed at least one year at The University of Alberta in the Faculty in which he is currently registered. Any student wishing to take advantage of this privilege should apply without delay to the Dean of the faculty concerned. Any other student absent from a final examination because of illness may apply for permission to write the regular deferred examination. [See § 261.11.5].

261.11.5 EXAMINATIONS

The following regulations apply to *term examinations:*

(1) *Term examinations optional.* The holding of term examinations is optional with each department.

(2) *Test Week.* Although instructors may give tests during any regular lecture or laboratory period at their discretion, one week in the middle of each of the First Term and the Second Term of the Winter Session has been set aside as test week. During these weeks off-campus extra-curricular activities will not normally be organized by the University.

(3) *Absence from term examination or test.* If a student has an unexcused absence from a term examination or test, the raw score assigned to him will be zero. However, in case of illness or other extreme circumstance the student may be excused from writing the examination or test. In applying for exemption a student must present to his instructor an absence slip signed by a University Health Service Physician where the cause is illness, or by the Registrar where the cause is other than illness. When exemption is granted the percentage weight allotted to the examination or test missed is added to the percentage weight allotted to the final examination.

The following regulations apply to *final examinations:*

(1) *Final examinations.* A final examination is held in each course except where departure from this arrangement has been authorized by the Council of the faculty in which the department offering the course is situated. A weight of not less than 30 per cent and not more than 70 per cent will be assigned to the final. The remaining weight for the course will be assigned to the term work. In courses completed in the First Term of the Winter Session, final examinations are normally held during test week in December. All final examinations for Second Term and full courses are held at the end of the Session. Examinations for On-Campus Evening Degree Credit Courses and Evening Credit Program (Off-Campus) courses are held during the last regular class period.

(2) *Absence from final examinations.* Any student who is ill or suffering from severe domestic affliction is advised not to sit for a final examination. Instead he should advise the Registrar at once of the circumstances and should apply for a deferred examination. Similar action should be taken by any student, who, because of religious convictions or for other cogent reasons, is unable to write a final examination at the scheduled time. Such applications will be referred to the student's Dean for a final decision.

When a student is absent from a final examination without acceptable excuse, a final grade may be computed using a raw score of zero for the final examination. In other cases the final grade will be shown as "Absent". The policy with respect to which method of reporting the final grade is to be used, will be determined by the faculty in which the department offering the course is situated. For the purpose of evaluating the student's overall performance the interpretation of the grade assigned is the responsibility of the faculty in which the student is registered and it may determine what action will be taken.

(3) *Cancellation of paper during examination.* If a student becomes ill or receives word of domestic affliction *during* the course of an examination, he should report at once to the Supervisor, hand in his unfinished paper, and request that it be cancelled. Thereafter, if illness is the cause, he must go directly to the University Health Service so that any subsequent application for a deferred examination may be supported by a medical certificate. The Registrar should be notified in writing of the circumstances within forty-eight hours of the examination. In certain cases, the decision may be to grant a deferred final examination, which will carry with it no supplemental privilege in case of failure.

(4) *No subsequent cancellation of papers.* Should a student write an examination, hand in his paper for marking, and later report extenuating circumstances to support a request for cancellation of his paper and for another examination, such request will not be entertained.

(5) *Debarment from final examination.* A student may be refused permission to write the final examination in a course, on the recommendation of the department concerned and with the concurrence of the Dean of his faculty, in the following circumstances:

(i) The student has neglected to do a substantial portion of his written assignments in a course of which these are an essential feature, or has attended insufficiently in a course in which class participation is a necessity.

(ii) The student has neglected to do a sufficient amount of the practical or laboratory work in a course in which these are considered a basic requirement.

(6) *Failure in First Term Course.* A student who has failed the first single-term course in a two single-term course sequence, may proceed to the second single-term course unless his faculty has ruled otherwise.

(7) *Release of Final Examination Papers.* Departments subscribing to the belief that there is educational value in permitting students to see their final examination papers after they have been marked, may arrange for this to be done. However, papers should not actually be released to students until the deadline for applications for reappraisal has passed, as an appeal cannot be entertained after the custody of the paper has been relinquished to the student.

The following regulations refer to the *notification of results.*

(1) *Release of Grades.* Only the Registrar's Office is empowered to issue official statements of results or transcripts of records. However, Department Chairmen, or their delegates, are authorized and instructed to release final grades for Winter Session in First Term courses by January 10, and in Second Term or full-session courses by May 15, in any manner that will protect the confidentiality of individual student grades. After the end of each university session a statement of record is mailed to each student at the home address specified on his registration. This should not be expected before June 1 at the earliest for the preceding Winter Session.

(2) *Reappraisals.* Since great care is taken in marking final examination papers, a student should apply for reappraisal of a paper only if he has good reason to believe that a mistake has been made. Reappraisals are dealt with by the chairman of the department in consultation with members of the staff. A request for reappraisal must be made by letter to the Registrar (or by completion of an application form in the Registrar's Office) by January 24 in the case of First Term courses, by June 25 for other Winter Session courses, and within thirty days of the publication of results for courses offered in the Spring and Summer Sessions. The request must include a statement of whether the intent of the appeal is to raise or lower the grade. If a student fails to include such a statement it will be assumed that the intent is to have the grade raised. The request must be accompanied by a fee of $10.00 for each paper; the fee will be refunded if the appeal is successful.

The reappraisal privilege is limited to two papers per term in the Winter Session and to a total of two papers for Spring Session and two papers for Summer Session. Normally there is no such privilege for supplemental examinations. Students who have been granted the supplemental privilege and who are awaiting the outcome of a reappraisal should make application for supplemental examinations by the prescribed deadline. Please note however, that the supplemental privilege is not extended to students registered in the Spring or Summer Sessions.

It should be understood that if the grade is changed, the new grade, whether higher or lower than the original, replaces it as the student's official grade in the course.

The following regulations apply to *Supplemental examinations granted in the Winter Session:*

(1) *Granting of Supplementals.* Supplemental examinations may be granted by a faculty council in cases where the weight assigned to the final is 40% or higher. Notwithstanding anything in the preceding regulations, in any faculty where a student must complete an entire year's work satisfactorily before proceeding to the next, supplemental examinations may also be granted in a course taken exclusively by students of the faculty in question, even where the weight of the final examination is less than 40%, provided the weight assigned to the supplemental is at least 60%.

In sections of a multi-sectioned course the distribution of weight will be such that there will be a uniform policy determined by the Department with regard to the granting of supplemental examinations.

(2) *Number of supplementals.* The number of supplemental examinations permitted a student is determined by his faculty council. The privilege of writing supplemental examinations may be withheld by the faculty council if the student's grade in the course is very low, or if his grade-point average, including the course or courses failed, is below that required for promotion. Notification of permission to write one or more supplemental examinations is included in the statement of marks sent to each student.

(3) *Weighting of supplementals.* The percentage allotted to the supplemental examination will be not less than that which was allotted to the final examination.

(4) *Application.* A student who has been granted the privilege of a supplemental examination must apply to the Registrar not later than the deadline shown in the Academic Schedule (§ 261) remitting the prescribed fee. No late applications will be accepted.

(5) *Supplemental examination schedule.* A student must write his supplemental examinations at the time of regular supplemental examinations next following unless he has been granted an extension by his Dean. Extension of a supplemental privilege beyond one year of the time that the final examination was written will not be granted.

Supplemental examinations will be held early in August. However, a student in his graduating year who has an excused absence form, or who fails in a First Term final examination in December may, by permission of his Dean, be allowed a supplemental examination during the Second Term Reading Week or at the end of the session. Application for such an examination must be made at least three weeks before the commencement of the examinations. (See the Academic Schedule, § 261 above.)

(6) *Failure in supplemental examination.* A student who returns to the University having failed a supplemental examination, or having neglected to write it, will be required to repeat the course. In certain cases an equivalent course may be prescribed instead of the failed course.

(7) *Failure in graduating year.* A member of the graduating class who, having exhausted all the regular supplemental examination privileges, has still a failure in one course only, may, with the permission of the faculty council concerned, register in and repeat that course extramurally, unless, in the opinion of the department concerned, it is necessary for him to attend classes in the course a second time.

The following regulations apply to *deferred final examinations.*

(1) *Deferred final examinations.* A student who has missed a final examination because of illness or domestic affliction or who is obliged to absent himself from an examination for some other compelling reason (including religious convictions) may apply for a deferred final examination. Application for such examination must be made to the Registrar by the deadline prescribed in the Academic Schedule (§ 261), must be supported by a satisfactory medical certificate in the case of illness, and must be accompanied by the prescribed fee. Deferred final examinations may be written at the same time as the regular supplemental examinations or as follows.

(2) *Deferred First and Second Term and Full Session Final Examinations in Winter Session.* A student who cannot take a First Term final examination in December or a Second Term final in April because of illness or other compelling reason may be granted a deferred final examination. The time and place of the deferred final examination may be set by mutual agreement among those students who have missed the final examination for good cause and the instructor. If it is not possible to reach mutual agreement, then the examination should be held by the time of the March recess for First Term courses and as soon as possible after the end of the Second Term for Second Term and full session courses. If agreement on a date cannot be set by the instructor and the students requesting the privilege for Second Term courses, then the examination will be held during the regular supplemental and deferred final examination period in August. Application for such examination must be made to the Registrar and must be supported by a satisfactory medical certificate in the case of illness, and must be accompanied by the prescribed fee.

(3) Any student who is granted a deferred final examination in either the First Term or Second Term of a Spring Session course by his or her Dean may write that examination as soon as possible after the end of the term at a time and place mutually agreeable to the student and to the instructor and to any other students in the course requesting the same privilege. If agreement is not possible, the examination will be scheduled during the regular supplemental and deferred final examination period in August.

Any student who is granted a deferred examination in a course in either term of the Summer Session by his or her Dean may write that examination as soon as possible after the end of the term at a time and place mutually agreeable to the student and to the instructor and to any other students in the course requesting the same privilege. If agreement is not possible, the examination will be scheduled on the special supplemental and deferred final examination day in September.

In order to ensure that applications for the writing of deferred examinations for the students attending in the Spring and Summer Sessions are received in time to be processed, students are advised to submit their application to the Registrar's Office as the necessity arises and not to wait until they receive their statement of results.

The following regulation applies to *Special Examinations.*

(1) A special supplemental or a special deferred final examination may be granted to a student who is prevented by illness (attested by a physician), domestic affliction, or other extreme circumstance from writing a supplemental examination or a deferred final examination at the regular time in August. Application must be made to the Registrar a full month before the special examination is to be written, and must be accompanied by the prescribed fee. Special examinations are normally written on the Saturday following the Fall registration period. In certain approved cases they may be written during the regular examination periods in April, May, August, or September.

261.11.6 APPEALS AND GRIEVANCES

General Faculties Council has instructed each faculty to publish in its calendar not only its academic regulations, but also the procedures that it uses for dealing with appeals against decisions affecting the academic standing of a student.

In addition, General Faculties Council has established an Academic Appeals Committee and has delegated to it authority to hear appeals from students on the following matters:
(1) Transfer from one program or faculty to another;
(2) Continuation in a program;
(3) Graduation.
(4) The G.F.C. Academic Appeals Committee is also authorized to hear an appeal from a decision to refuse admission to a non-quota program from a student of a public or private community college, institute of technology, or regional agricultural and vocational college, who falls within the purview of the Admission and Transferability of Credit Policies of The University of Alberta.

A student is expected to exhaust the provisions for appeal within his own faculty before taking an appeal to the G.F.C. Academic Appeals Committee.

The G.F.C. Academic Appeals Committee is not authorized to hear an appeal from a decision respecting a mark in an individual course, from an examination decision made in the Faculty of Graduate Studies and Research, or from a decision to refuse admission to a quota faculty.

For further information regarding appeal procedures at the faculty level a student should seek the advice of his Dean. A student who has been unsuccessful in appealing at the faculty level and who wishes to appeal to the G.F.C. Academic Appeals Committee should consult the Secretary of General Faculties Council in order to learn the procedures to be followed.

261.12 Academic Standing

261.12.1 FIRST-CLASS STANDING

First-class standing in a given year shall be awarded to any student who obtains a grade-point average of not less than 7.5 while enrolled in a full normal academic course load in that year; the definition of a full normal academic course load shall be left to the faculty concerned.

261.12.2 DEGREES WITH HONORS

A student in the Faculty of Arts or of Science with approved qualifications may proceed to the degree of Bachelor of Arts or Bachelor of Science with Honors by following a more concentrated course of study in a special field under the supervision of one of the departments. The time required for an honors degree is four years from senior matriculation.

Degrees with Honors are awarded in two classes: First Class Honors, and Honors, in accordance with the requirements of the faculty and department concerned.

261.12.3 DEGREES WITH DISTINCTION

The notation "With Distinction" is inscribed on the permanent record and graduation parchment of a candidate for any degree, except an honors or graduate degree, if the candidate has obtained a grade-point average of 7.5 or higher over the last two years of his program. In the B.F.A. and B.Mus. programs, the candidate is normally required to carry a full course load in each of the last two years. A student who has taken part of his work at another university may be granted a degree "With Distinction" at the discretion of the faculty concerned.

261.12.4 PROMOTION

Promotion regulations are set by the faculties of the University. Details will be found in the Faculty Regulations Section of the appropriate Faculty calendar.

261.12.5 UNSATISFACTORY STANDING

(1) A student who has been admitted to the University with a weak matriculation record may be warned of the fact at the beginning of his first session.

(2) The records of all students are reviewed at the end of each session. A student whose record is found to be unsatisfactory will be notified by his Dean and may be referred to the Student Counselling Services for recounselling. He may be denied the privilege of writing supplemental examinations and required to repeat his year. A student whose record is extremely unsatisfactory may be required to withdraw from the University, and normally at least a year must elapse before re-admission will be granted.

(3) A student who has been required to withdraw will not be permitted to re-enter without applying to the Dean of the faculty in which he proposes to register. The Dean may require a student to undergo counselling as a part of the process for obtaining re-admission. A student seeking re-admission must report his intention by letter to the Dean not later than mid-June of the year in which re-admission is sought. The letter should include an explanation of his previous difficulties and indicate why the applicant believes that he may now be successful.

(4) A student with an extremely unsatisfactory record at another university will not be considered for admission to The University of Alberta until at least a year has elapsed from the date of his leaving his former university. Thereafter, the procedure outlined in (3) will apply.

(5) Subject to the control of the General Faculties Council, a faculty council may refuse permission to a student or prospective student to enter any year of a program if, in the opinion of the council, the student shows a lack of general educational attainment. Moreover, a student whose record in the classroom, in test, or in final examinations is unsatisfactory may be required to withdraw from the faculty at any time.

261.13 Student Records

261.13.1 CONTENTS OF FILES

(1) Only letters and documents pertinent to a students' admission and academic record may be kept in the official files of the Registrar, the Deans, and the Departmental Chairmen.

(2) Application for Admission forms of any Faculty requiring letters of reference must contain a statement to the effect that the Faculty reserves the right to solicit information from persons other than those named by the applicant as his referees provided the student is advised of the names or the offices consulted as additional referees.

261.13.2 STUDENT RECORDS

(1) Official transcripts are issued only upon the request of the student. They are issued to him personally or to whomever he designates. An official transcript bears the original signature of a member of the Registrar's staff who has been given authority to sign transcripts, and the official seal of the University is imprinted over the signature.

(2) Unofficial copies of the student's academic record are issued to the student in the form of his year-end Statement of Results; to the student's Dean, and to the Chairman of the Department or his designee, in the case of a student registered in a specialized, honors or graduate program. An unofficial transcript or copy of the student's academic record bears neither an original signature nor the University seal.

(3) Unofficial copies of the student's academic record may be issued to the following at their request: Student Counselling Services, when a student has been referred for counselling by an authorized officer of the University; and the Student Awards Office, where an award made through a University scholarship committee is involved, on the understanding that information regarding the student's academic record will not be furnished to the scholarship donor without the student's consent.

(4) Unofficial copies may be issued at the student's request to other offices or individuals in the University.

(5) Public information regarding students, such as dates of attendance, place and date of birth, city and home address, verification of degree or degrees may be issued at the discretion of the authorized officer of the University to educational institutions, appropriate government agencies, prospective employers, and scholarship donors.

(6) Academic and disciplinary records are separate. The only disciplinary action that will be documented on a student's academic record is one involving his suspension or expulsion from the University. There is to be only one official disciplinary record. Prior to January, 1974 disciplinary records were kept by the Dean's Council. Since that date they have been kept in the custody of the Secretary to the General Faculties Council, the Officer responsible for implementing University Disciplinary Procedures. The only persons having access to such record will be those directly concerned with the action.

(7) Where access to academic records is sought for the purpose of research, such access may be granted by the Executive Committee of General Faculties Council on such terms as may be necessary to ensure the confidentiality of individual student records. Research on student data will be defined as not being within the normal administrative operation of the University. In case of doubt as to what may fall within "the normal administrative operation of the University", the G.F.C. Executive committee will decide.

261.13.3 LETTERS OF REFERENCE AND RECORDS

(1) The contents of letters of reference regarding a student will not be revealed to the student without the permission of the referee. Letters of reference will be used only for the express purpose for which they have been supplied unless the permission of the referees and the student concerned has been given for other purposes.

(2) Where a student has gone on his own initiative as a patient to University Health Service, or as a client to Student Counselling Services, the contents of his file are private, in accordance with professional ethics or codes of behavior.

(3) Where a student has been referred by an authorized officer of the University to the University Health Service or to the Student Counselling Services, the consultant's opinion will be reported to the authorized officer if the student gives written permission to do so. Such written permission shall be granted when the student signs a release form, the nature of which will be determined by the Service in question. The nature and content of any report provided by the consultant will be determined by the ethics and codes of behavior of the consultant's profession. If the student authorizes the consultant to release a report, the consultant may, at his discretion, discuss the contents of the report with the student.

(4) Confidential information regarding a student's record may be divulged by a faculty member to institutions, agencies or prospective employers only with the student's knowledge and consent. A faculty member, when called upon to do so, may use his discretion in expressing his opinion to such institutions, agencies or prospective employers concerning a student's academic ability, character and personality. However, a record of the opinion so expressed will not become part of the student's file.

261.13.4 EXCEPTIONS TO STATED POLICY

Any student who objects to the release of information regarding his academic record, in accordance with the policy stated above, should notify the Registrar in writing, giving his specific objection. Appropriate action will be taken by the Registrar and he will so advise the student.

261.14 General Regulations and Information

261.14.1 WITHHOLDING OF UNIVERSITY DOCUMENTS

In any case where a student has neglected or refused to pay amounts owed to the University, the Registrar has been empowered and directed by the Board of Governors to withhold all forms of certification of the student's marks or of other indicia of academic attainment, such as graduation diplomas, until the student has settled his account with the University. For example, certification with respect to the student's academic attainment may be withheld if the student owes the University for library penalties or fines; for purchases at the University Bookstore; for parking or traffic violations; for breakage or damage to laboratory facilities or supplies; for student fees and University of Alberta Emergency Student Loans ; for room and board fees; for fees for supplemental or deferred final examinations; and, for fines imposed by the Discipline, Interpretation, and Enforcement Board of the Students' Union.

261.15 Student Conduct and Discipline

261.15.1 GENERAL INFORMATION

When a student enters the University, it is expected that he will apply himself to his studies and conduct himself with propriety. Should a student fail to live up to these expectations, the University reserves the right to take such action as, in its opinion, the case warrants.

Any person believing that a student has committed an offense against University rules may, by a statement in writing delivered to the Officer responsible for disciplinary procedures (the Secretary to General Faculties Council), require the Officer to prepare and serve a charge upon such student. General University Disciplinary Panels (consisting of three persons of whom two are students) have been established to hear such charges and appeals from Panel decisions may be made to a University Appeal Board of like composition. The Disciplinary Panels by delegation of authority from General Faculties Council, are empowered to fine students, to suspend or to expel. In cases of academic dishonesty, such as plagiarism, the complaint is made in the first instance to the student's instructor. If the offense is serious it will be referred to the dean of the student's faculty who may in turn refer the complaint to the General University Panel.

The Students' Union deals with matters of student discipline coming within its purview. For this purpose it has set up a Discipline, Interpretation and Enforcement Board. Appeal from rulings of this Discipline Board or the Lister Disciplinary Committee is to the G.F.C. Disciplinary Tribunals.

The assistant deans for residence, in conjunction with the elected student committees in the residences, are responsible for the supervision of conduct in the halls of residences.

There is also a Dean of Students who is prepared to assist students in disciplinary matters.

A student who feels he has a legitimate grievance that has not been adequately dealt with through other channels has the right to petition any of the governing bodies of the University through the President of the University.

261.16.15 SPRING AND SUMMER SESSION ABROAD

(1) ANTHR 480-75. *Method and Theory in Prehistoric Archaeology.* ★6 A comprehensive survey of the methods and techniques used in prehistoric archaeology, including auxiliary sciences; conceptual approaches and models used for interpreting archaeological data and cultural history; the relation of explanatory theory in cultural history to anthropology as a whole. Prerequisite: ANTHR 306, or consent of the Department. Note: (A) This course will be given in Montana during the Summer Session only. It will be open to individuals with some background in either cultural anthropology or archaeology. Consent of the Department is required. The course, which is taught as a Field School in the Pryor Mountains of Montana (near Yellowstone), provides a balance between theory and method by placing an equal emphasis upon the collection, analysis, and interpretation of data. In addition to providing experience in reconnaissance and excavation techniques, the course will allow adequate time for labs and seminars. There will also be flintknapping demonstrations and sessions on how to relate this kind of data to the archaeological record. Weekends will be free for excursions to nearby points of interest. Those interested may obtain further information from the Department of Anthropology. (B) A letter of permission will be needed by students applying from other universities to ensure that proper credit will be given. If not currently enrolled in another degree program, please apply for Special Student status. The tuition fee will **not** be refunded except in cases of extreme distress. Participants must arrange their own transportation to and from Montana, and are requested to bring their own tents and camping gear. (C) Audit privileges are not extended to students in this course. Students who do not wish credit can apply to the Dean for permission to register as special students and will pay the normal fee. (D) This course will be withdrawn unless there is a minimum of 10 students enrolled by May 8, 1981. Registration will be limited to 15 students.

(2) ANTHR 590. *Advanced Physical Anthropology: Methods in the Study of Primate Behavior.* ★6 This course, designed for upper-division undergraduates and graduate students, is offered as a practicum in methods and research design. Elements of research design, especially data gathering and analysis, are discussed and applied in classroom and field situations. The course, which is taught as a field school at Arashiyama West Institute, near Dilley, Texas, provides lectures, labs and field experience in the methods of observing the behavior of monkeys in a non-caged environment. Observational techniques (using various kinds of data sheets, audio and video-tape, and computer keyboard), sampling methods, data preparation and analysis, and the practical difficulties of working with live animals in a free-ranging situation will all be taught, experienced and discussed. There also will be presentations by other primatologists, experienced in various types of research situations (case-studies, colony studies, small enclosure studies, field studies) and visits to two nearby primate research centers. The Arashiyama West Institute Research Ranch is ideal as a training ground in ethological field methods. Systematic observational and data collecting techniques can be easily demonstrated and applied with this well studied and well habituated group. The research facility consists of an electrically fenced 50 acre enclosure in which the Arashiyama West troop of Japanese macaques range freely. This "semi-free ranging" situation combines the best of controlled, captive animal studies and the much more difficult free ranging animal studies. Thus it is excellent for an initial field experience. This group of monkeys has been continuously studied in Texas, and formerly Japan, since 1953. All the animals are individually known and marked for easy identification. Genealogical, management and population data for the group are available. In addition to work at the Institute site in Dilley, instructional and training sessions will be held at the Southwest Regional Foundation for Research and Education in San Antonio, some 70 miles from Dilley. There observational studies of baboons in a 6 acre enclosure are being carried out under the supervision of Dr. A. M. Coelho, and students will have the opportunity of seeing techniques of data collection on computer-linked keyboards in action. Classes will commence on May 4, with several days of classroom instruction and discussion. The class will then move to the field to the primate research centres until the end of May. Students would then attend the meeting of the American Primatological Society from June 2-6 in nearby San Antonio, Texas. Instructors and students will arrange their own transportation to and from Dilley, Texas. Arrangements will be made to meet students at Dilley and drive them to the field site. A camphouse with cooking facilities, running water and flush toilet is provided on the ranch, however, students wishing to sleep in their own tents may do so. On-site transportation will be available and an air-conditioned trailer is provided for daytime classroom use. Students will be asked to share the costs and cooking of their food. A list of required field gear, and any further information should be obtained from the instructor Linda Fedigan, Department of Anthropology, University of Alberta. Note: (A) This course will be given in Texas during the Spring Session only. Those interested may obtain further information from the Department of Anthropology. (B) A letter of Permission will be needed by students applying from other universities to ensure that proper credit will be given. If not currently enrolled in another degree program, please apply for Special Student status. The tuition fee will **not** be refunded except in cases of extreme distress. (C) Audit privileges are not extended to students in this course. Students who do not wish credit can apply to the Dean for permission to register as special students and will pay the normal fee. (D) This course will be withdrawn unless there is a minimum of 10 students enrolled by April 1, 1981. Registration will be limited to 15 students.

(3) ART 339-45/439-45/539-45. *Design Awareness—Study Trip to Europe.* ★6 This course is an overview of the qualities and applications of contemporary industrial, graphic, interior, furniture and architectural design and their influence on the culture and economy of England and West Germany. The course is scheduled for May 4, 1981-June 12, 1981. The first two weeks will be spent in lectures on campus—the following four weeks will be spent in lectures on campus—the following four weeks will be spent in England and West Germany. If not enrolled in a degree program apply for Special Student status. The tuition fee will **not** be refunded except in cases of extreme distress. (C) Audit privileges are not extended to students in the course. Students who do not wish credit can apply to the Dean for permission to register as special students and will pay the normal fee. (D) These courses will be withdrawn unless there is a minimum of 15 students enrolled by the 1st of April, 1981. Total registration will be limited to 20 students.

(4) Class 475-75. *Practical Methods in Classical Archaeology.* ★3 The techniques of excavation and recording in Classical Archaeology. Prerequisite: Consent of the Department. (7) *July 1981: French Immersion in Jonquiere, Quebec.* Considering the success met by the 1979 and 1980 total immersion sessions held in Jonquiere, P.Q., during the month of July, the Department of Advanced Education has encouraged the University of Alberta to offer the program again. Practicing teachers who are teaching in French or French as a second language are encouraged to take this opportunity to live with a French speaking family, to take credit courses in French grammar, Children's Literature in French, French Canadian culture offered by a French Canadian instructor as well as teaching strategies.

The courses are distributed in two programs according to the language background and interests of the participants:

Program I:

FREN 390—French Literature for Children
FR CA 333—Aspects of French Canadian Civilization and Culture
ED CI 497—Conference Seminar: Developing Communication Strategies and Modules (French)

Program II:

FREN 408—Third Year French for Honors Language Students
FR CA 499—Directed Reading in French-Canadian Culture and Civilization
ED CI 498—Conference Seminar: Developing AV Material for Modules to Include Cultural Elements

Each of these courses is worth 3 credits. All courses are offered in French; Dr. P. A. R. Monod is the instructor for the French courses, Gerald Savard gives the French Canadian courses and Drs. D. Petherbridge and M. J. Monod are responsible for the ED CI courses.

Apart from the regular credit courses socio-cultural activities are organized so that teachers will meet as many people from Quebec as possible and get acquainted with their way of life: a night in Montreal, a 2 nights-3 days excursion to Quebec City plus 2 other excursions in the Jonquiere region, visits to museums, "artisanss, chansonniers", theatre and concerts are meant to further the personal experience of each participant with the Quebec culture and way of life.

Course fees are to be paid directly to the Comptroller's Office.

For any further information please contact Dr. P. A. R. Monod, Romance Languages (432-5530) or Dr. M. J. Monod, Secondary Education (432-3658).

261.16.16 1981 LEADERSHIP COURSE FOR PRINCIPALS, TEACHERS AND COUNSELLORS

The Leadership Course will be held at the Alberta School for the Deaf from July 13 to July 17, 1981.

This course is designed to enhance communication skills and the quality of leadership in educational settings. It is intended to serve three major purposes:

1. To provide an opportunity for principals, teachers and counsellors to become informed of new techniques and trends in the field of education;
2. To provide a setting for inter-communication of new concepts and discussion of roles;
3. To discuss cooperatively specific and relevant problems relating to practice.

This is mainly a workshop type of course. The various speakers will contribute much to our thinking but plans for the future, changes we make, the integration of concepts and the ideas we share will largely rest with each individual. We hope that participant's considerable experience and knowledge will be shared in such a way that the activities and views presented by the guest speakers will act as a catalyst to aid us. It is hoped that individuals will also take advantage of informal discussions between administrators, counsellors and teachers. Certain sessions have been jointly planned to encourage and provide this liaison.

Information can be obtained by writing to Dr. Harvey Zingle, Director, Leadership Seminar, 1-135 Education North, University of Alberta, Edmonton, Alberta, T6G 2G5.

262.2 Programs

262.2.1 THE DEGREE OF B.A. (GENERAL)

Note: The word 'course' used in the following context, refers to a full-session course or equivalent (two single-term courses).

(1) The B.A. (General) program is designed to enable a student to obtain a diversified education in more than one branch of study, within the limits of a three-year program. A student must secure credit in at least eight Art courses.

a. Duration: A fifteen-course program normally taken in three years. This period may be extended at the student's discretion. Acceleration of the program will only be permitted in exceptional circumstances and with the Dean's approval.

b. Language requirement: Candidates for the B.A. (General) must present credit in a language other than English, either at the senior matriculation level or at university level. In the event of a matriculation deficiency, the language course must be taken in the first year.

c. Residence requirement: A student proceeding towards the B.A. (General) degree must have credit for at least five full-year (or equivalent) University of Alberta courses. These shall normally be the final five courses in the student's program. If the student has fulfilled the five-course requirement before the beginning of the final year of his program, he may apply to the Dean for permission to take one or more of his final five courses elsewhere.

(2) Curriculum:

a. First Year: Five junior courses are required; no more than one course may be selected from each discipline.

b. Compulsory course requirements: One full course equivalent is required from each of the following four areas: Laboratory Science; Fine Arts; Humanities; Social Sciences. (For classification of courses see § 42.3.) Mandatory First Year requirements include a junior English course, a language other than English (where a language deficiency of matriculation exists) and normally, an approved laboratory science course (§ 42.3, para. 1.a.).

Note 1. If a junior laboratory science course is not taken there are a number of senior laboratory

science courses available, but most call for prerequisites.

Note 2. The required junior English course does not satisfy the "Humanities" requirement.

Note 3. Students who entered the BA program prior to September 1979, may continue under the program requirements then in effect (§ 43.1.2 of the 1978-79 Arts and Science calendar), those who interrupt their program for a period of more than two years will be required to meet the new requirements.

c. Subjects of concentration: Two are required: a principal subject chosen from the Fine Arts, Humanities, Social Sciences or Mathematics, and a second subject, which may be chosen from the offerings of either the Faculty of Arts or the Faculty of Science. In the principal subject, a minimum of three courses is required, at least two of which must be senior courses; a maximum of five courses permitted. If a combination of Mathematics and Statistics is chosen, a minimum of four courses is required; two must be at the senior level. The following science combinations are permissible but require a minimum of four courses, two of which must be at the senior level:
Mathematics/Statistics;
Biology/Zoology/Microbiology/Entomology/
Botany/Genetics; Astronomy/Physics;
Chemistry/Biochemistry;
Geography/Cartography/Meteorology.

Course selection: Courses offered in the departments and/or subjects listed below will be accepted by the Faculty of Arts as a subject of concentration provided that the requirements stated in the preceding paragraph and the course prerequisite requirements are fulfilled: Anthropology, Art, Chinese, Classics (Ancient History, Art, Classical Literature in Translation), Greek, Latin, Comparative Literature, Drama, Economics, English, Geography, Germanic Languages (German, Scandinavian), History, Japanese, Linguistics, Mathematics, Music, Philosophy, Political Science, Psychology, Religious Studies, Romance Languages (French and/or French Canadian, Italian, Spanish, Romance Linguistics), Slavic Languages (Polish, Russian, Ukrainian), Sociology.

e. Limitations: No more than four courses may be taken for credit in a subject other than the subjects of concentration.

f. Junior courses: Normally, no more than seven courses at the '100' or '200' level may be taken for degree credit. In no case will this limit be extended to permit a student to make up a matriculation deficiency for degree credit, or to include a 'free' option at the junior level.

g. Free options: After completion of all first year requirements, a student may include two courses chosen from outside the Faculties of Arts or Science in his program. In exceptional circumstances a third such course may be taken. (§ 42.3.2) of the Arts and Science calendar for restrictions involved and the Faculty of Arts program office for the list of courses not open to Arts students.)

262.2.4 CERTIFICATE OF EQUIVALENCE

Applicants holding a University of Alberta B.A. (General) degree, may qualify for a certificate indicating that they have met the requirements of the B.A. (Special) or B.A. (Canadian Studies) degree, by completing five further courses to meet curriculum requirements. This option is not open to degree holders from other universities.

§§ 43.2 to 43.23 of the Faculty of Arts Calendar contain advice offered by the various Arts departments for students selecting courses in their subjects of concentration. Further information may be obtained by consulting members of the department concerned.

263.1.2 GENERAL INFORMATION

The Faculty of Business Administration and Commerce offers Spring Session, Summer Session, and On-Campus Evening Degree Credit courses acceptable for credit in the programs leading to the degrees of Bachelor of Commerce (B.Com.) and Master of Business Administration (M.B.A.).

263.2. Programs

263.2.1 THE B.COM. PROGRAM

(1) *Purpose*—The Bachelor of Commerce program seeks to provide the student with a broad background in the different areas of business as well as related fields in the humanities and social sciences. The business world and its environment have changed enormously in the last twenty years and will change at an even faster pace in the next twenty. In this trend questions about the environment will become increasingly important. No school of business can possibly teach the solution to problems which will arise several years from now. A school should, therefore, seek to provide a basis for effective self-learning through actual experience by teaching the broad underlying fields of knowledge which are basic to business. The emphasis is upon the development of a comprehensive analytical framework within which various organizational problems can be analyzed.

(2) The B.Com. program normally involves four academic years of post-secondary study.

(3) *B.Com. Program After Approved Degree*—Normally the holder of an approved degree may qualify for the Bachelor of Commerce degree upon completion of twenty selected half-year courses.

(4) A full description of the B.Com. programs is contained in the Faculty of Business Administration and Commerce section of the University Calendar. This publication, as well as other information is available from the Student Records Office in the Faculty.

263.2.2 GRADUATE STUDY

The Master of Business Administration program is designed for students who desire a broad

preparation for management positions in industry and government. Its emphasis is upon breadth of training rather than specialization. The focus of the M.B.A. program is on the roles of the manager and the administrator. Although functional areas of business such as finance, marketing, and management science are important elements in the program, they are only a part of and subsidiary to the primary purpose of the program, which is education for general managerial and administrative responsibilities.

The program provides professional training in business administration for outstanding students regardless of their undergraduate field of study.

264.1.2 GENERAL INFORMATION

Courses included in the Special Sessions Calendar that are offered by the Faculty of Education are credit courses that may be applied to the B.Ed. Degree, and Graduate Diploma. These courses may also apply to graduate degrees offered by the Faculty of Graduate Studies and Research.

In order for courses to be applied to programs, registrations must be approved by either the Faculty of Education or the Faculty of Graduate Studies and Research.

Course Load

a. Students in undergraduate programs are restricted to 3 credits in each term of the Spring and Summer Session. Students with an established G.P.A. of 7.5 on the last 30 credits of work completed as a student in the Faculty of Education may do up to 6 credits each term of the Spring or Summer Session to a maximum of 18 credits for the combined Spring and Summer Sessions.

b. Diploma students are restricted to 3 credits each term of the Spring or Summer Session except by *written* permission of their respective Department Chairman. Attach your written consent to your registration form.

c. Special and Visiting Students are restricted to 3 credits each term of the Spring or Summer Session, regardless of academic average.

[Students who submit registration forms which do not conform to these regulations will have the extra courses deleted before the registration is processed.]

264.2 Programs

Continuing students in undergraduate programs should consult the Faculty Calendar for appropriate program information. Where questions arise about the suitability of a course or a program, the student should contact the Office of the Associate Dean (Student Services). Inquiries will be dealt with by a Faculty Record Clerk. Where a course does not fit the program, permission to register will be denied.

Students on the old program who have completed less than 60 credits can expect to have their programs modified or be transferred to the new B.Ed. program in order to accommodate a longer student teaching experience.

Students may not register in Spring and Summer courses if the courses selected interfere with the sequencing of courses as they relate to the education practicum experience provided by the Faculty.

No education practicum courses may be taken in the Spring Session except by special permission under extraordinary circumstances. Requests for education practicum courses must be approved by the Office of the Associate Dean, Student Services, before a request may be submitted to the Field Experience Office.

Elementary Education students should not enrol in any free options in Special Sessions nor use any program slots reserved for practicum.

Students enrolled in the elementary generalist program (1979 admissions) should not enrol in Education courses in Special Sessions.

WARNING: Each student is responsible for the accuracy of his/her own program. You must insure that any course(s) taken in Spring/Summer does not interfere with your professional or senior terms. If you take inappropriate or out of sequence courses you may lose credit for those courses. If you have any questions be sure to check with your record clerk in Room 833 Ed South.

266 FACULTY OF LIBRARY SCIENCE

266.1 Introductory

266.1.1 OFFICERS OF THE FACULTY

Professor and Dean

W. J. KURMEY, B.Sc., A.M.(L.S.)

266.1.2 GENERAL INFORMATION

The Faculty of Library Science, the only professional library school in the prairie provinces, offers the Master of Library Science degree.

The first classes in a Bachelor of Library Science program began in 1968. In 1970 the B.L.S. program was accredited by the Committee on Accreditation of the American Library Association and was thus recognized by the American and Canadian Library Associations as meeting library education standards.

In 1971 the Faculty initiated a Master of Library Science program for which the B.L.S. program was the qualifying year. In 1976, in keeping with the Canadian pattern of education for librarianship, the B.L.S. was discontinued, and the present two-year M.L.S. program was instituted.

As the first professional degree, the M.L.S. represents a program designed to develop the

knowledge, understanding, attitudes, and skills that will prepare graduates for positions of responsibility in school, public, academic, and special libraries.

The M.L.S. program was accredited by the American Library Association in January, 1979.

266.2 *The Degree of M.L.S.*

A full-time student who is registered for the M.L.S. degree program will normally be able to complete degree requirements in two years. During the qualifying year students will be required to take five full courses or their equivalent (ten half-courses). During the candidacy year students will be required to take the equivalent of ten half-courses, and spend a minimum of two terms in full-time attendance. Students may, with approval, include up to two full courses in a faculty other than the Faculty of Library Science. The program includes provision for both a thesis and non-thesis option.

Credit for courses taken elsewhere may be granted as advanced credit by the Dean of the Faculty of Graduate Studies and Research on the recommendation of the Faculty of Library Science provided that the courses have not been counted towards a previous degree or diploma. (Please note a special provision for applicants with the B.L.S. degree.)

Inquiries regarding program and course details and financial assistance other than University scholarships should be made to the Dean of the Faculty of Library Science. Inquiries about University scholarships should be made to the Student Awards Office.

The Faculty of Science offers Spring Session, Summer Session, On-Campus Evening Degree Credit Courses and Evening Credit Program (Off-Campus) courses acceptable for credit in the general programs leading to the degree of Bachelor of Science (B.Sc.). Students who are planning to begin work in the Faculty of Science in the 1980-81 Winter Session in either the Evening Credit Program (Off-Campus) or by participating in the On-Campus Evening Degree Credit Courses offered in Edmonton, should contact the office of the Dean before registering.

268.2 Programs

268.2.1 GENERAL PROGRAMS

General programs in the Faculty of Science are designed to enable the student to obtain a diversified education in more than one branch of study within the limits of a three-year program. The basic outline of the program is as follows:

First Year: Arts option; three Science courses; one option.

Second Year: An Arts course; three Science courses; one Arts or Science option.

Third Year: An Arts course; two Science courses; two Arts or Science options.

Selection of Courses: The following regulations govern General programs:

(1) In each year, a student's program must be approved by the Dean or his or her designee. Students in PreDental and Pre-Medical programs must consult the Dean with respect to selection of courses in each year of the program. Other General program students must consult either the Dean or an advisor in the Department representing the

principal subject of concentration regarding selection of courses in each year of the program.

(2) To obtain a General B.Sc. degree a student must pass 15 full-session courses or the equivalent. Of these at least 8, and no more than 12 full-session courses or the equivalent must be Science courses, and at least 3, and no more than 7 full-session courses or the equivalent, must be Arts courses.

(3) Each student must take at least 4 and no more than 6 full-session courses or the equivalent, in the principal subject of concentration which must be one of the Sciences, and a minimum of 3 and a maximum of 4 full-session courses or the equivalent, in a second subject of concentration which must also be one of the Sciences. In each subject of concentration, no more than two full-session courses or the equivalent can be at the junior level.

(4) Normally no more than 7 full-session junior courses or the equivalent are permitted in the General program.

(5) Up to the equivalent of one full-session course approved by the Dean may be taken from Faculties other than Arts and Science. Such courses are considered as "approved options" and are not to be included either as part of the minimum of three full-session courses or the equivalent in Arts or in the minimum of eight full-session courses or the equivalent in Science. Under certain circumstances a student may be permitted by the Dean to take up to the equivalent of one additional full-session non-Arts and non-Science course in subjects closely related to those offered by the Faculty of Science, e.g., Animal Science, Plant Science and Soil Science.

Academic Standings and Graduation: The following regulations govern General programs:

(1) To obtain a B.Sc. General degree, a grade-point average of at least 5.5 must be attained on the last 10 full-session courses or the equivalent credited to the degree. Moreover, a grade-point average of at least 5.5 must be attained for all courses in the principal subject of concentration.

(2) A grade of 3 may be accepted as a passing grade in no more than one full course or two half courses and then only from among the last five full-session courses or the equivalent credited to the degree. Moreover, such credit may not be obtained in courses comprising the principal or second subject of concentration.

(3) The Dean may permit a student to proceed to a degree over a longer period than three years, or to meet the requirements in a shorter time by attending Spring and/or Summer Sessions or by taking extra courses during the Winter Session.

(4) B.Sc. General degrees with Distinction are awarded when students achieve a grade-point average of 7.5 or higher over the last 10 full-session courses or the equivalent, provided the student was enrolled in a normal academic load (five full-session courses or the equivalent) during the Winter Sessions of the last two years.

(5) A student transferring to the Faculty of Science with advanced standing will be required to complete at least 5 (normally the last 5) full-session courses or the equivalent at The University of Alberta.

The following sections contain advice offered by the various Science departments to students selecting courses in their subjects of concentration. Further information may be obtained by consulting members of the Department concerned.

268.2.2 SPECIAL CERTIFICATES

Students who have received a B.Sc. degree and who meet the requirements for one of the Specialization Programs or for one of the Honors Programs by the addition of a minimum of five full courses or the equivalent will be awarded a Special Certificate to recognize the additional qualification. The specific requirements for this Certificate are determined for each student by the appropriate Department and the Dean.

268.2.3 THE B.SC. AFTER A PREVIOUS DEGREE

Requirements for B.Sc. after B.Ed. Holders of the B.Ed. degree, whose programs include thirteen Arts and Science courses, may qualify for the B.Sc. degree in the General Program by completing "at least" six full-session courses or the equivalent; and attaining a grade-point average of 5.5 in these courses. Those with fewer than thirteen Arts and Science courses will be required to take additional courses.

Students proposing to obtain the General B.Sc. in this manner will be expected to select their courses in conformity with the requirements of the General program outlined in § 268.2.1. To receive the B.Sc. General degree, the student must complete at least ten full-session courses or the equivalent in the subjects of the Faculty of Science in the two degree programs. At least six of these full-session courses must be senior ones. If a student holding a B.Ed. degree wishes to obtain an Honors or Specialization degree in the Faculty of Science, the student must complete at least eleven full-session courses or the equivalent and meet the requirements of the four-year program as specified by the Department in which the student is majoring. The student must complete at least fourteen full-session courses or the equivalent in the subjects of the Faculty of Science in the two degree programs.

Requirements for B.Sc. after B.A. Holders of the B.A. General degree may qualify for the B.Sc. General degree by completing at least nine full-session courses or the equivalent and attaining a grade-point average of at least 5.5 in these courses. Students proposing to obtain the General B.Sc. in this manner will be expected to select courses in conformity with the requirements of the General program outlined in § 268.2.1. To receive the B.Sc. General degree, the student must complete at least twelve full-session courses or the equivalent in the subjects of the Faculty of Science in the two degree programs. Students holding a B.A. General degree wishing to obtain an Honors or Specialization in the Faculty of Science must complete at least fourteen full-session courses or the equivalent and meet the requirements of the four-year program as specified by the Department in which the student is majoring. The student must complete at least fifteen full-session courses or the equivalent in the subjects of the Faculty of Science in the two degree programs.

Students wishing to obtain a B.Sc. after a four-year B.A. must consult the Dean.

Requirements for B.Sc. after Engineering Degree. The requirements are basically identical to those for a B.Sc. after B.Ed.

269.1.2 GENERAL INFORMATION

The Faculty of Graduate Studies and Research administers programs leading to a variety of graduate degrees and postgraduate diplomas. Graduates who have not been accepted as candidates for degrees may be considered as "qualifying" or "probationary" graduate students if they are eligible and desirous of seeking admission to candidacy at a later date. "Special" graduate students and "Exchange" graduate students may also be accepted in the Faculty.

Students proposing to do graduate work in the Spring or Summer Sessions should familiarize themselves with the regulations and procedures set forth in the Calendar of the Faculty of Graduate Studies and Research, which may be obtained from the Faculty Office, Room 2-8, University Hall. A few of the more important academic regulations are given in § 269.2 below.

269.2 Academic Regulations

269.2.1 ADMISSION

Application for admission to the Faculty must be submitted on forms supplied by the Dean. A graduate of another university must arrange with the Registrar of that institution to forward two transcripts of his academic record to the Dean prior to the deadline dates for Spring Session, Summer Session, On Campus Evening Degree Credit Courses or Evening Credit Program (Off-Campus) specified in the Academic Schedule (§§ 261.2, 261.3 and 261.4). If applications are received after these dates the Faculty gives no assurance that they can be processed in time to permit registration in the Session desired. The Dean may require the applicant to furnish an official description of the content of the courses listed on the transcripts.

269.2.2 REGISTRATION

An applicant who has been accepted by the Faculty as a qualifying graduate student, a probationary graduate student, a candidate for a master's degree, or a provisional candidate for a doctor's degree, must:

(1) before completing registration forms, consult with the chairman of the department responsible for his graduate study program regarding his course of studies in the Spring Session, Summer Session, On-Campus Evening Degree Credit Course or Evening Credit Program (Off-Campus). The department concerned will submit a program form to the Faculty of Graduate Studies and Research.

(2) register not later than the dates specified in the Academic Schedule (§§ 261.2, 261.3 and 261.4) if he proposes to work on his program in the Spring Session, Summer Session, On-Campus Evening Degree Credit Courses or Evening Credit Program (Off-Campus).

(3) maintain continuous registration during his program by registering once a year. This registration entitles him to the use of university facilities and to assistance from his supervisors for a 12-month period. Registration during the final year of the program permits the student to graduate at either of the two following convocations.

A student who fails to maintain continuous registration will be considered to have withdrawn from his program. If he wishes to resume studies on the program, he must apply for readmission to the Faculty of Graduate Studies and Research and have his program reassessed in terms of the regulations in force at the time of application.

269.2.3 ORAL EXAMINATION AND CONVOCATION

Unless otherwise specified, each candidate must pass a final oral examination following the submission of the thesis to the Examining Committee. The finished thesis must be submitted to the examining committee at least two weeks before the oral examination.

In order to obtain his degree at the earliest Convocation following the completion of his thesis, the student must have submitted the unbound copies of his thesis to the Faculty Office on or before a date set by the Faculty to allow enough time for the student's name to appear in the Convocation program. The schedule of deadline dates is available from the Faculty Office.

NOTE HISTORIQUE ET BUTS

Le Collège Saint-Jean a été fondé en 1908 l'année même où a été inaugurée la Faculté des Lettres et des Sciences de l'Université de l'Alberta.

Les deux institutions ont le même âge mais ont évolué de façon très différente. Le Collège est devenu Collège Universitaire Saint-Jean, partie intégrante et secteur bilingue de l'Université de l'Alberta, 62 ans après sa fondation, le 27 novembre 1970. Le statut officiel de Faculté lui fut octroyé en septembre 1977.

Comme faculté bilingue, elle doit d'abord permettre aux étudiants francophones de poursuivre leurs études universitaires dans un milieu qui leur assure une culture et un progrès intellectuel d'inspiration française, et ensuite permettre aux étudiants anglophones de bénéficier de ce milieu.

L'Université espère promouvoir ainsi la culture française en Alberta et permettre à un plus grand nombre d'étudiants de s'exprimer couramment dans les deux langues officielles au Canada.

HISTORICAL NOTE AND AIMS

Collège Saint-Jean was founded in 1908, the same year as the inauguration of the Faculty of Arts and Sciences of The University of Alberta.

Though of the same age, the two institutions have evolved in very differing fashion. The Collège became Collège Universitaire Saint-Jean, an integral part and a bilingual sector of The University of Alberta, 62 years later on November 27, 1970. Faculty status was granted in September 1977.

The goal of the Faculté firstly, as the bilingual faculty is, to allow students of French background to pursue their university studies in a French environment and, secondly, to allow students of English background to benefit by this environment.

The University thus hopes to foster French culture in Alberta and to allow more students to master the two official languages of Canada.

270.2 *Programmes d'études*

La Faculté Saint-Jean offre les programmes en vu d'un B.A., B.Ed., et B.Sc. billingue. Un étudiant qui désire s'incrire éventuellement dans une autre Faculté peut suivre à la Faculté Saint-Jean un Programme de Lettres et-ou de Sciences de première année. Ce droit s'applique par exemple aux étudiants qui désirent s'inscire éventuellement en: Commerce, Economie Domestique, Pharmacie, Education Physique, Sciences Médicales de laboratoire et autres. Pour tout autre renseignement à ce sujet, s'adresser au Doyen de la Faculté.

La Faculté permet aussi aux étudiants inscrits dans ces diverses facultés d'acquérir une meilleure connaissance de la langue et de la culture françaises.

Un étudiant inscrit à l'Université de l'Alberta dans une autre faculté peut suivre des cours enseignés à la Faculté Saint-Jean. Ces cours donnent des crédits équivalents à ceux obtenus dans des cours semblables suivis au Campus principal. Les candidats qui désirent suivre ces cours doivent obtenir l'autorisation du Doyen de la Faculté. Cette permission ne serait pas accordée à ceux qui désireraient ne suivre que Français 220.

NOTE: Pour de plus amples renseignements, voir l'Annuaire de la Faculté Saint-Jean.

270.2 *Programs of Study*

Faculté Saint-Jean offers a bilingual program towards the B.A., B.Ed., and B.Sc. degrees. A student who wishes to eventually register in a faculty other than Arts, Science, or Education may often take all his first year in a program of Arts and/or Science at Faculté Saint-Jean. This applies to students wishing to register eventually in: Commerce, Home Economics, Pharmacy, Physical Education, Medical Laboratory Sciences and others. For further information, contact the Dean of the Faculté.

The Faculté seeks to allow students registered in those faculties to develop their knowledge of the French language and culture.

A student registered at The University of Alberta in another faculty may take courses offered at Faculté Saint-Jean. Credits given for these courses are equivalent to those given for comparable courses on the main campus. Candidates wishing to take these courses must obtain the consent of the Dean of the Faculté. Permission would not be granted to students wishing to take only Français 220.

NOTE: For further information see the Faculté Saint-Jean Calendar.

271 FACULTY OF EXTENSION

The Faculty of Extension provides a wide variety of continuing education services to people in the northern part (and in some cases the whole) of Alberta. In the 1978-79 academic year, enrollment in the Faculty's 788 workshops, seminars, short courses and evening lectures totalled 26,560. In addition, the Faculty circulated to borrowers 171,000 books, 18,190 16 mm films, and 4,789 records.

The courses and seminars offered by the Faculty cover subjects ranging through business management, law, engineering, humanities, social sciences, natural and physical sciences, fine art, agriculture and adult education training. While large numbers of classes start in September, January and April, many other events are being offered at almost every time of the year. None of the courses in the Faculty carry degree credit, although some programs of study do lead to certificates. These non-credit courses appear to fill a real educational need felt by the people who want to continue their education, but do it in an informal way and are not subject to the performance pressures of degree study. Subjects for these courses are suggested by people in the community and also members of the University faculty. Courses can often be organized on very short notice in response to requests from individuals or groups who feel a particular educational need. All these programs are announced at various times throughout the year in descriptive brochures, catalogues, newspaper advertising, and on radio. A call to the Faculty at 432-3116 will put you on the mailing list for the latest information.

Members of the Extension faculty are also available to help all kinds of organizations and groups identify, analyse and solve their own continuing education problems. This is a growing and challenging part of the Faculty's work and you can find out more about it by getting in touch with the Dean at 432-2681.

The Extension Library's collection of 85,053 books is designed to serve rural residents of the Province with by-mail general library service. Membership in the Library is free and up to eight books can be borrowed at a time. The staff of the Library will provide reading guidance and also do some reference work for members. Blind and disabled people who are unable to read can borrow from a limited stock of "talking books". Enquiries about these services are invited from rural residents who do not have access to a local public library and they should write to The Librarian, Extension Library, The University of Alberta.

Everyone in the Province can benefit from the services of the Faculty of Extension's Educational Media Division. Its resources include 4,700 16 mm films (one of the largest libraries of such material in Canada), 4,849 records and 3,329 audio tapes. All this material is available at nominal rental and catalogues can be obtained by phoning 432-5041.

The Legal Resource Centre was established by the Faculty of Extension in 1975. The overall goal of the Centre is to facilitate the establishment of a comprehensive network of legal informational and educational services, thereby increasing public concern for and involvement in the legal process. The Centre seeks to achieve its goal by undertaking a range of service activities, and by encouraging or assisting others with similar goals. The Centre seeks to achieve its goal by undertaking a range of service activities, and by encouraging or assisting others with similar goals. The Centre addresses the needs of teachers, librarians, community leaders, interest groups, and children. The Centre estimates that in 1979 it received over 8,000 requests for

assistance and served over 5,000 people directly through its library, programming, and consulting services. One thousand eight hundred people were further served through the *Resource News*. It is impossible to say with certainty how many people have benefitted from the Legal Materials Placement Project, although it is estimated that one quarter of Albertans use their public libraries. Fifty libraries presently receive assistance under this project. Similarly, the audience for *Legal Maze*, the Centre's radio program, cannot be determined, but the Centre estimates that it may be as large as 20,000 listeners.

272.1 General Information

The courses listed below are planned for Special Sessions 1981-82. Please consult the appropriate "Schedule of Courses and Timetables" for information concerning scheduling of specific courses.

The language (French or English) used in describing the course indicates the language of instruction. For example, PHILE 354 (Philosophie 354) is described in French because it is taught in French, whereas ENGL 200 (English 200) is described in English, because it is taught in English.

Each course is designated by its computer abbreviation and a number. Students should use this abbreviation and number when filling in the registration forms. Following the title of the course is the symbol "★" standing for "course weight", and a number indicating the weight of the course as used in computing grade-point averages.

Courses numbered 100 to 199 are introductory, usually equivalent to high school courses. Those numbered 200 to 299 are junior courses, normally taken by first-year undergraduates. Those numbered 300 to 499 are senior courses, normally taken after the first year. Courses numbered 500 and up are normally restricted to senior and graduate students.

The course weight and the instructional time for a course appearing in this calendar is equal to that for the same course offered during the regular Winter Session.

Where "written consent" of a department or instructor is a prerequisite for taking a course, students must submit this with their registration forms.

The University reserves the right to impose registration quotas on, or to withdraw, any of the courses listed below.

The appearance of a course in the following list does not constitute any guarantee that the course will be offered.

It will be open to individuals with some background in either cultural anthropology or archaeology. Consent of the Department is required. The course, which is taught as a Field School in the Pryor Mountains of Montana (near Yellowstone), provides a balance between theory and method by placing an equal emphasis upon the collection, analysis, and interpretation of data. In addition to providing experience in reconnaissance and excavation techniques, the course will allow adequate time for labs and seminars. There will also be flintknapping demonstrations and sessions on how to relate this kind of data to the archaeological record. Weekends will be free for excursions to nearby points of interest. Those interested may obtain further information from the Department of Anthropology. (B) A letter of Permission will be needed by students applying from other universities to ensure that proper credit will be given. If not currently enrolled in another degree program, please apply for Special Student status. The tuition fee will *not* be refunded except in cases of extreme distress. ANTHR 590. *Advanced Physical Anthropology: Methods in the Study of Primate Behavior.* ★6 This course, designed for upper-division undergraduates and graduate students, is offered as a practicum in methods and research design. Elements of research design, especially data gathering and analysis, are discussed and applied in classroom and field situations. The course, which is taught as a field school at Arashiyama West Institute, near Dilley, Texas, provides lectures, labs and field experience in the methods of observing the behavior of monkeys in a non-caged environment. Observational techniques (using various kinds of data sheets, audio and video-tape, and computer keyboard), sampling methods, data preparation and analysis, and the practical difficulties of working with live animals in a free-ranging situation will all be taught, experienced and discussed. There also will be presentations by other primatologists, experienced in various types of research situations (cage-studies, colony studies, small enclosure studies, field studies) and visits to two nearby primate research centers. The Arashiyama West Institute Research Ranch is ideal as a training ground in ethological field methods. Systematic observational and data collecting techniques can be easily demonstrated and applied with this well studied and well habituated group. The research facility consists of an electrically fenced 50 acre enclosure in which the Arashiyama West troop of Japanese macaques range freely. This "semi-free ranging" situation combines the best of controlled, captive animal studies and the much more difficult free ranging animal studies. Thus it is excellent for an initial field experience. This group of monkeys has been continuously studied in Texas, and formerly Japan, since 1953. All the animals are individually known and marked for easy identification. Genealogical, management and population data for the group are available. In addition to work at the Institute site in Dilley, instructional and training sessions will be held at the Southwest Regional Foundation for Research and Education in San Antonio, some 70 miles from Dilley. There observational studies of baboons in a 10 acre enclosure are being carried out under the supervision of Dr. A. M. Coelho, and students will have the opportunity of seeing techniques of data collection on computer-linked keyboards in action. Classes will commence on May 4, with several days of classroom instruction and discussion. The class will then move to the field to the primate research centres until the end of May. Students would then attend the meeting of the American Primatological Society from June 2-6 in nearby San Antonio, Texas. Instructors and students will arrange their own transportation to and from Dilley, Texas. Arrangements will be made to meet students at Dilley and drive them to the field site. A camphouse with cooking facilities, running water and flush toilet is provided on the ranch, however, students wishing to sleep in their own tents may do so. On-site transportation will be available and an air-conditioned trailer is provided for daytime classroom use. Students will be asked to share the costs and cooking of their food. A list of required field gear, and any further information should be obtained from the instructor, Linda Fedigan, Department of Anthropology, University of Alberta. Note: (A) This course will be given in Texas during the Spring Session only. Those interested may obtain further information from the Department of Anthropology. (B) A letter of Permission will be needed by students applying from other universities to ensure that proper credit will be given. If not currently enrolled in another degree program, please apply for Special Student status. The tuition fee will *not* be refunded except in cases of extreme distress. The University of Alberta
Summer Session 1981
Schedule of Courses and Timetable

Compiled November 1980

The following Schedule of Courses and Timetable is planned for Summer Session 1981. Information concerning the scheduling of courses for Spring Session 1981 is printed on green stock in this calendar. Students should ensure that their registration applies to the correct Session.

Summer Session 1981 commences on July 6 and ends August 14.

Full Session —July 6-August 14
1st Term —July 6-July 24
2nd Term —July 27-August 14, with classes held on Saturday August 8 in lieu of the Civic Holiday (August 3).

Courses of weight 3 may be offered over the Full Session (July 6-August 14) for one 65 minute period per day, or may be offered for two 65 minute periods per day in either the First or Second Term.

Courses of weight 6 are offered for two 65 minute periods per day over the Full Session. Special circumstances are explained in footnotes.

ADMISSION. Admission is separate and distinct from Registration. A student who has *NEVER* attended The University of Alberta *MUST* apply for admission in addition to completing a Summer Session Registration Form. A $12.00 application fee must accompany the application form and it is to be returned to the Office of the Registrar along with complete and official transcripts of academic records. The deadline for Summer Session is *April 1*.

REGISTRATION PROCEDURES. Each student must complete a Summer Session Registration form. This form must be returned to the students' Faculty Office by the deadline of *April 30.*

Except when otherwise specified, students will be assigned to courses and sections in the order in which their approved registrations are received by the Office of the Registrar. As enrollment in some courses or sections of courses may be limited, students should apply as early as possible in order to secure their preferences. Courses may be withdrawn for such reasons as insufficient enrollment or staffing difficulties.

CHANGES OF REGISTRATION. If a student wishes to withdraw from a course or change from one course to another, he must complete a "Change of Registration" form and submit it for approval by his Dean. The date on which the Dean signs the form will be used in reassessing fees. The deadline for Change of Registration is *April 30.*

PRE-SESSION STUDY. Courses which require pre-session study are marked with a dagger (†). Students who register in these courses will receive information on pre-session study with confirmation of registration. Courses not marked with a dagger (†) do not require pre-session study.

WITHDRAWAL. If a student wishes to withdraw from the University he must complete a "Withdrawal" form and submit it for approval by his Dean. The date on which the Dean signs the form will be used in reassessing fees.

TEXTBOOKS. The University maintains a large modern Bookstore in the Students' Union Building, where prescribed textbooks and supplies of all kinds may be purchased. The Bookstore also stocks a wide range of books and other items of special interest to students and faculty.

Classrooms and the name of the instructor assigned to the course or section are indicated but are subject to change. If the instructor has been named and has prescribed textbook(s), if any, this information will be available at the University Bookstore. For courses where this information is not available, enquiries should be directed to the Department.

Should book returns be required, the returns policy for the Bookstore is seven days from the date of purchase and returned items must be accompanied by a sales receipt or C.O.D. receipt. Further returns of books resulting from withdrawal or transfer may be made providing that the books are in an unmarked condition and the student requesting the refund has retained his sales receipt or C.O.D. receipt and in addition has obtained a copy of the withdrawal or change of registration form. This request for return must be made within seven days.

36. Students wishing to register in OCCTH 498-70 require consent of the Department of Occupational Therapy. Students must attend both the morning and afternoon sections of this course.

37. This course is one of three half-year courses in History and Outdoor Education (History 407—Topics in Alberta History; P ED 223—Boating; and P ED 499—Wilderness Arts, Crafts, and Living Skills) offered over the period of July 7 to August 15, 1981. History 407 will only be open to students who register in one or both of P ED 223 or P ED 499. The bulk of course activities, lectures and trips will occur before July 28; and the period July 28 to August 15 will be available to the students to complete projects and term papers. Students may register in one to three of these courses, but are expected to participate in all camp activities and pay the full camp fee; therefore students are requested to register in two or three of these half courses. Participation in pre-course readings, a preliminary examination, and a final examination will be required for each course. Students are expected to provide their own sleeping bag, personal gear, some food, and a camp fee of up to $120.00 to cover the cost of transportation, food, and other expenses. During this program the majority of the period July 8 to 27 will be spent off-campus canoeing and camping, and will involve 24-hour commitment. Consent of the Department of Physical Education is required prior to registering in these courses.

38. Students must provide their own equipment (squash racquet, squash balls, racquetball racquet, and racquetball balls).

39. Students registered in P ED 234 must be prepared to spend $20.00 on green fees and driving range fees. This will be paid to the Department at the first class meeting.

40. Students must provide their own tennis racquet.

THE UNIVERSITY OF ALBERTA

On-Campus Evening Degree Credit Courses

WINTER SESSION 1981-82

GENERAL INFORMATION

As the Special Sessions Calendar is prepared far in advance of the start of the 1981-82 Winter Session, it is possible that timetable and other changes will be made. Therefore this timetable does not necessarily provide all of the information which a student may need in order to register in on-campus Evening Degree Credit courses. Students are urged to obtain additional and current information from the appropriate Faculty University Calendar, from the University Regulations and Information for Students Calendar, or from the Course Registration Procedures Booklet which may be obtained from the Office of the Registrar after mid-March.

Admission. A student who has never attended The University of Alberta must apply for admission in addition to completing a Course Registration form. The deadline for admission for most undergraduate students for the First Term of the Winter Session is July 2nd.

A $12.00 application for admission fee must accompany each application form submitted by a prospective student who has never attended The University of Alberta or one who has never paid the fee on previous application.

Registration Procedure. Each student must complete Course Registration forms and mail them to the Office of the Registrar by August 13th for on-campus courses (please note the date under "ADMISSION" if you are a new student). Students who are not able to meet the August 19th deadline may register in person during the in-person registration period, September 2-4th. Students are advised to submit their registration forms as soon as possible.

Special Note for Education Students: Students registered in the Faculty of Education may advance register in on-campus Evening Credit courses until *June 1*. After that date students must register during the in-person registration period (in accordance with the published schedule).

Change of Registration. Any student who registers in on-campus Evening Degree Credit courses and who subsequently decides he wishes to change his registration must wait until the period September 8th to 16th to complete a "Change of Registration" form.

Withdrawal. If you wish to withdraw from the University or to cancel your registration, you must complete "Withdrawal" forms for approval by your Dean. The date on which the Dean signs the form will be used in reassessing fees.

Fees. § 261.4 of the Special Sessions Calendar carries a complete listing of instructional and other fees.

Courses. The appearance of a course in the following list does not constitute a guarantee that the course actually will be offered in the forthcoming session.

Other. Since classes which meet on Mondays or Fridays will encounter a statutory holiday in the First Term, instructors are requested to arrange with their classes to make up some or all of the time lost.

The University of Alberta
Evening Credit Program (Off-Campus)

Schedule of Courses and Timetable

Compiled December 1980

Evening Credit Program (Off-Campus) 1981-82

The courses listed below are planned for the Evening Credit Program (Off-Campus) 1981-82 in centres outside Edmonton.

SCHEDULING. Courses normally scheduled Monday, Tuesday, Wednesday or Thursday will meet once a week from 1830 to 2130 on the day indicated. Courses scheduled Friday-Saturday will normally meet from 1830-2130 on Friday and 0900-1200 on Saturday every other week commencing on the dates indicated. Exceptions to this general rule which were known when this Calendar was printed are noted in the schedule.

Because some classes will encounter statutory holidays, instructors are requested to make mutually satisfactory arrangements with their classes to make up some or all of the time lost.

ADMISSION. Admission is separate and distinct from Registration. A student who has never attended The University of Alberta must apply for admission in addition to completing an Evening Credit Registration form. A $12.00 application fee must accompany the application form and it is to be returned to the Office of the Registrar along with complete and official transcripts of academic record.

The deadline for Application for Admission to most Faculties of The University of Alberta is *July 2* (June 1 for the Faculty of Education) for courses commencing in September. For courses commencing in January, the deadline for Application for Admission is *November 2* for the Faculty of Education, and *December 1* for other faculties.

Application forms are available from the Office of the Registrar, The University of Alberta.

REGISTRATION. Unless otherwise indicated in a footnote to the course in the Schedule of Courses and Timetable, students who have been admitted may register in-person or by mail prior to the commencement of classes or may register at the first meeting of the class. All registrations must be approved by the Faculty Office. (Due to possible delays in the mail students who have not registered by August 28 are advised to delay their registration to the first class meeting.)

Registration in some courses and sections is limited, and students will be assigned to them in the order in which approved registrations are received by the Office of the Registrar. A course may be withdrawn for such reasons as low enrollment, staffing difficulties, or changes in the schedule of public transportation.

CHANGE OF REGISTRATION. If a student wishes to withdraw from a course or change from one course to another, he must complete a "Change of Registration" form and submit it for approval by his Dean. The date on which the Dean signs the form will be used in reassessing fees. Forms are available from the Office of the Registrar, The University of Alberta.

WITHDRAWAL. If a student wishes to withdraw from the University, or withdraw from a course, he must complete a "Withdrawal" form and submit it for approval by his Dean. The date on which the Dean signs the form will be used in reassessing fees. Forms are available from the Office of the Registrar, The University of Alberta.

FEES. 261.9 of the Special Sessions Calendar carries a complete listing of instructional and other fees.

EXAMINATIONS. All, or part of the last class in December may be used for midterm examinations in full-session courses or final examinations in First Term courses. Final examinations in full-session courses and Second Term courses will be held during the last class in the Second Term. Evening Credit Program (Off-Campus) classes will not be held during the Second Term reading week February 22-February 28, but courses scheduled for every other week on Friday-Saturday for a total of 6 hours Friday evening and Saturday morning will continue to provide seven meetings for a half course and fourteen meetings for a full course.

OTHER. At The University of Calgary, Grande Prairie Regional College, Lakeland College, and Red Deer College, The University of Alberta degree credit courses are often offered by The University of Alberta. In each case, the courses carry University of Alberta credit, and registration is through the Registrar of the University of Alberta. Students are advised to contact the Colleges directly for information on College courses.

The course weight given for each course below is the same as that for the Winter Session. In this Calendar ★3 denotes a single-term course, ★6 a full-session course. Sections are numbered 91, 92, etc. in ascending order.

The following time conversion table is provided for your assistance:
